Malaysia's Real GDP projected to grow at a rate of 9% in 2021

By Stella Goh

On Monday (13Apr), the FBM KLCI shed 1.47 points or 0.11% from previous Friday's close of 1357.50 but reversed the trend to continue to surge up to 1386.53 on Thursday (16Apr). As at Friday (17Apr) 10:00 am, the FBM KLCI continued its strong upward trend to 1407.93.

Malaysia has the highest household debt to Gross Domestic Product (GDP) in Asia and has exceeded several high-income nations including United States (66%) and Japan (59.3%). According to Ambank Group's Chief Economist Anthony Dass, the GDP outlook for 2020 will be much slower balancing between technical and full-fledged recession that will cause an increase in household debts. Ambank's sensitivity analysis shows household debts against GDP could range between 82.3% and 88.6% this year and GDP to range between 0.4% to -2%. The relief measures unveiled by the government and central bank are expected to provide some short-term relief to the households.

According to the International Monetary Fund (IMF), it has projected Malaysia's real gross domestic product (GDP) to grow at a rate of 9% in 2021, the fastest among the Asean-5 countries which are expected to see a combined GDP growth of 7.8%. Besides Malaysia, the Asean-5 countries include Indonesia, Thailand, Philippines, and Vietnam which are set to expand by 8.2%, 6.1%, 7.6% and 7% respectively. IMF also forecasts Malaysia's economy to contract 1.7% as the Asean-5 countries' GDP shrinks 0.6% in 2020. The global growth is expected to rebound to 5.8% in 2021, reflecting the normalization of economic activity from a very low level. However some aspects that underpin the rebound may not materialize and the outcomes could be far worse depending on the course and extent of the Covid-19 pandemic.

Malaysia's Industrial Production Index (IPI) climbed 5.8% in February to a two-and-a-half-year high but it is unlikely to be sustained due to the Covid-19 pandemic. It results from an expected weak

global demand coupled with supply chain disruption and factories closing temporarily during the Movement Control Order (MCO) periods. According to Malaysian Industrial Development Finance (MIDF), the outlook for the first half of year will be cloudy with major and emerging economies' IPI remaining sluggish. Movement Control Orders and lockdowns in major economies such as US, Europe and Asia will impede global demand and exports. The plunge in global crude oil prices would also add pressure on the oil-exporting economies such as Malaysia, Australia, and Saudi Arabia. As a result of the gloomy outlook, MIDF is expecting the country's IPI to contract in 1Q and 2Q of 2020. It has reviewed its IPI forecast from 1.5% to -2.8% y-o-y for 2020.

The International Monetary Fund (IMF) in its recent World Economic Outlook April 2020 that was launched on Tuesday (14Apr), projects that Malaysia's unemployment rate to spike to 4.9% in 2020 before easing to 3.4% in 2021. The labour force will be affected in 2Q2020 because many companies and particularly SMEs have been buffeted by both external headwinds and the internal MCO and its extensions. However MIDF maintains its confidence that the jobless rate will remain below 4% for the whole year of 2020 as some of the stimulus measures announced by government may moderate the pressure.

This week, the Ringgit has weakened against USD to 4.3668 on Thursday (16Apr) from 4.3283 on Monday (13Apr).

Supermax Corporation Berhad (7106)

By Stella Goh

OVERVIEW

Supermax Corporation Berhad (SUPERMX) was founded by Dato Seri Stanley Thai and his wife Datin Seri Cheryl in 1987 and is headquartered in Sungai Buloh, Selangor. SUPERMX is primarily involved as a manufacturer, distributor and marketer of high-quality medical gloves.

SUPERMX was listed on Bursa Malaysia Main Market on 4 August 2000. The company produces up to 24 billion pieces of gloves per year, meeting approximately 12% of the world's demand for latex examination gloves. Currently SUPERMX has 12 manufacturing plants based in Malaysia equipped with state-of-the-art machinery, energy savings biomass system and a research and development centre.

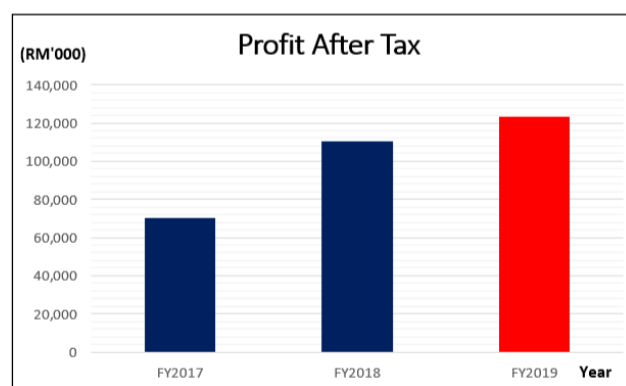

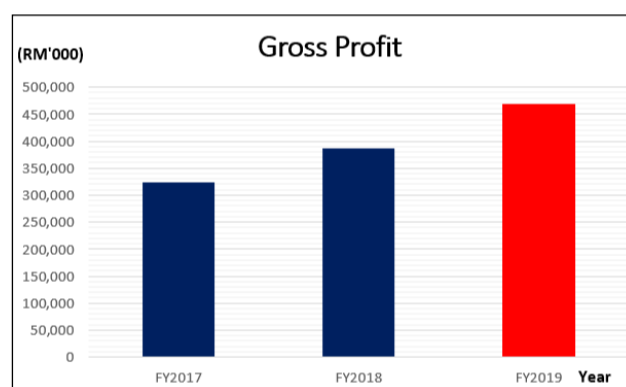

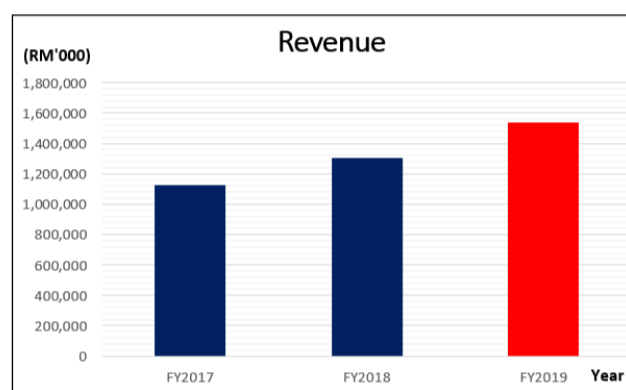

BUSINESS MODEL

SUPERMX produces various types of natural rubber and nitrile latex gloves to over 165 countries such as the USA, European Union, Middle East, Asia and South Pacific countries. The company is also involved in trading of latex gloves, generation of biomass energy, trading and marketing of healthcare products, medical devices and property holdings activities.

As Malaysia's very first home-grown contact lens manufacturing company, SUPERMX has obtained the necessary license and approvals to export its products to over 60 markets globally, including the USA and Japan markets which are two of the largest contact lens market presently. The contact lens brand, namely AVEO is distributed via its own global distribution network located in 8 countries, through joint ventures and appointment of authorized dealers in over 50 other countries as well as via e-commerce online sites in USA, Malaysia and UK. The brands owned by SUPERMX such as Supermax, Aurelia and Maxter are trusted and recognized by laboratories, hospitals, pharmacists, doctors and surgeons around the world.

FINANCIAL REVIEW

SUPERMX has achieved a revenue growth of 17.92% from RM1.304 million in FY2018 to RM1.538 million in FY2019. Based on 3 years of CAGR basis, SUPERMX has a revenue growth of 14.19%.

The increase in revenue was attributed on the back of increased of volume production

arising from its ongoing rebuilding and replacement program as well as the ongoing efforts to fine-tuning and boost operational efficiency and production capacity. The commendable performance was achieved in the face of challenges such as uncertainties caused by the on-going US-China trade war and Brexit, high volatility in raw material costs and increased competition in the global marketplace. Nevertheless, the company is committed to continue working towards maximizing the company's performance and stakeholders' interest and values.

SUPERMX has recorded a RM70.793 million increase in gross profit, translating to a growth of 17.81% from RM397.523 million in FY2018 to RM468.316 million in FY2019. Based on 3 years CAGR, the company's gross profit has grown 8.48%.

The rise in gross profit was due to the increased output from newly commissioned lines at the company's Perak plant under its rebuilding and replacement program, higher average selling prices (ASP) in response to higher raw material prices, a stronger dollar over the course of the year and resilient global demand for the medical gloves.

The Profit After Tax (PAT) rose 11.77% from RM110.142 million in FY2018 to RM123.103 million in FY2019. Based on 3 years CAGR basis, the Profit After Tax (PAT) grew by 8.64% which was in line with the growth in revenue and gross profit.

CASH FLOW STATEMENT

The net cash from operating activities has provided a positive cash flow of RM235.053 million in FY2019 as compared to RM177.188 million in FY2018 indicating that the company is healthy and has enough cash to use for business expansion.

The net cash from investing activities in FY2019 (-RM112.248 million) was mainly due to the purchase of Property, Plant and Equipment (PPE) (RM112.248 million). The negative cash flow indicates that the firm is investing in its business for growth.

The net cash from financing activities in FY2019 (-RM103.973 million) was mainly due to dividend paid (RM32.783 million), repayment of short term borrowings (RM22.322 million), repayment of term loans (RM22.068 million), interest paid (RM19.708 million), purchase of treasury shares (RM7.710 million) and repayment of finance lease payables (RM0.234 million).

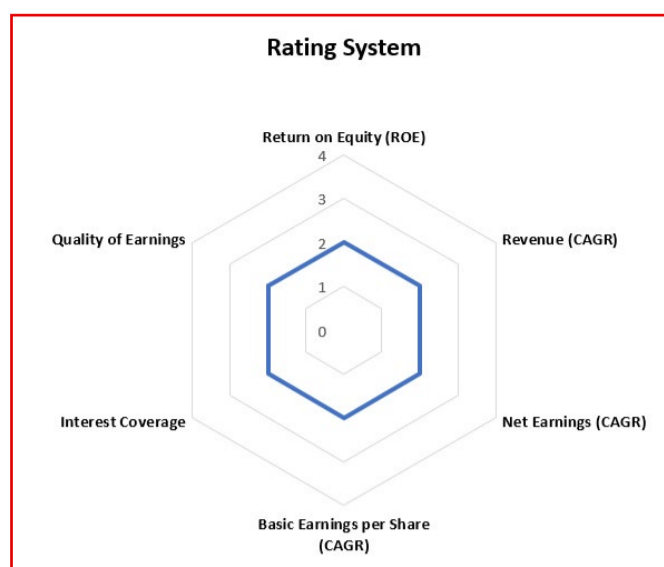

Is the company able to pay back its liabilities?

Based on the liquidity ratio calculation, SUPERMX has a current ratio of 1.056 times in FY2019 indicating that the company does not face any liquidity issue as it is capable of paying back its liabilities (RM601.868 million) if any unforeseeable circumstances occur. SUPERMX is able to do so by using current assets such as inventories, receivables, tax assets, amounts owing by subsidiaries, amounts owing by associates, cash and bank balances amounting to RM635.712 million.

PROSPECT AND CHALLENGES

SUPERMX's wholly owned subsidiary Maxter Glove Manufacturing Sdn Bhd has entered a RM20 million sale and purchase agreement (S&P) with Nishimen Industries (M) Sdn Bhd to acquire the industrial land measuring 16,654 square metres in Kapar. The proposed acquisition was for future expansion of its manufacturing capacity in a strategic location near its existing cluster of manufacturing plants (Plant No.12), which will facilitate the management control, operational synergies and efficiency.

Towards end of 2019, the company has completed the acquisition of land in Meru, Klang on which it plans to build Plant #13, #14 and #15 that will contribute another 13.2 billion pieces of gloves to the group's installed capacity over the next five years up to year 2024. SUPERMX also plans to build a new manufacturing plant (Plant 16th) over the next few years, which will increase the production capacity by about 4.5 billion pieces per year.

For the contact lens business, the revenue is on the rise as SUPERMX continues to spend on advertising and promotions and managed its costs well. Even though this venture on the whole is not quite contributing to the company's performance yet, it is becoming less of a strain on its performance which is positive for the company. SUPERMX will continue to work to obtain all the necessary licenses and approvals in order to export the products to more countries across the world. The company has spent over RM100 million to-date on this venture and remains optimistic and confident that over the medium to long term, it is building a business that will be value enhancing to all stakeholders.

Price Over 3 Years

MY INSIGHT

Based on the calculation of Discounted Earnings Model, SUPERMX has an intrinsic value of RM2.292. The current share price of SUPERMX is RM1.89 which makes it a fair value stock (as at 16 April 2020). SUPERMX has a beta of 1.034 (500 days) indicating that the share

price is more volatile than current market. Based on the computation of Compound Annual Growth Rate (CAGR), SUPERMX has an expected market return of 0.86%.

In conclusion, SUPERMX has achieved a strong performance in FY2019 with the highest revenue, gross profit and profit after tax over the past 3 years. The company's prospect remains bright as the company continues to expand its manufacturing capacity via acquisition, which enables the company to grow its business to ultimately accrue long-term benefits. The demand growth is expected to continue particularly in the near-term given the ongoing COVID-19 pandemic across the globe.
