# 12th Malaysia Plan to emphasize on investor-friendly policies in Budget 2021

According to Finance Minister Tengku Datuk Seri Zafrul Aziz, the government in its Budget 2021 and the 12th Malaysia Plan, will look at being more investor-friendly. Malaysia's position as a preferred investment destination also remains strong despite current global economic uncertainties thanks to the various government economic initiatives and efforts to contain the spread of the coronavirus pandemic within the country. There are green shoots of recovery across multiple economic fronts, thanks to prudent practice in containing Covid-19, and the implementation of the RM295 billion PRIHATIN and PENJANA economic revitalisation plans. The country's unemployment rate has declined from its peak of 5.3% in May, while monthly production numbers have continued to show growth since April. Moreover Bank Negara Malaysia's decision to keep the overnight policy rate (OPR) unchanged at 1.75% at its recent Monetary Policy Committee meeting signalled the central bank's confidence in the sustainability of the country's economic recovery. Over at the Malaysian stock market, the increased retail participation and a swing back of foreign inflows, is proof of market confidence towards ongoing recovery. In the bond market, foreigners remain net buyers of Malaysian bonds for four straight months, from May to August 2020, with total inflows of RM23.1 billion, signalling long term confidence in Malaysia's stability and growth trajectory. At the same time, the ringgit has emerged as one of the best performers among ASEAN currencies in recent months.

## OPR cumulative cuts of 125 basis points boost domestic activity and spur economic growth

According to Deputy Finance Minister II Mohd Shahar Abdullah, the reductions in the Overnight Policy Rate (OPR) has helped to lower the cost of borrowing and spur economic growth by stimulating domestic consumption. Following comprehensive measures taken by the government and Bank Negara Malaysia, the main economic indicators show that the economy has been gradually recovering since April this year. The recovery process is expected to continue in line with the recovery of the global economy and sentiment. As a simple example, if a 30-year housing loan totalling RM350,000 at an initial interest rate of 4.50% and with the 125 basis points cut in the OPR this year, the monthly repayments will be RM1,523 compared with RM1,773. Borrowers can save RM250 a month with the OPR cut and can choose to save or spend, but noted that domestic spending will help to stimulate Malaysia's economy. The cumulative 125 basis points cut in the OPR this year will continue to support the economic recovery process. BNM had also announced a lowering of the Statutory Reserve Requirement (SRR) ratio by 100 basis points to 2.00% in March and May 2020 as well as the flexibility to banking institutions to use MGS and MGII to meet the SRR compliance. This measure has released approximately RM46 billion worth of liquidity into the banking system and is part of BNM's continuous efforts to ensure sufficient liquidity to support financial intermediation activity.

## RM140bil Bandar Malaysia will be country's biggest development

According to Finance Minister Datuk Seri Tengku Zafrul Abdul Aziz, the kickstart of Bandar Malaysia will boost business across all sectors as it will be a hub to local and international fronts. The investment is also a testament to foreign investors' confidence towards Malaysia and will have an economic multiplier effect for the whole country. With a gross development value of RM140 billion, it will be the biggest development of its kind in our country. This project will unlock tremendous potential high-impact global businesses and talent attraction towards the country, in line with the government's vision of ensuring prosperity for all. IWH-CREC presented a cheque worth RM1.24 billion to TRX City Sdn Bhd where under the agreement marking the kickstart of Bandar Malaysia, IWH-CREC will take up a 60% stake in Bandar Malaysia Sdn Bhd, the project's master developer, from TRX City, with the remaining 40% held by TRX City.

## Invest Selangor identifies new industrial areas

According to CEO Datuk Hasan Azhari Idris, Invest Selangor is in the process of changing the status of several areas in Selangor that have the potential to be

developed into new industrial areas. Several areas in the districts of Klang, Kuala Langat and Sepang have been identified as the new industrial areas in collaboration with private developers. On the readiness of Malaysian entrepreneurs to adopt e-commerce, a significant increase could be seen in terms of its use for business lifeline since the Movement Control Order (MCO) was enforced on March 18. For example, the Selangor e-Bazaar Programme held during the fasting month of Ramadan last year managed to attract 8,400 entrepreneurs with sales reaching more than RM300 million, surpassing its target of 5,000 entrepreneurs. All small and medium enterprises could seize the opportunities provided by the government to explore the wider market through economic digitisation.

## Covid-19 restrictions threaten Asia economic recovery in 2021: ADB

According to Asian Development Bank chief economist Yasuyuki Sawada, the Coronavirus-ravaged economies across the Asia Pacific will make a "swoosh-shaped" recovery next year. But further restrictions to combat the contagion could derail the region's return to growth. Developing Asia - stretching from the Cook Islands in the Pacific to Kazakhstan in Central Asia - is expected to contract in 2020 for the first time in nearly six decades, throwing tens of millions of people into poverty. The 0.7 percent shrink in gross domestic product compares with ADB's previous estimate in June for 0.1 percent growth and will mark "the first regional GDP contraction since the early 1960s. The downturn is across the board, with almost three-fourths of regional economies projected to contract - the largest such share in the past 6 decades. While the vast region is expected to bounce back next year with GDP projected to grow 6.8 percent, it will be "substantially smaller" than forecast before Covid-19 struck. The regional recovery will be L-shaped or 'swoosh-shaped' rather than V-shaped noting a prolonged pandemic was the main threat to the outlook. Reimposing tough virus restrictions could hamper the recovery and even trigger "financial turmoil." While economies in developing Asia remain resilient, continued policy support is needed to underpin recovery. Policy support packages announced to the end of August had reached a total of US\$3.6 trillion - about 15 percent of regional GDP. China, where the virus first emerged late last year before morphing into a pandemic that has infected more than 29 million people worldwide, was one of the few economies to buck the downward trend in the region.

After successfully beating back the disease, the world's second largest economy is forecast to grow 1.8 percent this year and 7.7 percent in 2021. In contrast, India, which is one of the hardest hit countries in the world with over 4.8 million infections despite lengthy lockdowns, is expected to shrivel by nine percent in 2020 before expanding by eight percent next year. The path and speed of economic recovery in regional economies will depend on many different factors, the most important of which is ability to control and contain the pandemic.

This week, on Thursday (17Sep), the Ringgit gained slightly to 4.1470 against the USD from 4.1485 on Monday (14Sep). Meanwhile, the Ringgit was 3.0434 to the Sing Dollar on Thursday (17Sep). On Monday (14Sep), the FBM KLCI gained 6.50 points or 0.43% to 1511.36 from previous Friday's close of 1504.85. But as at Friday (18Sep) 10:00am, the FBM KLCI gained slightly to 1518.28, maintaining above 1500 points for this whole week. U.S. stocks fell on Thursday as technology-related shares slid for a second day and data suggested the labor market had shifted into low gear amid fading fiscal stimulus. The S&P 500 ended down 0.84% to 3,357.01 and the Nasdaq Composite dropped 1.27% to 10,910.28. The Nasdaq's losses put the index down 10% from its closing record, confirming a correction that began on Sept 2.
