EPF records RM17.33b in gross investment income for Q3

The Employees Provident Fund (EPF) recorded a gross investment income of RM17.33 billion for the third quarter ended Sept 30, amid continued volatility in the capital markets in an operating environment overshadowed by the Covid-19 pandemic. For the quarter, equities contributed RM7.29 billion or 42% to total gross investment income, while fixed income instruments, registered RM8.18 billion. Real estate and infrastructure, as well as money market instruments, contributed RM1.63 billion and RM230 million, respectively. Net investment income came in at RM16.87 billion. According to CEO Alizakri Alias, the year has seen great volatility in the financial markets which saw very rapid movements from one extreme to the other. EPF's financial positions over the first three quarters have been affected by the volatility in market sentiments exacerbated by the uncertainties of the pandemic and continued fragile consumer sentiments. As at end-September, investment assets stood at RM941.77 billion, of which 68% was allocated to the domestic market while 32% was allocated to the overseas markets, which contributed 45% to gross investment income for the third quarter. By asset class, fixed income instruments made up 49% of investments while equities comprised 39%. Money market instruments and real estate and infrastructure made up 7% and 5% respectively of investments. Looking ahead, although EPF is guided by its strategic asset allocation, much depends on rapid and effective responses to the pandemic that must address the massive impact to the economy and ensuring the continuity of businesses, jobs and lives. For Malaysia, as a trade-dependent country, the continued uncertainties surrounding the global economic recovery will have an impact on external demand which may then affect the job landscape and curb domestic economic activities.

Bank Islam is M'sia's best Islamic bank

Bank Islam Malaysia Bhd has been named as Malaysia's Strongest Islamic Retail Bank for 2020 by the Cambridge International Financial Advisory (Cambridge IFA) at the sixth Islamic Retail Banking Award 2020, held virtually on Dec 15, 2020. According to CEO Mohd Muazzam Mohamed, this was the second time that the bank had received the award, which it had won for the first time back in 2015. The recognition shows the bank's readiness to become the first and only listed Islamic bank in Malaysia and the region. It will continue to innovate

Bank Negara foreign reserves up

Bank Negara's international reserves rose US\$400mil to US\$105.7bil over the two weeks to Dec 15. Its reserves position is sufficient to finance 8.8 months of retained imports and is 1.2 times total short-term external debt. The main components of the international reserves comprised foreign currency reserves

at US\$96.7bil, International Monetary Fund reserves position (US\$1.4bil), Special Drawing Rights (US\$1.1bil), gold (US\$2.4bil) and other reserve assets (US\$4.1bil).

Outlook for oil & gas sector to brighten as Covid-19 vaccine rollouts boost hopes of economic

According to PublicInvest Research (PIVB Research), recent positive developments on Covid-19 vaccines give hope for a better outlook for the oil & gas sector (O&G), suggesting that the worst is most likely over. In the year ahead, it expects oil prices to average US\$45-50 (RM183-203) per barrel. Though it could touch between US\$55 and US\$60 per barrel particularly towards 2H'21, subsequent to the progressive recovery in demand, supply controlled by Opec+ members as well as positive development of Covid-19 vaccines giving a boost to the market sentiment as a whole. On the vaccine front, with the vaccine being more readily available for usage, albeit gradually given limited production capacities, global economies will slowly return to normal as travel restrictions will be lifted. In turn, this will help prop up prices again and increase demand for energy and simultaneously lift hopes for a travel industry recovery next year as sentiment improves, thereby increasing jet fuel consumption. Furthermore, the recent Opec+ meeting had agreed on an increase of 500,000 barrels per day (bpd) in production. This will bring total production curbs at the start of 2021 to 7.2 million bpd. Although the decision missed market expectations of a further extension of the 7.7 million bpd through to March at least, it is still deeper than earlier numbers agreed upon in the first meeting in April this year of a 6 million bpd cut through to April 2022.
