Active retail participation & high volatility drive Bursa record 1H earnings

According to Bursa Malaysia Bhd Chairman Tan Sri Abdul Wahid Omar, the exchange expects trading on the stock market to remain vibrant, supported by active retail participation and high volatility in the market. The challenges arising from COVID-19 are likely to continue for at least in the short term, hence the exchange would continue with ongoing initiatives to attract investments and sustain retail participation in its market. Speaking at the virtual media briefing of Bursa Malaysia's first half (H1) financial performance today, he said the high average daily trading value (ADV) momentum of 2020 continued into the H1 of 2021 with ADV increasing by 4.9% to RM4.4 billion. This contributed to the exchange recording a profit after tax of over RM210 million, a 39.4% increase from the previous corresponding period in 2020, and was also the highest ever half-year financial results since listing back in 2005. The global risk-off sentiment that has spurred an outflow by foreign investors from equities is not unique to Malaysia as this was also experienced by other emerging markets in ASEAN. Nonetheless, Malaysia is well positioned for recovery, following the eight COVID-19 fiscal stimulus programmes amounting to RM530 billion as well as the accommodative interest-rate levels have been crucial in supporting the economy. There are three potential upsides to support this view. Firstly, Bursa Malaysia's market valuation, with its forward price-to-earnings ratio of 13.3 times being the lowest in the region, makes it an attractive recovery play over the next few months. Secondly, Bursa Malaysia's initial public offering (IPO) pipeline continues to remain healthy across all three markets, having sustained from the strong momentum last year. Year-to-date, there have been 20 new listings from the target of about 31 new listings this year, which include the recent RM1.21 billion listing of CTOS Digital Bhd, the largest IPO this year. And thirdly, the recovery in domestic and major economies appears to be on track, with the ramped-up vaccination rates seen in recent times and the implementation of the National Recovery Plan would facilitate the reopening of the economy.

Meanwhile, according to Bursa Malaysia chief executive officer Datuk Muhamad Umar Swift, various relief measures and incentives have been introduced to support listed issuers amidst these challenging times. The exchange will continue to enhance its platform to support the investing community in growing their wealth and managing risk against volatilities. Last May, the exchange launched the Pilot Market Making Program which aims to provide greater liquidity for less traded and illiquid stocks in the marketplace. Net profit rose to RM88.97 million in the second quarter ended June 30, 2021 (Q2 2021) from RM86.23 million in the same quarter last year. Revenue increased to RM196.10 million from RM179.78 million previously. In the coming months, Bursa Malaysia will introduce the after-hours (T+1) trading session for the derivatives market (Night Trading), which will

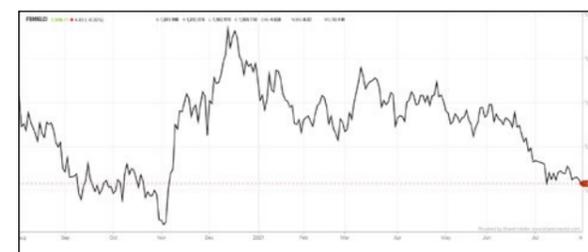

offer greater accessibility and enhance the attractiveness of the Malaysian derivatives market to global players.

PPI for local production up 11.5% y-o-y in June — Dept of Statistics

According to Department of Statistics Malaysia chief statistician Datuk Seri Dr Mohd Uzir Mahidin, the Producer Price Index (PPI) for local production increased 11.5% year-on-year (y-o-y) in June 2021, marking the fifth consecutive month of an upward trend. The mining index increased 64.4% due to higher prices of natural gas, as well as a continuous increase for crude petroleum. The index of agriculture, forestry and fishing inclined at a slower pace of 29.8% because of lower prices of crude palm oil (CPO) and livestock. In addition, the manufacturing index, which was influenced by a rise in prices of primary and construction-related commodities, also showed a significant increase of 6.7%. In terms of the utility indices, water supply rose 1.6%, while electricity and gas supply declined 0.2%. On a monthly basis, the PPI for local production registered a marginal increase of 0.2% in June 2021, compared with 1% in the previous month, in which the increase was supported by the indices of mining (8.2%) and manufacturing (0.8%). However, the agriculture, forestry and fishing; electricity and gas supply; and water supply indices declined 10.5%, 0.8% and 0.2% respectively. Meanwhile, the PPI for local production in the second quarter of 2021 (2Q21) rose 11.3% to 111.3 from 100.0 in the same quarter of the previous year. The increase was contributed by the index of mining (74%), agriculture, forestry and fishing (46%), manufacturing (5%) and water supply (1.4%), while that of electricity and gas supply declined 0.3%. On a quarterly basis, the PPI for local production rose 2.6%, compared with 5.1% in 1Q21. The PPI for local production for all stages of processing recorded an increase in prices for June 2021. The index of crude materials for further processing increased 39.2%, compared with 53.6% in the previous month. The index of intermediate materials, supplies and components also increased 9%, while the finished goods index edged up 0.3%.

Sweeping Changes

Markets

A clampdown by Chinese authorities on certain sectors that the government deemed to be less regulated saw Chinese-related stocks take a beating, led by massive selling in technology, education, property, and the healthcare sector. The authorities published sweeping reforms on the education sector last weekend, which will curtail companies from going public, raising capital, or generating profits.

As markets tumbled, the Chinese authorities were quick to calm markets, by providing more liquidity and emphasized that its measures taken on the education sector was not meant to be extended to other industries. Meanwhile, the Federal Open Committee Meeting (FOMC) was almost a non-event as the Fed reiterated its stance that there is still a long road ahead before the Fed considers its tapering move as conditions for doing so have yet to be met and inflation is likely transitory.

Economy

The International Monetary Fund (IMF) in its quarterly update has maintained its global GDP growth forecast at 6%. Nevertheless, IMF did raise its expectations for developed nations as the vaccination drive is in an advanced stage while nations that are struggling to contain the pandemic and slow inoculation were downgraded. The US economy is now expected to grow by 7% this year and 4.9% in 2022. Emerging Asia's forecast was cut by 1.1 percentage points to 7.5% as IMF lowered India and China's forecast by three and 0.3 percentage pts respectively. For Malaysia, the IMF now expects GDP growth at 4.7% from its April forecast of a 6.5% growth. Growth for 2022 was left unchanged at 6%. Speaking of GDP growth, the US released their advance estimate for the 2Q GDP, which came in at 6.5% y-o-y and missed expectations of an 8.4% jump.

IHS Markit Purchasing Managers' Index (PMI) data point for July was the centre of

attention this week. First out of the block was the Flash Eurozone PMI Composite Output Index which surged to a 21-year high to 60.6 in July from 59.5 in the preceding month. Contrary to market expectations of a 3.4% increase, the US June New Home Sales fell by 6.6% to 676k, the lowest level since April 2020, as median prices for newly built homes surged 6% y-o-y. Meanwhile, US consumers remained upbeat with the Conference Board's July Consumer Confidence rising to 129.1 from 128.9 in the preceding month.

Locally, Malaysia's June inflation data came in slightly below expectations at 3.4% against the forecast of a 3.5% rise, while core inflation remained steady at 0.7% y-o-y. Meanwhile, according to Bank Negara, Malaysia's reserves for the fortnightly period ended July 15 remained steady at US\$111.1bil while in Ringgit terms, the total reserves stood at RM461.82bil, a new record high. Malaysia also reported the June external trade data, which saw exports surging 27.2% y-o-y to RM105.5bil while imports jumped 32.1% to RM83.2bil. Trade surplus rose by 11.7% to RM22.2bil. For the 1H of 2021, Malaysia recorded total exports of RM585.6bil, up 30.2%, while imports increased by 21.1% to RM470.5bil. Total trade surplus for the first half jumped 87.7% to RM115bil.

In other economic news, the Department of Statistics (DoS) released key data in relation to last year's GDP using the income approach. According to DoS, as nominal GDP contracted by 6.4% y-o-y, the compensation to employee component, which has a 37.2% share of the overall GDP, fell by 3% y-o-y, while gross operating surplus, which accounts for 60.1% of the nominal GDP, contracted by 6.9% y-o-y. On the long-awaited 12th Malaysia Plan (12MP), the government is expected to table in Parliament the 5-year plan on 20 September 2021 while Budget 2022 will be tabled on 29 October 2021 in the august house.

Corporate

Kossan Rubber Industries kicked off glove

companies' reporting season for the big-4 with an impressive record-high quarterly net profit of RM1.06bil, up 2.2% on a q-o-q basis, while its revenue too expanded by another 2.1% to hit RM2.24bil. In other news, IJM Corp announced plans to distribute a special dividend of 15 sen per share following the sale of IJM Plantation to Kuala Lumpur Kepong. In contract news, Mercury Industries won a RM450mil 32-month contract for piling, substructure, and superstructure works for a project involving the construction of three 35-storey towers in Johor Bahru.

Equity

Naturally, Beijing's reform measures hit hard on markets this week, especially the Shanghai Composite Index and the Hang Seng Index, which fell by 4.6% and 5.1% respectively. Elsewhere, equity markets closed mixed to lower with losses of between 0.2% and 1.2%, while markets that closed firmer rose by between 0.4% and 1.9%. Shares on Bursa Malaysia were weaker this week on light selling pressure among key heavyweights. The KLCI fell by 14.69 pts week-on-week to close at 1,512.93 pts on Thursday.

For the week ended July 28th, both the local retailers and local institutions were net buyers in the market with an inflow of RM224.5mil and RM14.3mil respectively as foreigners remained net sellers with an outflow of RM238.8mil.

Eye On Week Ahead

Out of the US, the June headline and core Personal Consumption Expenditure (PCE) will be out later today. Next week, the focus will be on the US ISM manufacturing number and the JP Morgan Global Composite PMI to be released on Monday while US ISM services data will be released on Wednesday.

Locally, key banking statistics for June will be released tomorrow while on Monday, IHS Markit will be releasing Malaysia's PMI data point for July.

Genetec's astronomical share price spike - 'So, what gives'?

Riding on the electric vehicle (EV) hype, ACE-Market listed Genetec Technology Berhad had seen its share price soaring to the all-time high of RM19.46 on 13 July, before retreating and closing at RM18.72 on 22 July. The recent uptrend in Genetec started in early June when it was traded around RM3.70 per share. Then on 17 June, the company announced that it had secured RM47.9 million worth of contracts related to EV and battery segment (RM42.5 million) as well as hard disk drive, electronics, and semiconductor industries (RM5.4 million). Genetec's scope of work involves concept design and detailed drawing, order and receiving of component parts, system fabrication and assembly, software coding and programming, factory set-up and system testing as well as installation, commissioning and acceptance by the customers. Further fuelling the optimism was a non-rated report on the company by CGS-CIMB Research on 28 June. The report noted that the ACE Market-listed company was confident that it can benefit from the growing demand for EV vehicles worldwide. "The group plans to ride on the structural shift in the global automotive industry from internal combustion engine (ICE) towards EV," wrote analysts Walter Aw and Mohd Shanaz Noor Azam in the report.

For its financial year ended 31 March 2021, Genetec's net loss widened to RM4.39 million from a net loss of RM900,000 in the year before, though there was higher revenue of RM98.08 million as compared to RM80.33 million in preceding year. CGS-CIMB analysts further pointed out that while Genetec was lossmaking in FY21, the company was

confident that the worst is over and expects stronger results going forward, backed by a strong orderbook and established relationships with global EV manufacturers. As at the end of FY21, Genetec had net cash of RM27.5 million and RM11.6 million of other investments. It currently has a net tangible asset (NTA) value of RM1.70/share.

UMA query

The astronomical rise in Genetec's share price had caught the attention of Bursa Malaysia. On 13 July, it was slapped with an unusual market activity (UMA) query by Bursa Malaysia – the day it hit an all-time high of RM19.46. In its response to Bursa Malaysia's query on the same day, Genetec said it is unaware of any specific reason behind the unusual trading of its shares apart from its recent announcement on 17 June in relation to the new orders it secured. "As at the date of this announcement, there is no corporate development in relation to the group's business and affairs that have not been previously announced which may account for the trading activity, including those in the stage of negotiation/discussion," noted Genetec. It added that it was not aware of any rumour, report or any other possible explanation for the spike in trading activity, adding that its board confirmed that the company was in compliance with the ACE Market Listing Rules on immediate disclosure obligations.

This is the second time Genetec received a UMA query from the exchange this year. The first one was issued on 18 January.

Conclusion

Bursa Malaysia generally expresses its concern by raising UMA queries on listed issuers whose stock prices are scaling to dizzying heights without well-grounded reasons. This concern is generally accentuated when the company replies that they are not aware of any reasons which could warrant the substantial surge in price and/or volume. Such replies are pieces of information that minority shareholders should consider when making their informed investment decisions. The anecdotal question that minority shareholders should ask themselves is - 'So, what gives?'

For Genetec, minority shareholders may wish to consider whether the industry prospects (especially the EV prospects), and the resultant potential financial performance, warrant such optimism and astronomical rise in share price within the short time span. Interestingly, the company's largest shareholder and co-founder, Chen Khai Voon has been mopping up Genetec shares from the open market – upping his direct stake from 11.02% on 1 July to 12.155% as of 22 July. He also holds a 7.1% indirect stake in the company.

MSWG would like to remind minority shareholders to exercise due diligence, given that Genetec's stock price has skyrocketed 406% between its closing price of RM3.70 on May 31 and RM18.72 at the time of writing (22 July). Our mantra of informed investment decision making continues to be relevant.
