Paul Yu Hong Chan  
Senior Analyst, CFA, FRM  
Head of Research

He has been associated with the Supervisory Group for many years, starting the work for manufacturing companies, including Observer and The Observer, and the subsequent acquisition of HLIB.

Before that he was with the Management Consulting & Advisory when he was the Director of Studies for the Certified Financial Analyst Programme in Malaysia.

Graduated from the Royal Military College, Canada for an engineering degree from the University of Glasgow, and a MBA from the University of Bradford, UK.

### Malayan Flour Mill:

A Mature Business With Efficiency Gaps to Close

**SUMMARY**

- Malayan Flour Mill (MFM) (Bursa:3662) is a mature flour producer with regional operations and a joint-ventured poultry business; its core revenue and profit driver remains flour and grain trading.
- Proforma analysis shows revenue and PBT growing at mid-single-digit CAGR. Still, ROE and ROIC have stayed below the cost of equity for over a decade, indicating limited value creation.
- Growth prospects are modest, reinvestment requirements are high, and efficiency gains are needed for returns to improve - especially given slow industry growth and limited historical M&A.

## Price & Volume Distribution Charts (as at Yesterday)

Technical Analysis

**DEFINITION:** Shariah compliant stocks with Technical Analysis showing 5-days & 10-days Moving Average Price below Yesterday's Close over past 3 days and with Volume Spike.

**CHART GUIDE:** Volume Distribution Chart is a statistical interpretation of the current sentiment on each stock in graphical format. The highest bar categorized as >150k is likely to be traded by institutions or super dealers, while the lowest bar categorized as <15k usually represents retail investors. "Buy Up" refers to more buyers snatching up the lots queued at selling price. "Sell Down" refers to sellers selling their shares to the buying queue

## COMPANY BACKGROUND

**Top Glove Corporation Berhad** is the world's largest manufacturer of gloves with manufacturing operations in Malaysia, Thailand and Vietnam. The company also has marketing offices in these countries as well as USA, Germany, Brazil and China; and exports to over 2,000 customers in 195 countries worldwide.

The Group's product range includes gloves (latex and nitrile) and a non-glove segment comprising condoms, face masks, dental dams, exercise bands and household products, fulfilling demand in both the healthcare and non-healthcare segments.

## A tribute to the founding principles of the Breguet style

How did the fundamentals of the Breguet style originate? They are so deeply rooted in the Manufacture's 250-year history that pinpointing a single origin is a daring endeavour. One watch, however, perfectly embodies them: the No. 5, delivered in 1794 – to which today's Classique 7235 pays fitting tribute.

## Price & Volume Distribution Charts (as at Yesterday)

Technical Analysis

**DEFINITION:** Shariah compliant stocks with Technical Analysis showing Bullish Momentum and Price Uptrend. The share price closed at the highest price yesterday. The typical price was higher than the previous day's typical price.

# Malayan Flour Mill:

## A Mature Business With Efficiency Gaps to Close

### SUMMARY

- Malayan Flour Mill (MFM) (**Bursa:3662**) is a mature flour producer with regional operations and a joint-ventured poultry business; its core revenue and profit driver remains flour and grain trading.
- Proforma analysis shows revenue and PBT growing at mid-single-digit CAGR. Still, ROE and ROIC have stayed below the cost of equity for over a decade, indicating limited value creation.
- Growth prospects are modest, reinvestment requirements are high, and efficiency gains are needed for returns to improve - especially given slow industry growth and limited historical M&A.

## BACKGROUND

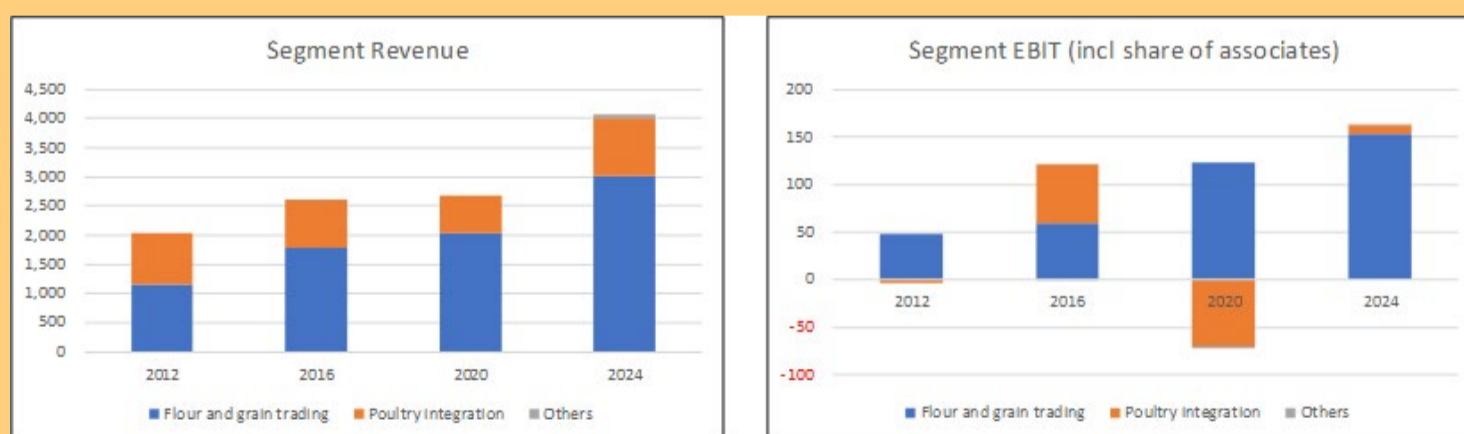

Incorporated in 1961, MFM is a pioneer in Malaysia’s flour milling industry with operations in Lumut and Pasir Gudang. The company has also expanded regionally into Vietnam and Indonesia. In Malaysia, MFM also trades raw feed materials through a joint venture with the Toyota Tsusho Corporation Group, in which it owns a 51% stake.

MFM diversified into poultry in 1983, developing an integrated value chain spanning feed milling, breeders, hatcheries, broiler farms, and processing. In May 2021, MFM sold a 49% stake in its poultry integration business to Tyson International Holding. This business is now accounted for as a joint venture. Accordingly, post-2021 Group revenue excludes poultry integration results.

From an operating perspective, MFM has 3 business segments:

- **Flour and grain trading** - wheat flour milling and trading of grain/allied products. This is the biggest revenue and EBIT contributor, (refer to left part of Chart 1).
- **Poultry integration** - feed milling, hatcheries, breeder and broiler operations, processing, and contract farming
- **Others** – aqua feed manufacturing and sales

In 2023, Malaysia contributed 58% of Group sales, with Vietnam accounting for the balance.

**Chart 1: Segment Performance Profile**

**Notes**

- 1) The 2024 performance was based on extrapolating the Q3 2024 results.
- 2) I assumed that segment EBIT for the Poultry integration segment was the same as the segment PBT.
- 3) The 2024 Poultry integration segment performance was based on 100% ownership, ie, before accounting for the 49% owned by Tyson.

## OPERATING PERFORMANCE

To assess long-term performance, I typically reviewed 12 years of revenue and profit. For MFM, however, a complication arose after 2021 when the Poultry integration results were deconsolidated due to the 49% sale to Tyson. Post-2021 Group revenue and operating profit, therefore, exclude this segment.

To maintain comparability, I constructed pro forma revenue and PBT, treating Poultry integration as if still consolidated. **(Refer to the original article for the details).**

The **left panel of Chart 2** shows meaningful growth under this approach: 2012-2023 proforma revenue CAGR = 6%, while proforma PBT CAGR = 5.4%, with a spike in 2022. The spike stemmed largely from exceptional Poultry integration performance, supported by channel penetration, economies of scale, favourable pricing mix, and government subsidies.

To evaluate returns, I estimated pro forma ROE (**right panel of Chart 2**). Despite profit growth, returns have been volatile and largely stagnant - average proforma ROE of 6% (2012-2024) versus an estimated 12% cost of equity, indicating limited value creation.

One could argue that reported accounting returns matter more from a market perspective. My estimates of its accounting ROE averaged 7% over 13 years, still below the cost of equity and similarly insufficient to generate shareholder value.

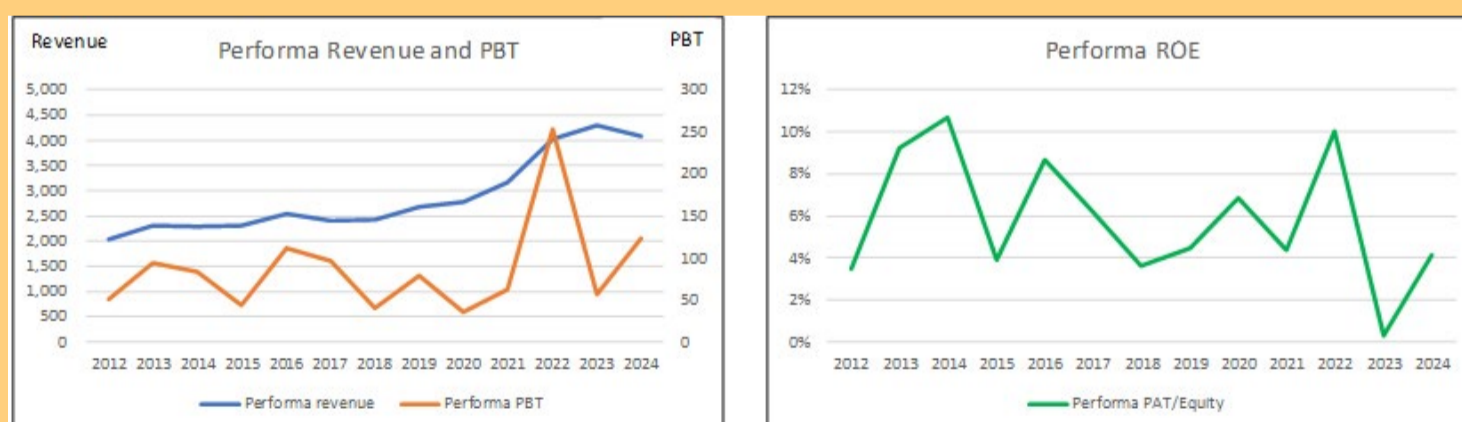

Chart 2: Performance

To understand what drove accounting ROE, I decomposed it into tax yield, PBT margin, and equity turnover. The analysis shows that the primary drag has been declining equity turnover, while tax yield and

PBT margins remained relatively stable except for the temporary 2021-2022 spike linked to the Tyson transaction.

This suggests that operational and capital efficiency improvements are essential for enhancing returns, particularly given MFM's modest revenue growth outlook. But when I examined several efficiency indicators, the results were mixed:

- **Operating efficiency:** ROA and inventory turnover have trended down since 2012, despite improvements in operating margins and expense ratios.
- **Capital efficiency:** From 2012 to 2024, reinvestment margins and the cash conversion cycle improved overall. Post-2020, asset turnover and gross profitability appeared stronger, though the cash conversion cycle worsened.

Overall, MFM still has substantial room to improve efficiency if it aims to deliver returns above its cost of equity and create shareholder value.

## **GROWTH CHALLENGES**

The modest single-digit pro forma revenue and profit growth reinforce the view that MFM is a mature business, operating within equally mature sectors. Industry research supports this.

Cognitive Market Research estimates the Southeast Asia flour market to grow at 7% CAGR to 2024, while Malaysian consumption trends for wheat flour and poultry also reflect steady rather than high-growth dynamics.

Although MFM stated in its 2023 Annual Report that it remains committed to expanding its flour, poultry, and aqua feed operations, double-digit growth appears unlikely. The Group's historical expansion has been largely organic or via joint ventures, with little M&A activity over the last two decades.

Sustaining growth requires reinvestment (Reinvestment/NOPAT). I defined reinvestment as = CAPEX & acquisitions – depreciation & amortisation + change in net working capital,

The Group recorded an average reinvestment rate of 118% over the past 13 years. Such a level is difficult to sustain long-term and likely reflects low NOPAT rather than aggressive expansion.

Going forward, MFM will need to either lower reinvestment requirements or lift NOPAT through better returns and efficiency improvements if it wants to grow without diluting value.

## PEER COMPARISON

I compared MLM's performance with several other Bursa companies in the flour and poultry businesses. **Refer to Table 1.** You can see that MFM had an average revenue in 2023, with the lowest revenue growth rates over the past 12 years.

Company	Revenue		Business
	2023 RM m	2012 to 2023 CAGR %	
Malayan Flour Mill (MFM)	3148	4.1%	Flour & poultry
PPB Group (PPB)	5721	6.0%	Flour & poultry, agri
QL Resources (QL)	6243	11.2%	Poultry, aqua farming
CAB Cakaran (CAB)	2246	14.0%	Poultry, food
PWF Corp (PWF)	557	9.1%	Poultry

**Table 1: Peer Revenue**

I looked at the trends of 4 metrics to get a sense of how well MFM performed compared to its peers. The overall picture is that MFM had an average performance:

- MFM had an average return on capital and EBIT margin.
- It had better-than-average EPS.
- MFM was one of the two companies with a very volatile levered free cash flow margin.

## FINANCIAL POSITION

While there were some positive points when it came to the financial position, I have some concerns. The positive points included a good solvency position.

As of Jun 2025, it had RM381 million in cash. This is equal to 15% of its total assets.

From 2012 to 2024, it generated positive cash flow from operations for 10 out of the 13 years. During this period, it generated RM1.2 billion cash flow from operations compared to the total PAT of RM0.9 billion. This is a good cash flow conversion ratio.

It had a Debt Capital ratio of 0.39 as of Jun 2025. This has come down from its 2018 high of 0.56.

My concerns include the following:

Item	Sources RM m	Uses RM m
Cash flow from Ops	1,158	
New shares	310	
Net Debt	661	
Acquisition		7
CAPEX		1,385
Dividends		441
Buybacks		0
Misc		296
<b>Total</b>	<b>2,130</b>	<b>2,130</b>

Table 2: Sources and Uses of Funds 2012 to 2023

- I had already mentioned that its reinvestment rate was unsustainable;
- It did not have a good capital allocation plan. **Refer to Table 2.** The cash flow from operations was not sufficient to fund its CAPEX.

Overall, the company's financial standing is best categorized as moderately strong. The concerns regarding reinvestment and capital allocation prevent it from being classified as strong.

## VALUATION

I adopted the following picture in valuing MFM:

- Its Poultry integration operations are treated as non-operating.
- I assumed the 2022 to 2024 average revenue as the base. This is a mature company with a revenue growth rate at a long-term GDP growth rate of 4%.
- The Group reinvestment rate would improve proportionately to be at a sustainable rate of 44% in the terminal year.
- The ROIC would improve from the 2022 to 2024 average of 3.5% to the past 13 years' average of 4.6% in the terminal year.
- The tax rate would be based on the 2022 to 2024 average tax rate.

On such a basis, I estimated the intrinsic value of MFM to be RM0.95 per share. The market price of MFM as of the end of Jun 2025 was RM0.53 per share. There is more than a 30% margin of safety. **(Refer to the original article for details of the valuation).**

## CONCLUSION

MFM is a mature, steady operator in a slow-growing sector. Its flour and grain trading business remains the core earnings driver. While the poultry integration venture enhances scale, the deconsolidation post-2021 means reported results no longer fully reflect its economic footprint.

When viewed on a pro forma basis, revenue and PBT have grown at mid-single-digit rates over the past decade, but returns have not kept pace. Both ROE and ROIC have hovered well below the estimated cost of capital, suggesting that long-term value creation has been limited despite operational expansion.

The fundamental challenge is efficiency. MFM's capital and operating metrics show only incremental improvement, and equity turnover has been the key drag on ROE. With reinvestment needs historically exceeding NOPAT, the business must either lift profitability or rationalise reinvestment intensity if it wants to compound value sustainably.

Financially, the balance sheet is sound with healthy liquidity, manageable leverage, and solid operating cash conversion. However, capital allocation has not been optimal, and reinvestment efficiency remains an unresolved issue.

In summary, MFM is not a high-growth compounder today. But it is an asset-rich, regionally entrenched business available at a discount.

*I am a long-term value investor who has held onto stocks for more than 5 years. My analysis and valuation are from such a perspective. I consider quarterly results "noisy" and focus on long-term trends.*

*This article was derived from a detailed analysis, emphasizing the intersection of business performance and valuation metrics, which was first published on i4value as ["Is Malayan Flour Mill an investment opportunity?"](#) Refer to the article for further insights on its investment risk vs business performance.*

# Growing List Of Companies Included In The FTSE4GOOD Bursa Malaysia Indices

**B**ursa Malaysia Berhad has announced 26 inclusions to the constituents of the FTSE4Good Bursa Malaysia (F4GBM) Index and 24 inclusions to the constituents of the FTSE4Good Bursa Malaysia Shariah (F4GBMS) Index. The F4GBM Index measures the performance of PLCs with strong Environmental, Social and Governance (ESG) practices. The F4GBM Index constituents are drawn from PLCs within the FTSE Bursa Malaysia EMAS Index, comprising eligible PLCs from small, medium, and large market capitalisation segments.

Separately, the F4GBMS Index tracks the constituents in the F4GBM that are Shariah compliant, in accordance with the Shariah Advisory Council screening methodology. Both indices are reviewed semi-annually in June and December, against established, globally recognised criteria used by FTSE Russell. For the December 2025 review period, there are 26 inclusions and 6 exclusions from the F4GBM Index, bringing the total number of constituents to 180. Meanwhile, the F4GBMS Index will see 24 inclusions and 10 exclusions, bringing the index's constituent count to 139. All constituent changes will take effect at the start of business on 22 December 2025 (Monday).

**For full details of the changes to the aforementioned indices in the most recent review, please [click this link](#).**

# Malaysian REIT earnings beyond seasonal 4Q uplift to be boosted by asset injections, improved occupancy — HLIB

**A**ccording to Hong Leong Investment Bank (HLIB), Malaysia's retail and hospitality-focused real estate investment trusts (REITs) are expected to be boosted by enhanced portfolios beyond the seasonal uplift in 4Q2025, driven by year-end festivities and school holidays.

HLIB expects sector earnings to be underpinned by company-specific strategies such as asset injections, tenant remixing, and improving occupancies. From 4Q2025 onwards, REITs with recently completed acquisitions should see stronger contributions.

It said IGB REIT's earnings will be supported by the injection of Mid Valley Southkey, completed in November. Also, several near-term acquisition pipelines are worth monitoring, including Paradigm REIT's plans to inject Hyatt Place Johor Bahru Paradigm Mall, Le Méridien Petaling Jaya, and Premier Hotel Klang valued at around RM500 million and targeted for the second half of 2026. And AmanahRaya REIT acquired an industrial building in Telok Panglima Garang, Selangor, for RM39 million.

HLIB also noted that UOA REIT had announced plans to acquire Tower 2A, Tower 2B, and a car park facility at UOA Business Park in Glenmarie, Shah Alam, for a total purchase consideration of RM200 million.

Furthermore, HLIB added that the positive tourism outlook and the Visit Malaysia 2026 campaign should further support footfall, tenant sales and hotel performance, particularly for Pavilion REIT, KLCC Stapled Group and Sunway REIT.

The research house noted that overall, REITs delivered stable earnings and showed strengthening fundamentals in 3Q2025, supported by improving occupancies and firmer rental performance. It highlighted that the sector is trading near a +1 standard deviation yield spread above its five-year average, driven by a more than 30-basis-point y-t-d decline in 10-year Malaysian Government Securities yields.

HLIB noted Sunway REIT's hotel occupancy climbed to 76% in 3Q2025, supported by higher average daily rates. This drove an 11.8% q-o-q increase in hotel revenue, its highest since listing, on strong meeting, incentive, conference and exhibition (MICE) demand. Quarter-on-quarter earnings across the sector were largely flat due to limited seasonality in the office and industrial segments and the non-festive retail period. Pavilion REIT stood out, posting a 6.8% q-o-q increase on a full-quarter contribution from Banyan Tree Kuala Lumpur and Pavilion Hotel Kuala Lumpur.

HLIB added that there were signs of a gradual recovery in the office segment, with higher occupancies and sustained positive rental reversions reported across most REITs despite the continued oversupply in the Klang Valley.

HLIB maintained its 'overweight' call on the REIT sector, and named Sunway REIT as its top pick, while Pavilion REIT is its second, replacing Axis REIT.

# Top Glove Delivers 680% Surge In 1QFY2026 Patami, Continuing FY2025 Growth Momentum

**T**op Glove Corporation Berhad announced its financial results for 1QFY2026 ended 30 November 2025, extending its positive uptrend to start FY2026 on a robust note. For the period, the Group delivered Sales Revenue of RM884 million despite a challenging and competitive environment. Its Profit After Tax and Minority Interest (PATAMI) soared to RM39 million, an impressive growth of 680% y-o-y reflecting the Group's continued operational discipline following a successful return to profitability in FY2025. Meanwhile, Sales Volume grew by 17% compared with the corresponding period in FY2025.

The Group's strong performance in 1QFY2026 was primarily driven by robust Sales Volume growth across key markets, and particularly in the United States. Sales Revenue was softer despite the increase in Sales Volume mainly due to lower average selling prices (ASPs), in line with declining raw material costs as well as the impact of a stronger Ringgit versus the US Dollar. However, higher plant utilisation contributed to improved cost efficiency and economies

of scale, further supported by quality, cost optimisation measures, strategic marketing initiatives and organisational realignment efforts.

While raw material prices declined, Top Glove shared part of the cost savings with customers, demonstrating pricing strength and long term customer focus. Additionally, foreign exchange impacts were offset by lower raw material costs, and the Group continues to hedge forward its USD requirements towards mitigating foreign exchange volatility risks.

According to Lim Cheong Guan, Managing Director of Top Glove, the strong start to FY2026 builds on the sustained momentum from last year, and marks a significant milestone: the restoration of EBITDA margins to pre pandemic levels. The vastly improved performance is testament to the unwavering focus on optimising quality and cost efficiency, while meeting customers' needs even as glove demand continues to recover steadily.

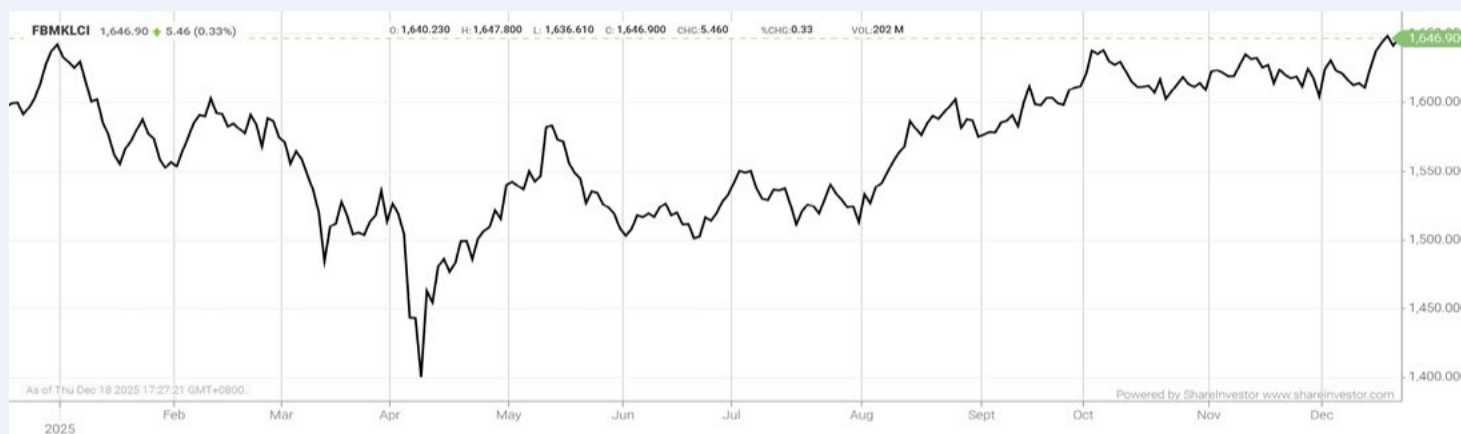

Tan Sri Dr. Lim Wee Chai, Executive Chairman of Top Glove said, "We are proud of the progress we have made and the strong, healthy foundation we have built for the future. While we continue to navigate a challenging global landscape, we remain committed to quality, cost efficiency and good customer service. With the dedication of our team and the trust of all our stakeholders, we are confident that Top Glove will continue to grow responsibly and deliver positive impact for years to come."

### **Note From Publisher:**

## FAMILY FEUD OR A GENUINE PUSH FOR CHANGE?

In a move that marked more than just a routine board change, shareholders at Greenyard Berhad's Extraordinary General Meeting (EGM) on 12 November 2025 voted to remove its Non-Independent Non-Executive Chairman, Tham Foo Keong, and appoint seven new directors.

In a move that marked more than just a routine board change, shareholders at Greenyard Berhad's Extraordinary General Meeting (EGM) on 12 November 2025 voted to remove its Non-Independent Non-Executive Chairman, Tham Foo Keong, and appoint seven new directors.

The decisive vote of all eight resolutions goes beyond a simple leadership reshuffle. This outcome sends a clear message: the status quo is no longer acceptable, and change is needed to restore confidence and move the business forward. It reflects growing

frustration among shareholders and a call for stronger governance at a company with deep roots, founded in 1937.

Yet, beneath the votes lies a deeper and more complicated question. Is this truly a reform or simply a façade masking the long-simmering family feud within the Tham founding family?

## A VOTE FOR CHANGE, OR SOMETHING ELSE?

Founded by the Tham family in 1937, Greenyield started as a small rubber estate and grew into a diversified group producing agricultural and horticultural products.

The strain among brothers reared its ugly head when three uncles - Chong Sing, Foo Choon (the incumbent Deputy Non-Executive Chairman), and Fau Sin, attempted to remove Foo Keong's son, Kin-On from his role as Group CEO and other positions within the Group.

Kin-On was appointed to the Board on 20 December 2016 as an Executive Director. He was redesignated as the Group CEO on 12 February 2025. On 8 September, a requisition notice was served to Greenyield, seeking Kin-On's removal and proposing the appointment of three new directors - including his cousins, Kinyiq and Kin Wai.

The Board rejected the requisition on 17 September, citing the resolutions as "unclear and not in the best interest of the Company". Yet in an unexpected move, Kin-On resigned two days later, citing personal reasons.

But the coup d'état did not end. Instead, it marched on.

On 30 September, a new requisition notice was served to Greenyield. This time, it was from four parties, including Chong Sing, calling for the removal of Foo Keong and three independent directors, along with the appointment of seven new directors.

The next day, all three independent directors resigned. Thereafter, a Special Notice issued on 9 October withdrew the earlier resolutions related to the three departing directors. The showdown culminated in the 12 November EGM, where shareholders approved the sweeping Board changes.

The spectacle of four brothers embroiled in a contest for corporate control naturally attracted public attention.

For many, the ousting of Foo Keong appeared to reflect shareholders' desire for accountability and renewal. Yet the events leading up to the EGM suggest that the Company is deeply entangled with internal family rivalries, raising doubts about the true motivation behind the power shift.

So was this Board overhaul driven by a genuine push to improve governance and performance, or was it merely a family feud cloaked in the language of corporate reform?

### SHAREHOLDERS' CALL FOR A FRESH START

While the internal rift provided a dramatic backdrop to the unfolding events, the voting outcome cannot be explained by family dynamics alone. Beneath the conflict, a broader and more deep-seated frustration had been building among minority shareholders over the Group's prolonged underperformance and lack of strategic direction. These sentiments formed an important undercurrent that shaped the outcome of the EGM and ultimately converged with the internal for change, converging with the internal dispute.

#### GREENYIELD COUP D'ÉTAT

##### 8 Sept 2025

Shareholders holding at least 10% of Greenyield's issued share capital, including three Tham brothers, called for an EGM to remove Tham Kin-On (Group CEO) as a director of the Company, and the appointment of three new directors, including two Tham family members.

##### 17 Sept 2025

Greenyield rejected the request to hold EGM, saying the resolutions were "*unclear and not in the best interest of the Company*".

##### 19 Sept 2025

Kin-On resigned as a director of the Company.

##### 30 Sept 2025

A new requisition notice was served to Greenyield, calling for the removal of Tham Foo Keong and three independent directors from the Board, as well as the appointment of seven new directors.

##### 1 Oct 2025

All three independent directors resigned.

##### 9 Oct 2025

Requisitionists issued a Special Notice, withdrawing the earlier resolutions related to the three departing directors.

The resolution on Foo Koeng's removal stayed.

##### 12 Nov 2025

Foo Keong was ousted, and seven new directors joined the Board.

MSWG raised a key question at the EGM, questioning the rationale for the removal of Foo Keong. The comment pointed to broader concerns about whether the decision was necessary or part of a power shift without a clear strategic reason.

The faction behind the move indicated that the decision reflected broader shareholder concerns:

- Business growth and turnover remained stagnant. There was no visible recovery plan in place. In FY2024, Greenyield recorded a lower revenue of RM37.40 million, down 3.76% from RM38.86 million in FY2023. The Company posted another year of loss at RM5.16 million, 48.08% lower than the previous year's loss of RM9.94 million. It continued to post losses in the first nine months of FY2025.
- Over an extended period, Greenyield did not declare dividends — disappointing shareholders' returns. The Company last declared a single-tier final dividend of 0.30 sen per share in FY2021. Share prices fell from above 30 sen in 2021 to 17.5 sen currently. It was traded at a discount of 6 sen against its net asset per share of 23.45 sen.
- Minority shareholders felt the company lacked strategic clarity and that the Board was unable to deliver improvements.

MSWG gave Foo Keong a final chance to speak before the vote. After years of weak performance and growing frustration, it was unclear if anything Foo Keong said could shift the outcome or if the decision to move on had already been made.

Foo Keong defended his performance, citing the lingering effects of the post-pandemic market and global overstocking that had pressured prices and weakened competitiveness. While his explanation acknowledged external challenges, his response failed to restore confidence.

In the end, the vote reflected shareholders' clear desires for a fresh start to restore performance and confidence.

## NEW BOARD, BUT LIMITED TRANSPARENCY ON CREDENTIALS

Foo Keong's departure signalled a major shift for Greenyield. In his place, seven new directors were brought in. While the appointments were welcomed in principle, the process itself raised red flags.

Shareholders were expected to vote on the new board appointments with little to no information. No advanced profiles were provided. No formal introduction to their experience, qualifications, or relevance to Greenyield's strategy was shared ahead of the vote.

Sensing the gap in disclosure, MSWG urged the Board to provide a summary of each proposed new director's professional background and qualifications and explain how their experience fits with the company's current needs and future plans - a basic expectation in any board appointment process.

The Board's response offered little reassurance. It stated that all nominees had submitted statutory declarations and were considered fit and proper but provided no further details on experience, track record and industry expertise.

For a company seeking to rebuild trust and reset its direction, this opacity undermines the very confidence the board reset was meant to restore. Introducing these candidates only during the EGM, with no time for meaningful evaluation, left shareholders in the dark. While the Board later committed to disclosing the directors' backgrounds after the meeting, many believe that commitment came too late.

Now, with the new board in place, attention turns to whether these directors will prove themselves capable, credible or just another symbolic shift.

## THE ROAD AHEAD

Refreshing the Board is only a starting point. It must go hand in hand with a clear and focused operational plan. Shareholders need to see

how the company plans to regain its footing and deliver meaningful value in the months ahead.

Without timely and transparent updates, there's a risk that this significant milestone exercise could lose credibility. The new Board now carries the responsibility not just to lead but to act, communicate, and deliver results that justify shareholders' call for change.

The EGM demonstrated that minority shareholders can influence board composition. Yet, the proceedings of the meeting also revealed significant gaps in disclosure and transparency, amid the complicating backdrop of family rivalries, highlighting a reactive approach to governance.

A change of face alone will not guarantee success. The new Board must implement credible strategies, rigorous governance and clear communications to build confidence among shareholders.

In the coming months, investors and stakeholders will be watching closely to see whether Greenyard can translate this boardroom reset into tangible improvements in performance and accountability – or whether internal conflicts and old patterns will continue to shape the outcomes behind fresh names.
