Bursa may give more time to firms to submit **PN17/GN3** regularisation plan

Bursa Malaysia is considering granting further extension of time (EOT) for companies, which have triggered the criteria of Practice Note 17 (PN17) and Guidance Note 3 (GN3) from Jan 2, 2019 to Dec 31, 2020, to enable them to submit their regularisation plan to the Securities Commission Malaysia (SC) or the exchange after the 24-month grace period. This would only be done on a case-by-case basis and based on the requirements made by the companies. It said that it is aware that the Covid-19 pandemic would have a material impact on the efforts and ability of PN17/GN3 companies to regularise their financial condition. For the record 23 companies had been classified under PN17 and three companies under GN3 as at July 28, 2020, representing 2.89% of the total companies listed on Bursa Malaysia during the period.

Gold prices hit USD2,000 an ounce for first time

This week gold prices on Tuesday hit US\$2,000 (about RM8,443) an ounce for the first time, the latest surge in a commodity seen as a refuge during economic uncertainty. The precious metal hit the symbolically important benchmark near 1615 GMT before retreating somewhat then crossing the line again about 30 minutes later. Gold prices have risen more than 30 percent this year as the coronavirus outbreak has weakened the economy and clouded the global financial outlook. Also weighing on investors were concerns over whether the United States will pass another spending measure to support the world's largest economy as it weathers a prolonged and deadly coronavirus outbreak.

Malaysia ranks 41st for digital quality of life in 2020 in global survey

According to Cyprus-based Surfshark Ltd in their study covering 81% of the global population (6.3 billion people), Malaysia ranks 41st for digital quality of life in 2020, finishing ahead of its neighbours Thailand which ranks 63rd and Indonesia in the 71st position. Malaysia is among 13 countries in the Digital Quality of Life Index 2020 (DQL Index 2020) that exceed the expected digital quality of life by providing higher levels of electronic-infrastructure (e-infrastructure) and e-government than expected of their gross domestic product (GDP) levels. Malaysia has made it into the top 30 in terms of e-government (21st) and e-infrastructure (26th) respectively. Meanwhile, Internet quality is mediocre in Malaysia — it is ranked in the 48th place globally. According to the report, slow and unstable mobile connectivity is dragging Malaysia down. This year, the study has taken into account the impact of the Covid-19 outbreak on Internet quality and, among others, factors such as Internet affordability, e-government, e-security and e-infrastructure.

Further signs of rapid recovery in Malaysia as factories keep up momentum

According to the IHS Markit Malaysia Manufacturing Purchasing Managers Index (PMI), Malaysia's manufacturing continued to outperform expectations in July to offer further indication that the country could be in for a V-shaped recovery from the Covid-19 pandemic. It registered a score of 50.0 for July to beat estimates of 49.0. A PMI score under 50 denotes contraction while a score above 50 signals expansion. In the previous month's PMI, Malaysia registered a score of 51.0, up sharply from the 45.6 in May. IHS Markit chief business economist Chris Williamson said it was vital for the sector to maintain the momentum but cautioned that this may be more difficult due to deteriorating export demand. It will be important for demand to rise further in coming months to encourage more hiring and boost confidence. July saw job numbers fall at a slightly increased rate as firms grew slightly less optimistic about the year ahead, underscoring how producers are likely to remain cost-conscious and err towards risk aversion until the outlook for demand beyond the initial rebound from Covid-19 lockdowns becomes clearer.

Unrestricted sales campaign to spur growth and boost economy

According to Domestic Trade and Consumer Affairs Ministry (KPDNHEP) enforcement director Datuk Iskandar Halim Sulaiman, the government's initiative to allow traders to hold unlimited sales campaigns, paving the way for increased consumer spending, will provide the opportunity to further boost the country's economy. The ministry's move is to allow traders to organise cheap sales, according to its suitability and affordability, without quotas as compared to a limit of four times a year previously. The definition of cheap sale prices are when traders offer goods at a lower price than previously offered. They are to show the comparison of pre- and post-discount prices, where the expressions such as "sale", "discount", "reduction", "best buy", "best price", "special price" or "half-price offer" can be used. Last year, the date and period permitted by the ministry's Control of Trade Descriptions to hold cheap sales was the Early Year Sale from Jan 1 to Feb 28; 1 Malaysia Mega Sale Carnival from May 1 to July 31 as well as Year End Sale from Oct 1 to Dec 1.

MDEC and Bank Negara launch Fintech Booster programme to support fintech

The Malaysia Digital Economy Corp (MDEC) launched the Fintech Booster programme to support the growth and development of financial technology (fintech) companies in Malaysia. The Fintech Booster programme, developed in collaboration with Bank Negara Malaysia, provides capacity building programmes for fintech companies based in Malaysia to develop innovative products and services by enhancing their understanding of legal, compliance and regulation requirements. Three verticals will be introduced in the programme that covers legal and compliance, business model, and technology. The first vertical on legal and compliance will initiate the launch of the programme by enabling fintech companies to participate in public sessions or clinics. The programme will be provided by participating booster partners, covering topics ranging from company law, to cyber security and data governance. Six legal and consulting firms have volunteered to provide their expertise in legal and compliance for this round of the vertical programme. The programme also seeks to build a centralised hub for consultants, advisors and solution providers to provide fintech companies the necessary tools and support to develop their products and services.

This week, on Thursday (6August), the Ringgit gained significantly to 4.1875 against the USD from 4.2335 on Monday (3August), extended from last week. Meanwhile, the Ringgit was 3.0575 to the Sing Dollar on Thursday (6August).

On Monday (3August), the FBM KLCI shed 31.14 points or 1.94% lower to 1572.61 from previous Friday's close of 1603.75. And as at Friday (10July) 10:00am, the FBM KLCI was still in consolidation mode from last week at 1584.28 as market might be taking a breather now before resuming the bull run.

Hock Seng Lee

Hock Seng Lee (**HSL**) announced financial results for the second quarter ended June 30, 2020. The company posted quarterly revenue of RM83.05mil, which is lower than the RM175.41mil achieved over the same period last year. The construction segment contributed RM74.05mil, or 89% of the total revenue while property development recorded RM9mil. Net profit before tax for the current quarter is RM3.06mil and RM2.34mil respectively. For the same period a year-ago, pre-tax profit was RM14.96mil and RM6.85mil respectively. The lower figures were attributed to Covid-19, with Q2 beginning at the height of the Movement Control Order (MCO). The recovery phase of MCO only began on June 10. As a result, HSL, like the rest of the industry, had just about two weeks of full working days.
