Bursa extends validity period of 20% general mandate

According to Bursa Malaysia CEO Datuk Muhamad Umar Swift, the exchange has announced another 12 months extension of the temporary relief measures for the increased general mandate of 20% for new issue of securities by way of private placement (20% general mandate) and the general mandate of 50% based on a pro-rata entitlement for new issue of securities by way of rights issue (pro rata 50% general mandate), each of which would expire on Dec 31, 2021. This extension is in line with Bursa Malaysia's commitment to assist listed issuers to address their funding needs and working capital requirements by easing compliance and facilitate secondary fundraising. Covid-19 has had an unprecedented lingering impact on the listed issuers. It is imperative for listed issuers to be able to raise funds through the secondary market in an expedient, efficient and cost-effective manner during these challenging times. The 20% general mandate previously announced on April 16, 2020 will be extended for another 12 months for listed issuers that have not raised any funds using the 20% mandate in 2020 or 2021. Such listed issuers will have up to Dec 31, 2022 to issue new securities under the 20% general mandate subject to the same prescribed conditions. For example, procuring shareholders' approval for the 20% general mandate at a general meeting, complying with all applicable legal requirements including the constitution and disclosing views from the board of directors that the 20% general mandate is in the best interest of such listed issuers and their shareholders as well as the basis for such views. The validity of the pro-rata 50% general mandate announced on Nov 10, 2020 is similarly extended for another 12 months until Dec 31, 2022. An eligible listed issuer may issue rights securities on a pro-rata basis using this mandate, subject to compliance with the same conditions as imposed earlier. Additionally, the pro-rata 50% general mandate can now be utilised to issue a combination of ordinary shares/units and convertible equity securities (instead of just ordinary shares/units previously) as part of the rights issue exercise.

PNB declares 5 sen income distribution for ASB unitholders

According to Permodalan Nasional Bhd (PNB) Group chairman Tun Arifin Zakaria, PNB's wholly owned unit trust management company Amanah Saham Nasional Bhd (ASN) has declared an income distribution payout of five sen per unit for its flagship unit trust fund Amanah Saham Bumiputra (ASB) for the financial year ending Dec 31, 2021. The payout comprised an income distribution of 4.25 sen per unit, as well as a bonus payment of 0.75 sen totalling RM8.9 billion which will benefit 10.4 million ASB unit holders, bringing the fund's total cumulative income distribution and bonus to RM168.5 billion since it was first introduced in 1990. ASB's performance remains competitive compared to other low-risk investment instruments, and continuous efforts in diversifying and strengthening the portfolio have yielded positive results. The stronger performance of its global equity investments has managed to cushion the impact of the challenging domestic market. This exemplifies the importance of a well-diversified portfolio in managing portfolio risks and delivering

sustainable returns. The income distribution for ASB this year is competitive, a result of hard work and dedication of our investment team. The total rate of five sen per unit translates into a spread of 315 basis points over the 12-month fixed deposit rate which currently stands at 1.85%. ASB transactions are suspended from Dec 23 until Jan 2, 2022 for dividend distribution and will reopen on Jan 3, 2022.

Malaysia's total approved investments up 51.5% y-o-y to RM177.8b in January to September - MIDA

According to Senior Minister and International Trade and Industry Minister Datuk Seri Mohamed Azmin Ali, Malaysia attracted a total of RM177.8 billion in approved investments in the manufacturing, services and primary sectors, involving 3,037 projects, between January to September 2021. This represented a 51.5% increase compared to the same period last year and is expected to generate 79,899 jobs in the country. The country's stellar performance is indeed a testament to investors' strong confidence in Malaysia as a preferred investment hub, particularly its conducive business ecosystem in providing high-skilled talent and having strong readiness for advanced technology. This, in turn, further bolsters its role as a prominent site in global companies' manufacturing networks, enhancing Malaysia's position as a pioneering and renowned investment destination in the region. The manufacturing sector accounted for the largest share of total investments in the January-to-September period, amounting to RM103.9 billion (58.4%), followed by the services sector with RM57.8 billion (32.5%) and the primary sector with RM16.1 billion (9.1%). Foreign direct investment (FDI) accounted for nearly 60% of approved investments, valued at RM106.1 billion. Singapore, China, Austria, Japan and the Netherlands were the top five foreign investment sources, contributing nearly 85.3% or RM90.6 billion of total approved FDI. While FDI led approved investments in the manufacturing sector, investments from local companies dominated in the services and primary sectors. Domestic direct investment totalled RM71.7 billion or 40.3% of total approved investments. Five states, namely Kedah, Sarawak, Kuala Lumpur, Selangor and Pahang, contributed RM134.8 billion or 75.8% of total approved investments in various sectors.

“Window-dressing”

Markets

As markets enter the final week of the year, market activities slowed down this week with very little market-moving news, but the spread of Omicron has raised fresh concerns. With daily cases reaching almost 900,000 cases and deaths now at about 7,000+ per day, the market is becoming concerned about the impact of the variant on economic growth going into 2022. However, on the plus side, early indications are showing, while the Omicron virus spreads easily, it has not resulted in a surge in hospitalization rate, which suggests that the variant is less dangerous than the earlier more deadly Delta variant.

Economy

Out of the US, US Consumer Confidence came in better than expected, rising to 115.8 in December from the preceding month's print of 111.9. In other news, Existing Home Sales for November was a disappointment, as the annualized rate of 6.49mil was lower by 2% y-o-y, although firmer by 1.9% when compared with October reading.

Faced with increasing pressure to support the economy, the People's Bank of China lowered its benchmark one-year loan prime rate by 5 bps to 3.8% from 3.85% but left the five-year loan prime rate unchanged at 4.65%. Meanwhile, as expected, the Bank of Thailand (BoT) left the key one-day repurchase rate unchanged at 0.5% as it continues to battle the Covid-19 pandemic and to support the local economy.

Locally, Malaysia's November Consumer Price Index (CPI) surged to 3.3% y-o-y from the preceding month's print of 2.9% y-o-y increase. The hike in the headline number was mainly driven by a 12.7% y-o-y increase in the Transport component. Meanwhile, core inflation registered a 0.9% y-o-y increase from

October's 0.7% y-o-y rise. Other economic data this week was the release of Malaysia's international reserves, which fell by US\$0.4bil to US\$116.3bil as at December 15, translating to RM487.6bil in Ringgit terms.

In other news, Malaysia saw RM177.8bil in approved investments up to September this year. According to the Malaysian Investment Development Authority (MIDA), the total Foreign Direct Investment (FDI) approved was RM106.1bil, translating to almost 60% of the total approved investments.

Corporate

Supermax furnished details of its US investment plans with an initial investment of US\$350mil (RM1.48bil) under phase one. According to the company, the chosen site is a 215-acre manufacturing facility located in Brazoria County, Texas. It said the four-phase manufacturing facility is expected to produce 19.2bil gloves per annum when completed.

In contract news, Duopharma obtained a 3-year contract valued at RM375.2mil to supply human insulin formulations to all Ministry of Health's (MoH) hospitals, district health offices, and clinics. Meanwhile, Gadang won a RM131.4mil 30-month sub-contract to undertake geotechnical, drainage, and structural works for Package 2 of the Central Spine Road. Yinson too was in the news this week as it secured a US\$505mil (RM2.1bil) contract for a Floating, Production, Storage, and Offloading (FPSO) facility in the Santos Basin, offshore of the Brazilian waters.

Tomyapak Holdings, whose manufacturing facilities were greatly impacted by a major fire, has informed the Exchange that it has adequate insurance coverage of up to RM271mil for property damage and stock in trade and RM80mil for business interruption for up to two years.

KNM Group, which was recently placed under PN17 due to a default of its Thai bonds, has laid out plans to address its financial condition, which among others include the sale of its Thailand 72% owned bio-ethanol plant; sale of land and assets related to its waste to energy facility in the UK; and a potential listing of its prized asset, Borsig Group.

Equity

World equity markets closed the week on a mixed to easier note with losses of between 0.2% and 1.2% on Hong Kong's Hang Seng Index. Markets that rose saw gains of between 0.2% to as high as 2.1% on the KLCI. The local bourse was supported by light bargain hunting and window dressing activities as it added 31.78 pts for the week to close at 1,516.42 pts.

For the week ended December 22, it was again the local institutions and retail market participants emerged as net buyers in the market with a net inflow of RM118.2mil and RM70mil respectively, as foreign selling pressure was sustained with a smaller outflow of RM188.2mil.

Eye on Week Ahead

As next week is the final week of the year, very few economic data points are due to be released. On Wednesday, out of the US, the November Pending Home Sales and the Goods Trade Balance data will be out. Locally, the Department of Statistics will release the November External Trade data on Tuesday, 28 December. On the same day, the Producer Price Index (PPI) Local Production for November too is due.

With just a few days of trading left for the year, the market too may see some window-dressing activities, in particular among the 30 KLCI-linked stocks.

ESG gains momentum as institutional investors look beyond profitability

Undoubtedly, the electronics manufacturing service (EMS) industry has become the latest testbed – after the glove and plantation sectors – for institutional investors in Malaysia to flex their muscles or to assert their rising concerns on ESG (environmental, social and governance)-related matters. This ideally sets the tone for 2022 on how, in a major way, fund managers will move forward. Fund managers will prioritise “in a bigger way” ESG considerations in their investment decisions – something which could ultimately outweigh their financial interest. Institutional investors such as Employees Provident Fund (EPF) certainly did not mince its words when it said that it wanted to work with its investee companies in terms of better disclosure and transparency on ESG data by looking beyond short-term returns. This they intend to do through the incorporation of sustainability parameters into the investee companies’ key performance indicators.

Confronted by the forced labour issue surrounding the country’s three key EMS providers, the retirement fund had on 2 December disposed 21.67 million shares of V.S. Industry Berhad, thereby ceasing to be a substantial shareholder of V.S. Industry. In addition, the Retirement Fund Inc (KWAP) had on the same day disposed 6.58 million of VS Industry’s shares. This further exacerbated the downfall of V.S. Industry’s share price to reach a 52-week low of 99.5 sen before paring loses to close at RM1.15 on 2 December. As of 13 December, KWAP held 7.444% direct and 1.496% indirect stake in V.S. Industry. Coincidentally, the sell-downs of V.S. Industry shares by institutional funds occurred on the same day that migrant worker rights activist Andy Hall made a reference of several local EMS companies, including V.S. Industry, in an investor briefing on the topic of migrant workers’ welfare in Malaysia.

Remedies taken

To remedy the situation, V.S. Industry had swiftly initiated an engagement with Hall pertaining to his concerns raised during an investor briefing. On 6 December, in a joint

media statement with V.S. Industry, Hall clarified that his comments during the briefing “were not meant as a direct reference to indicate irremediable migrant worker issues at V.S.” Also, he had no intention to launch further public campaigns against any specific companies that are open to constructive dialogue on migrant worker rights, given the inherent risks of publicity to the well-being of all concerned, especially the workers and their families. He added it was also essential to ensure migrant workers’ livelihoods are sustained, while not compromising their welfare. “It would not be an ideal situation if in the end, any workers, whether Malaysian or migrant, lose their jobs due to exploitation of situations that could and should be remedied,” he said. At the same time, V.S. Industry management had stepped in to stem the bleeding. Its chairman and executive director Datuk Beh Kim Ling had mopped up 6.358 million shares himself while his daughters had collectively acquired 1.6 million shares between 2 and 8 December. This raised Beh’s direct and indirect shareholding in V.S. Industry to 7.277% and 7.242% respectively. Then, V.S. Industry managing director Datuk Gan Sem Yam bought 800,000 shares (direct interest) between 7 and 10 December. As of 14 December, Gan owned 4.389% direct and 0.681% indirect stake in the Company. Nevertheless, the disposals of 28.25 million shares by EPF and KWAP may be deemed as “too big a chunk”, so much so that it may have sent shockwaves that could potentially trigger a herd mentality among other institutional investors (thus dragging down the counter further).

Shockwave sent across other EMS players

Similarly, another EMS player, SKP Resources Bhd had also engaged with Hall after the latter claimed that he had received a complaint from workers of SKP Resources’ with regard to excessive overtime and payment of recruitment fees. In a joint media statement with SKP Resources, Hall said both parties had discussed the issues he raised. He was

confident that the Company would address the issues and remain open to address the other challenges that may arise in relation to the management of migrant workers. SKP Resources, however, did not encounter similar major backlash from its institutional investors. KWAP, which is a substantial shareholder of SKP Resources, had disposed its 353,000 directly held shares and 1.6 million indirectly held shares between 2 and 8 December, and acquired 4.05 million shares indirectly through its fund managers. It held a 7.47% direct and 2.06% indirect interest in SKP resources as of 8 December. Besides, SKP Resources’ executive chairman-cum-managing director Datuk Gan Kim Huat had also acquired 1 million shares from the open market on 8 December, which raised his direct and indirect stake in the company to 4.53% and 35.56% respectively. As of 15 December, the share price of V.S. Industry had recovered to RM1.27 while SKP Resources closed at RM1.61.

Recall that the sell-downs of shares in EMS counters started with ATA IMS Berhad after it posted a quarterly net loss of RM11.17 million for its Q2FY2022 and the contract termination by Dyson Ltd on grounds of labour abuse allegations. These events had collectively sent the share price of ATA IMS to a 52-week low of 38 sen on 30 November before consolidating at the current price range of 70 sen.

Minority shareholders be forewarned

Based on these developments, we believe that ESG is going to be featured prominently in fund managers investment decisions going forward. It will not be profit at-all-costs for these fund managers – they will be prepared to take a lower profit or even a loss to send the right message to the market – that ESG matters. Given that fund managers invest substantially in the shares of Malaysian companies, fund managers’ preferences and inclinations will have an impact on share prices. This is another consideration that minority shareholders should take note of when making their informed investment decisions.
