Stock market rally has inclusive benefits for all — Bursa Malaysia

ccording to Bursa Malaysia, market capitalisation on the local bourse had risen 7% to RM1.70 trillion as at end-July 2020 compared with RM1.59 trillion at end-February 2020. More individuals have turned to the equity market to supplement their income and seek better returns from potential capital gains and dividend yields, reflecting investor confidence in the economy recently. This was the bourse's response to address the current perception by some parties that the stock market is only accessible and benefits the select few who understand and participate in the equity market. The benchmark FBM KLCI rebounded 31% from its decade low of 1,219 points on March 19, 2020, and has turned out to be the best performing market among ASEAN emerging markets with other markets registering declines. As for indirect market participants (individuals who do not invest in the stock market), it said many Malaysians have invested indirectly in the equity market through pension funds such as the Retirement Fund Inc (KWAP) or Employees Provident Fund (EPF), unit trusts and mutual funds like Public Mutual or CIMB Principal Asset Management, Permodalan Nasional Bhd (PNB) and Lembaga Tabung Haji.

MIDF launches new financing scheme for SMEs to encourage tech adoption

Malaysian Industrial Development Finance Bhd (MIDF), through its Development Finance Division (DFD), has introduced a new financing scheme - the Soft Financing Scheme for Digital and Technology (SFDT) to encourage more companies to adopt technologies as part of the new normal and way of doing business. According to MIDF DFD head Azizi Mustafa, the SFDT, channelled through the Ministry of International Trade and Industry (MITI), is offered to all sectors with the aim of increasing the marketability of local small and medium enterprise's (SME) products into national and global markets, as well as encouraging local SMEs to adopt digitisation and e-commerce. The scheme offers financing of up to $\ensuremath{\mathsf{RM1}}$ million or up to 90 per cent of total costs of eligible items, including legal fees related to the financing, as well as an interest rate as low as four per cent. As SMEs are a crucial part of the Malaysian economy, rapid adoption of technology would certainly assist SMEs to drive better efficiency and boost their growth through lower operational cost and enriched supply chain, as well as enhanced market reach

Malaysia to invest significantly in latest generation telecommunications and other technologies

According to Communications and Multimedia Minister Datuk Saifuddin Abdullah, Malaysia will invest significantly in the latest generation telecommunications and other technologies in the quest to achieve a highincome nation status. So far Malaysia has 71 5G use cases demonstrations led by private companies namely Celcom, Digi, edotco, Maxis, Petronas, Telekom Malaysia, U Mobile, and YTL as well as their ecosystem partners consisting of digital solution providers, ministries, agencies, integrators and vendors. These use cases were demonstrated across seven states namely Kedah, Pahang, Penang, Perak, Selangor, Terengganu and the Federal Territories with a total industry investment of RM131 million. These projects focus on facilitating and cultivating the development of a holistic and inclusive 5G ecosystem, which stimulates the demand, as well as adoption.

As various industries adopt 5G, it could positively influence other industries' contribution rate to the gross domestic product (GDP) effectively, allowing the country to produce and manufacture more high-quality goods and services, ultimately benefitting the rakyat with

improved earnings and affordability. The government has extended the period of the 5G demonstration project (5GDP) until Dec 31, 2020. For the innovators, service providers, and relevant stakeholders, this is an exciting time for Malaysia and are urged to come forward and participate in the 5GDP. Malaysia is expediting the improvement of connectivity for both fibre optic and 4G as a means to ensure that the 5G rollout will be done in an efficient and effective manner. Hence, the 5G deployment will benefit consumers without a significant increase in cost of service: industries will be able to roll out their respective solutions utilising 5G; and an expeditious use of the invested network for the service providers. Such a healthy eco-system will contribute significantly to the national agenda of Digital Malaysia and thereby the national GDP.
