# FOREIGNERS BOUGHT RM56.9M ON BURSA LAST WEEK – MIDF RESEARCH

According to MIDF Research, foreign investors turned net buyers again after a week of net selling the week before, with net inflows summed up to RM56.9 million last week. Local retailers remained net buyers for the fifth consecutive week at RM234.8 million while local institutions turned net sellers after a week of net buying with a net selling position of RM291.8 million last week. To date, international funds have been net buyers for 15 out of the 19 weeks of 2022, with a total net inflow of RM6.98 billion. They were net sellers on Wednesday and Thursday, at RM2.08 million and RM145.2 million, respectively. Local institutions were net sellers on all the trading days last week, except on Thursday where they were net buyers to the tune of RM41.38 million. The highest net selling was recorded on Tuesday at RM200.67 million, and the smallest net selling on Wednesday at RM40.44 million. They have been net sellers for 16 out of 19 weeks this year. To date, they have sold RM8.1 billion of equities. Local retailers were net buyers on all trading days of the week with the highest net buying on Thursday at RM103.83 million, and smallest net buying on Tuesday, at RM21.34 million. In terms of participation, foreign investors saw a decrease in the average daily trade value by 24.76%. Local retailers saw a decline of 6.9% while local institutions saw an increase of 9.49%.

## BNM RAISES OPR TO 2% FROM RECORD LOW OF 1.75%

According to Moody's Analytics, Bank Negara's surprise decision to increase its overnight policy rate (OPR) by 25 basis points to 2% from 1.75% came on the back of rising inflation pressures. The Russian invasion of Ukraine, together with China's zero-Covid policy, has caused supply-chain disruptions and an uptick in global commodity prices. Several central banks are expected to adjust monetary policy settings 'at a faster pace', hinting at concerns over capital outflows and the weakening ringgit. Given that the country's borders had fully reopened on April 1, Bank Negara now expects the economy to strengthen. Domestic Covid-19 restrictions have also largely been lifted, allowing consumer and investor spending to pick up. Inflation remains relatively subdued, and this renders the central bank's move largely pre-emptive. Higher food and fuel prices pushed the consumer price index to 2.2% year-on-year (y-o-y) in March. In comparison, consumer prices in neighbouring Singapore, Thailand and the Philippines rose between 4.5% and 5.5% in April. Being a net exporter of oil, Malaysia could afford to subsidise its domestic prices to ward off price increases due to the high oil price. Nonetheless, the country is subjected to rising food prices, which has been exacerbated by the Russian invasion of Ukraine. The price of food and non-alcoholic beverages had soared 4% y-o-y in March, on par with the rest of the Asia-Pacific region. Malaysia's gross domestic product for the first quarter of 2022 came in stronger than expected at 5% compared to its previous quarter's performance – the fourth quarter of 2021 – which was 3.6% y-o-y. Industrial production grew 5.1% y-o-y in March, compared with a 4% increase in February.

## MALAYSIA NOT AT RISK OF RECESSION - FINANCE MINISTER

According to Finance Minister Tengku Datuk Seri Zafrul Abdul Aziz, Malaysia is not at risk of recession and is on track to meet forecast economic growth targets of between 5.3% and 6.3% this year. The country's economic growth would be supported by the government's expansionary fiscal policy as well as accommodative monetary policy.

The current talk of a global recession was premature and unwarranted, and Malaysia would see further growth momentum in the second quarter after recording a strong first-quarter gross domestic product growth of 5%. However, he remains wary of potential downside. There is a potential risk due to the war in Ukraine, high commodity prices and global monetary policy tightening. As a result, the government will need to ensure adequate fiscal flexibility in the future to manage such risks. This is why he intends to gradually reduce the fiscal deficit from 6.4% in 2021 to 6% in 2022 and also rationalise the subsidies to be more targeted. Failure to meet debt obligations was a major risk for countries in the event of a global recession but it was not a risk for Malaysia, as the risk was mitigated due to its low exposure to external debt, with less than 3% in foreign currencies. Malaysia had ample liquidity to finance the government and private sector borrowing needs.

## EYE ON THE MARKETS

This week, on Friday (20May), the Ringgit opened at 4.3965 against the USD from 4.3950 on Tuesday (17May). Meanwhile, the Ringgit was 3.1839 to the Sing Dollar on Friday (20May). On Tuesday (17May), the FBM KLCI opened at 1555.68. As at Friday (20May) 10:00am, the FBM KLCI is up 0.85 points for the week at 1556.53. Over in US, the overnight Dow Jones Industrial Average closed down 236.94 points (-0.75%) to 31,253.13 whilst the NASDAQ shed 29.66 points (-0.26%) to 11,388.50.

# ALL EYES ON DAVOS

Pankaj C Kumar

**Pankaj is a former CIO and Head of Research, presently focused on economic, market and corporate analyses. The views expressed here are entirely the writer's own.**

**A**s more economic data were released this week and in particular those related to the 1Q GDP performance of several key economies, there are indeed increasing signs of a weakening global economic momentum, brought about not only by China's harsh Covid-19 lockdown measures but also by the sustained high commodity prices, which has only led to ever-rising inflationary pressure. The great sell-off on Wednesday which saw major US indices registering losses of between 3.5% and 4.7% are testament to the market's reaction when inflation hits retail companies like Target as profits get slashed due to higher cost of materials and rising wage costs.

Economists and world leaders have a busy weekend this week and into next week as the World Economic Forum takes place in Davos from May 22-26 after a two-year hiatus. The meeting in Davos held for the first time in spring, brings together world business and political leaders, which may discuss in-depth current urgent issues impacting the world. This includes the current Russia-Ukraine war, the global inflationary pressure, and the mighty Dollar.

**ECONOMY**

Out of the US, Retail Sales for April topped forecast with a m-o-m gain of 0.9%, despite rising inflationary pressure. Other April data too was robust with April Factory Output and Industrial Production coming in at 0.8% and 1.1% m-o-m, ahead of the market's forecast of a 0.4% and 0.5% gain respectively. From the US property market, Housing Starts fell 0.2% m-o-m in April to an annual rate of 1.72mil units, while Building Permits fell 3.2% in April to an annual rate of 1.82mil units.

Meanwhile, UK April inflation prints topped estimates as headline inflation surged to 9% y-o-y – a fresh 40-year high, while core inflation met the market's expectation of a 6.2% y-o-y gain. Both data were well above the preceding month's reading of 7.0% and 5.7% respectively.

The People's Bank of China (PBoC) kept the one-year medium-term lending facility unchanged at 2.85% despite several key economic data coming in well below expectations, mainly due to the shutdown in several cities as the nation battled against Covid-19. The April Industrial Production Index contracted by 2.9% y-o-y while Retail Sales plunged 11.1% compared with a year ago as the unemployment rate surged to 6.1%. The cumulative Fixed Asset Investment up to April too slowed down to just 6.8%.

More 1Q GDP data were released this week as Thailand reported growth of 2.2% y-o-y, ahead of the consensus estimate of a 1.7% gain, driven by the re-opening of the economic sectors, in particular the tourism industry. The Japanese economy too beat market expectations as 1Q GDP contraction came in at an annualized pace of just 1% against the market forecast of a 1.8% fall. Meanwhile, Indonesia posted a spectacular 47.8% y-o-y growth in exports, driven by the commodity boom. As imports growth was only at 22%, Indonesia posted a record trade surplus of US\$7.6bil in April. On the other hand, Singapore's non-oil domestic exports eased to pose a growth of just 6.4% y-o-y

Locally, Malaysia's 1Q GDP growth of 5.0% y-o-y was well ahead of market expectations of a 4% increase. 1Q growth was driven by strong momentum seen in both the services and manufacturing sectors, which expanded by 6.5% and 6.6% compared with a year ago, while

on the demand side, growth was driven by both private and public consumption, which grew by 5.5% and 6.7% y-o-y respectively. On a q-o-q basis, the economic engine too has gained traction, rising by 3.9% on a seasonally adjusted basis. Bank Negara also reiterated its full-year projection of between 5.3-6.3% despite the recent rate hike of 25bps in the Overnight Policy Rate or OPR.

Meanwhile, Malaysia's external trade performance remains commendable as exports for April surged 20.7% to RM127.5bil while imports rose by 22.0% to RM103.9bil, resulting in a trade surplus of RM23.5bil, up 15.7% y-o-y. For the first four months of 2022, Malaysia's exports increased by 21.8% to RM472.4bil while imports jumped 24.3% to RM383.8bil, giving rise to a trade surplus of RM88.6bil, up 12.1% y-o-y.

## CORPORATE

Petronas Chemical has entered into a conditional Sales and Purchase Agreement to acquire Perstorp Holdings AB (PHAB) for a base price of €1.538bil or RM7.02bil cash after taking into consideration PHAB's Enterprise Value of €2.3bil and net debt of €762mil. Chin Hin Group sold its entire 19.34% shareholding in Solarvest Holdings in a related party transaction to its immediate holding company, Divine Inventions SB (DISB) for RM103.3mil and netted a disposal gain of RM35.7mil. In other news, Signature International is acquiring 120mil shares or 23.67% equity interest in Fiamma Holdings for RM180mil. Signature expects to tap into Fiamma's distribution capabilities in the home and kitchen electrical appliances market. At the same time, DISB is also acquiring 30mil shares or 5.92% equity interest in Fiamma at RM1.50 per share. Both the block of shares were purchased from Mr. Lim Choo Hong, the CEO and Group Managing Director of Fiamma.

Dagang NeXchange (DNeX) was also in the news this week as the company entered into a Memorandum of Understanding (MoU) with Hon Hai Precision Industry (better known as Foxconn) to build and operate a 12-inch wafer fabrication plant in Malaysia, capable of producing up to 40,000 wafers per month in 28-nanometer and 40-nanometer technology.

Meanwhile, MPHB Capital expects to realize a provisional net gain of RM170.5mil based on the adjusted sale price for its 51% stake held in MPI Generali Insurans for RM508.2mil. The adjusted sale price translates to a price-to-book of 1.38x based on the insurance company's net asset value of RM367.9mil as at end of December 2021.

## EQUITY

If not for the furious sell-off on Wednesday on Wall Street, which also spilled over into Asian equities yesterday, it was relatively a good week for markets after the previous week's carnage. Except for the 1.1% on the Dow Jones and 0.3% drop each in the S&P 500 Index and S&P BSE SENSEX Index, markets were generally firmer globally with gains of between 0.5% to as much as 3.8% on the Hang Seng Index. The local bourse too was firmer with the KLCI closing the week at 1,549.41 pts, up 10.61 pts or 0.7%.

For the week ended May 19, retail market participants and local institutions emerged as net buyers with an inflow of RM127.2mil and RM70mil, while foreigners sustained their net selling position with an outflow of RM197.2mil.

## EYE ON WEEK AHEAD

Later today, PBoC will decide on the 1-year and the 5-year Loan Prime Rate with a potential cut in rates as domestic economic momentum has slowed down considerably due to the recent lockdown measures. Both the rates were last moved in January to 3.7% and 4.6% respectively.

On Tuesday, May 24, out of the US, the April New Home Sales data is due with consensus expecting a slight dip to 758,000 units annualized rate. On the same day, the S&P Global Flash Eurozone Composite Purchasing Managers' Index (PMI) and

Manufacturing PMI for May are due as well. On Wednesday, May 25, all eyes will be on the Royal Bank of New Zealand as it decides on the next move for the Official Cash Rate, which was moved by 50bps to 1.5% last month, while the US will release its Durable Goods Order data for April, which is likely to show slower growth of 0.5% m-o-m. On the same day, the market will also be on the lookout for the minutes of the Fed's last Federal Open Market Committee (FOMC) meeting held early this month, which may give further clues on the Fed's direction with respect to pace and quantum of coming rate hikes, especially in June and July, which the market is now expecting to be at 50bps at each meeting.

Locally, On Monday, May 23, Bank Negara will be releasing the international reserves position as at May 13, 2022. This will be closely watched as the last reported fortnightly figure saw a decline of US\$1.9bil or RM8.25bil to US\$112.5bil or RM472.6bil. On Wednesday, May 25, the Department of Statistics Malaysia (DOSM) will be releasing the April Consumer Price Index (CPI), which will likely show some price pressure on both the headline and core numbers against the preceding month's print of 2.2% and 2.0% respectively.

# MACC LOOKS BEYOND GLCS TO CLAMP DOWN ON CORRUPT PRACTICES

Devanesan  
Evanson

**Chief Executive  
Officer, Minority  
Shareholders Watch  
Group**

In recent times, there are clear signs of the Malaysian Anti-Corruption Commission (MACC) casting its net wider to encompass PLCs who are engaged in project tie-ups with government-linked companies (GLCs) especially if there is suspicion or evidence of company personnel – from junior to senior level to company directors – engaging in graft-related activities. This becomes more glaring following the implementation of the corporate liability provision involving all commercial organisations under Section 17A of the MACC Act 2009 which came to force on 1 June 2020.

Lately, power infrastructure provider Pestech International Berhad had been thrust into the limelight as its subsidiary CRSE Sdn Bhd is assisting the MACC in the agency's investigation of a corruption case related to the Mass Rapid Transit 2 (MRT2) project. This follows various media reports on the MACC investigation into alleged corruption by two engineering firms involved in the MRT2 project. Pestech explained that CRSE is currently executing the power supply and distribution system (PSDS) package for the MRT2 project. As such, CRSE as one of the

contractors to the MRT2 project has also been required to assist in the MACC investigation. To recap, Bernama had in March this year reported that three directors and two former directors of an engineering firm had been detained by the MACC to assist in a corruption case investigation that is linked to the MRT2 project worth over RM650 million. According to the news report, four men, including one with the title “Datuk” and a woman – all aged between 43 and 63 – were detained when they turned up to give their statements at the MACC headquarters. Two former company directors were believed to have received RM27 million in bribes from another engineering firm as kickbacks to be appointed as a consultant for the project in 2017. The case is being investigated under Section 16 of the MACC Act for soliciting and accepting bribes.

Apart from detention of company officials which is deemed a direct action, MACC had also in recent times acted in a more subtle manner as experienced by lingerie manufacturer Caely Holdings Bhd which confirmed on 20 April that the graft buster has issued a freeze order on all the operational bank accounts of the company and its subsidiaries. Caely said that the freeze order by MACC was never made known to the company but that it had merely received the notice from one of its bankers – that its accounts had been frozen.

## **FIRST PLC IMPLICATED UNDER SECTION 17A**

On 19 August 2021, Deleum Berhad said its 60%-indirect subsidiary Deleum Primera Sdn Bhd (Primera) had been issued a RM1 million compound by the MACC over the illegal scheme involving several of the latter’s directors and certain subcontractors. According to its stock exchange filings, the upstream oil and gas services group became aware around January 2020 of unusual irregularities in Primera’s conduct of business, prompting it to appoint PwC Consulting Associates (M) Sdn Bhd to conduct a special audit and forensic investigation for the subsidiary. Later, their investigation revealed that senior management personnel, directors and shareholders of Primera had entered into an illegal scheme with certain subcontractors of Primera that resulted in a loss to Primera. Following this, a civil suit involving claims of RM19.88 million has been brought by Primera

against seven individuals and three companies. The case came about after Pristine Offshore Sdn Bhd became the first company to be charged under the newly introduced Section 17A of the MACC Act 2009 on 31 March last year with one count of bribery involving RM321,350 to ensure that it was awarded a subcontract from Petronas Carigali Sdn Bhd as well as one count of bribery framed under Section 16(b)(A) of the MACC Act 2009. The bribe was allegedly given to a senior officer of Deleum Primera between June and October 2020 to ensure Pristine Offshore was awarded the subcontract from Petronas Carigali.

## CONCLUSION

Section 17A of the MACC Act is a powerful corporate liability provision with a deeming personal liability implication. Directors, management, and associates must be fully aware of its implications and what the directors, management, and associates can do to avoid or mitigate liability. The recent experiences of these PLCs demonstrate the need for board of directors of PLCs – especially the audit committee – to play a more proactive role by being vigilant in ensuring that all funding for projects can be accounted for or leakages can be quickly plugged. In addition, the audit committee should also determine whether appropriate policies and controls are in place for the detection and mitigation of risks related to bribery and corruption.

In essence, PLCs have no better option than to conduct their businesses with utmost integrity without having to resort to corruption. This is a given since the provisions under Section 17A of the MACC Act 2009 stipulates a corporate liability principle where a commercial organisation can be considered guilty if any of its employees and/or associates commit corruption for the benefit of the organisation. At the same time, apart from the organisation, the directors and management can also be considered guilty (until they can prove their innocence) regardless of whether they or their upper management sanctioned, or was aware of, the corrupt acts being committed by its employees or associates. If a commercial organisation is found guilty under Section 17A, the penalty is a fine of not less than 10 times the value of the bribe or RM1 million whichever is higher or imprisonment for up to 20 years or both.
