# The World Bank Cuts Malaysia GDP in 2020 Target to -0.1%

By Stella Goh

**O**n Monday (30Mar), the FBM KLCI shed 14.21 points or 1.06% to 1328.88 from previous Friday's close of 1343.09 as the US crude briefly dipped below US\$20 (RM87) and Brent hitting its lowest level in 18 years, on heightened fears that the global Covid-19 shutdown could last for months and demand for fuel is likely to be softer than expected. The stance of not backing down between Saudi Arabia and Russia coupled with the global transport restrictions exerted more pressure on the oil prices. (Source: TheEdgeMarkets.com, 30Mar)

Small and Medium Enterprises (SMEs) are expecting further refinements to the stimulus package with additional provisions to help them tide over this challenging period. Most SMEs do not have enough cash to even meet payroll after one month of forced idleness. They pay fixed costs from their earnings for the month and since there have been no earnings for the last two weeks, they are struggling to pay salaries and rents. According to the SME Association of Malaysia president Datuk Michael Kang, SMEs are not in a position to secure loans because 80% of them do not qualify for a loan and they always use their own money. (Source: TheEdgeMarkets.com, 31Mar)

The World Bank is projecting a negative economic growth for Malaysia this year amid the Covid-19 crisis but the country is likely to recover in the fourth quarter of the year before bouncing back into smoother momentum in 2021. The bank cut its 2020 gross domestic product (GDP) target for Malaysia to -0.1% reflecting a significant drop from its earlier target of 4.5%. According to the World Bank lead economist Dr Richard, the net exports and investments in Malaysia are expected to experience a larger contraction in 2020 while

**Baseline projections are 6.4% of GDP growth forecast in Malaysia in 2021**

private consumption is expected to grow at a much lower pace from 7.6% in 2019 to 1.6% in 2020. (Source: The Edge Financial Daily, 1Apr). Their baseline projections are 6.4% of GDP growth forecast in Malaysia in 2021. On a worse-case scenario if they have a prolonged pandemic and slower growth as a result they would see a growth of 4.1% of GDP in 2021 of which Malaysia would only see full swing recovery in 2022. (Source: The Malaysian Reserve, 1Apr)

The Edge Covid-19 Equipment Fund and The Edge Covid-19 Health Care Workers Support Fund saw tremendous support for companies bringing the total donations from Corporate Malaysia to RM23.775 million. (Source: The Edge Financial Daily, 2 Apr). Through the Star Foundation, Star Media Group is pledging RM1 million to kick-start the Star Frontliners Initiative Fund aimed at providing essential medical supplies. (Source: Star Media Group Berhad).

Bursa Malaysia has been looking for feedback among its key stakeholders on whether the stock exchange should implement shorter trading hours during the Covid-19 pandemic. There have been suggestions that a shorter trading day could make markets more efficient as trading activity tends to be weak at the start of the session and jumps at the market close. According to Bursa Malaysia, they are engaging and will continue to engage the key industry stakeholders with a view to ensuring a normal and orderly operations of business while ensuring the safety and wellbeing of all in the industry under the current market condition. (Source: The Star, 1 April 2020)

The Ringgit weakened against the US dollar from RM4.333 on Monday (30Mar) to 4.358 on Thursday (2Apr). As at Friday (3Apr) 10:00 am, the FBM KLCI was at 1328.79. A volatile market outlook is expected.

SHARIAH HOT STOCKS

Price & Volume Distribution Charts (Over 5 trading days as at yesterday)

Definition

Shariah compliant stocks with Technical Analysis showing 20-days Moving Average Price below Yesterday's Close over past 5 days and with Volume Spike.

Chart Guide

Volume Distribution Chart is a statistical interpretation of the current sentiment on each stock in graphical format. The highest bar categorized as >150k is likely to be traded by institutions or super dealers, while the lowest bar categorized as <15k usually represents retail investors. "Buy Up" refers to more buyers snatching up the lots queued at selling price. "Sell Down" refers to sellers selling their shares to the buying queue.

# ELK-Desa Resources Berhad (5228)

By Stella Goh

## OVERVIEW

**E**LK-Desa Resources Berhad (ELKDESA) is an established Malaysia-based investment holding company founded in 1989 and is headquartered in Kuala Lumpur. ELKDESA started its hire purchase financing operation in 2004, in view of continued growth of the automobile industry as well as rapid urbanization taking place throughout the country reflecting Malaysia's progress towards a high-income nation. ELKDESA's core focus area was in the under-served hire purchase financing for used motor vehicles. Over the years, the company has successfully established a strong presence and reputation in this segment.

ELKDESA was listed on Main Market of Bursa Malaysia on 18 December 2012. This significant milestone provided the company with the impetus to expand even further in a dynamic and sustainable manner.

## BUSINESS MODEL

ELKDESA is involved in two business segments that provide products and services targeted at the consumer market. They are hire purchase financing and other integrated services for used motor vehicles and furniture trading.

The company's hire purchase financing division remains its primary business activity and income generator through its subsidiary called ELK-Desa Capital Sdn Bhd. The company has carved a strong presence as a reputable lender in the used motor vehicle sector specifically targeting buyers who are seeking small value financing. As an extension of its hire purchase financing business, ELKDESA also cross-sells general insurance products to its hire purchase customers. These products are mainly from leading insurance providers such as Tokio Marine Insurance (Malaysia) Berhad and Berjaya Sampo Insurance Berhad.

Besides that ELKDESA is also focused in the wholesaling of home furniture in domestic market under its subsidiary ELK-Desa Furniture Sdn Bhd. The company has four furniture retail showrooms located in Klang and Shah Alam and has started to distribute its furniture products to more than 800 furniture retailers throughout Malaysia. Although the furniture division is relatively new but is a growing business venture that has the potential to contribute positively to ELKDESA's earnings and growth in the foreseeable future.

## FINANCIAL REVIEW

Based on past 3 financial years' revenue chart above its revenue grew year-on-year (y-o-y) from FY2017 (+47.25%), FY2018 (+10.20%) to

FY2019 (+18.50%). On a CAGR basis, ELKDESA has grown 24.35% based on 3 years.

ELKDESA's revenue was due to the higher contribution from both the company's hire purchase financing business and furniture segment. According to the Annual Report for FY2019, hire purchase financing division remains its main income generator contributing 98% to the company.

ELKDESA has recorded a RM14.250 million increase in gross profit, translating to a growth of 16.82% from RM84.705 million in FY2018 to RM98.995 million in FY2019. Based on 3 years CAGR, the company's gross profit has grown 18.84%.

The rise in gross profit was attributed to the net hire purchase receivables growth of a notable 22% to RM490 million as at 31 March 2019. This was one of the key factors that had led the Division's increased revenue and gross profit. ELKDESA's furniture division although currently a small and non-core business activity of the company has also contributed positively during the year. (Source: Annual Report 2019)

The Profit After Tax (PAT) of ELKDESA rose 26.97% from RM25.924 million in FY2018 to RM32.916 million in FY2019. Based on 3 years CAGR basis, the Profit After Tax (PAT) grew by 20.55% which was in line with the growth in revenue and gross profit.

## CASH FLOW STATEMENT

The net cash from operating activities has provided a negative cash flow of (-RM53.977 million) in FY2019 as compared to (-RM25.689 million) in FY2018 as the hire purchase receivables and trade receivables increased in FY2019 compared to previous year.

The net cash from investing activities in FY2019 (-RM3.042 million) was

mainly due to the purchase of Property, Plant and Equipment (RM4.477 million). The negative cash flow indicates that the firm is investing in its business for growth. (Source: Annual Report 2019).

The net cash from financing activities in FY2019 is RM38.165 million was mainly due to net drawdowns of block discounting payables amounting to RM63.938 million.

The company also has to pay dividend (RM20.657 million) and interest (RM5.115 million) to its shareholders.

**Is the company able to pay back its liabilities?**

Based on the liquidity ratio calculation, ELKDESA has a current ratio of 2.449 times in FY2019 indicating that the company does not face any liquidity issue as it is capable of paying back its liabilities (RM71.901 million) if any unforeseeable circumstances occur. ELKDESA is able to do so by using current assets such as inventories, other assets, trade receivables, hire purchase receivables, other receivables, deposits, prepayments, current tax assets, short term funds, cash and bank balances amounting to RM176.123 million. However this may also indicate that the company is not efficiently using its current assets or its short-term financing facilities.

**PROSPECT AND CHALLENGES**

ELKDESA has announced its maiden medium-term notes (MTN) program of up to RM1 billion in nominal value to raise funds for the expansion of its used car hire purchase financing business. According to ELKDESA, the program with a tenure of 10 years will be done via its special vehicle Premier Auto Assets Berhad. The first tranche of the senior MTNs totaling of RM105 million, comprising RM85 million of AAA-rated Class A MTNs and RM20 million of AA3-rated Class B MTNs were issued on 19 July 2019 which are rated by RAM Rating Services Berhad.

ELKDESA aims to utilize the fresh funds to grow the hirer base of its used car hire purchase financing business, the primary business activity and main income contributor of the company. (Source: The Malaysian Reserve, 19 July 2019). According to the executive director and chief financial officer, Henry Teoh Seng Hee, MTNs will finance their growth. As such, they do not need to worry about insufficient funds to grow their hire-purchase financing business. With the MTNs,

**RATING SYSTEM**

- Return on Equity (ROE) = **Average**
  - Revenue [3 years CAGR] = **Good**
  - Net Earnings [3 years CAGR] = **Good**
  - Basic Earnings per Share (EPS) [3 years CAGR] = **Good**
  - Interest Coverage = **Good**
  - Quality of Earnings = **N.A.**
- (\*Unable to get Quality of Earnings because Net Cash from Operating Cash Flow is Negative Figure)

the company is expected to leverage up with its gearing ratio expected to almost double to 0.5 times in FY2020, up from 0.28 times as at March 31, 2019. (Source: The Edge Markets, 13 August 2019).

According to Affin Hwang Capital, they believe there are still ample opportunities for ELKDESA to tap into the used car market. Robust Proton and Perodua sales in 2H 2019 indicated that the mass market is not facing constraints, and that the bottom 40% and middle 40% income groups (B40 and M40) consumption spending is still intact.

The robust national car sales in 2019 were a good sign boding well for ELKDESA's prospects. It is highly likely whenever the car owners (B40 and M40 groups) need to upgrade, they would first dispose of their existing cars in the used-car market. This is where the hire purchase financing players such as ELKDESA would finance and the transactions at rates of 8.75% to 10%.

**MY INSIGHT**

Based on the calculation of Discounted Earnings Model, ELKDESA has an intrinsic value of RM1.972. The current share price of ELKDESA is RM1.15 which makes it an undervalued

stock (as at 2 April 2020). ELKDESA has a beta of 0.543 (500days) indicating that the share price is less volatile than current market. Based on the computation of Compound Annual Growth Rate (CAGR), ELKDESA has an expected market return of 0.45%.

In conclusion, ELKDESA has achieved a strong performance in FY20219 with the highest revenue, gross profit and profit after tax over the past 3 years. The company's prospect remains bright as the MTNs program is also timely as higher purchase financing for the used car segment remains underserved, with the demand far out-stripping supply. Since ELKDESA has carved a niche as a reputable lender in Klang Valley, I believe it is well poised to drive further growth moving forward.

## Malaysia Airports Holdings Berhad

Malaysia Airports Holdings Berhad (MAHB) wishes to clarify that the Single-Tier Final Dividend of 10.00 sen per ordinary share of MAHB in respect of the financial year ended 31 December 2019, as approved by the Board of Directors of the Company, is not subject to the approval of the shareholders of the Company. The Constitution of the Company provides that before a dividend distribution is made such dividend must be authorized by the Board of Directors. The said authorization was obtained on 28 February 2020.

## Idimension

### Idimension Consolidated Berhad

Further to Idimension Consolidated Bhd's (ICB) announcement on 2 May 2019 in relation to the member's voluntary winding-up of its wholly-owned subsidiary, OS Solutions Sdn Bhd (OSSB), the Board of Directors of ICB wishes to inform that the liquidators of the Company had on 30 March 2020 convened the final meeting to conclude the member's voluntary winding-up of OSSB.

### Kumpulan Perangsang Selangor

The Board of Directors of Kumpulan Perangsang Selangor wishes to announce that the Company intends to seek shareholders' approval for the Proposed Renewal of Existing Shareholders' Mandate for Recurrent Related Party Transaction of a Revenue or Trading Nature (Proposed Shareholders' Mandate) at the forthcoming Annual General Meeting. Details of the Proposed Shareholders' Mandate will be disclosed in a circular to shareholders which will be dispatched to the shareholders of the Company in due course.

### Boustead Holdings Berhad

### Boustead Holdings Berhad

On 29 August 2018, the Board of Boustead Holdings announced to Bursa Securities that the Group has yet to fully utilise the proceeds raised from the Rights Issue earmarked for property development activities within the expected timeframe of 24 months from the date of listing of the Rights Shares on 23 June 2016. As at 22 June 2018, approximately RM408.0 million allocated for the property development activities has yet to be utilised. The Board had then resolved to extend further the time frame for the utilisation of the said proceeds for another 19 months from 23 June 2018 until 31 December 2019 to provide additional time for the Group to utilise the balance of proceeds for property development activities. The Board wishes to inform that as at 31 December 2019, approximately RM196.0 million allocated for the property development activities has yet to be utilised within the expected time frame. The Board has therefore resolved the following: (i) to vary the utilisation of the balance of proceeds allocated for the property development activities in relation to the acquisition of lands for future development and construction of a hotel in Port Klang, Selangor Darul Ehsan for the following: (a) repayment of the Group's bank borrowings; and (b) working capital, in addition to the infrastructure works, for the Group's property development projects, (collectively referred to as the Revised Utilisation of Proceeds), and (ii) to extend further the time frame for the Revised Utilisation of Proceeds for a period of 12 months from 1 January 2020 until 31 December 2020 to provide additional time for the Group to utilise the balance of proceeds for the purposes set out in (i) above.
