# Expected headline inflation spike doesn't warrant monetary policy response - Bank Negara governor

According to Bank Negara Malaysia (BNM) governor Datuk Nor Shamsiah Mohd Yunus, the expected headline inflation spike to above 5% in the second quarter this year due to a low base of -1.2% seen in the previous corresponding quarter does not warrant a monetary policy response. This increase reflects supply-driven inflation and as long as there are no second round effects, the current assessments find that wage pressures are not excessive. Monetary policy responses by the bank have always been forward looking. For the year ahead, the central bank expects headline inflation to average between 2.5% and 4%, in line with higher global oil prices and lapse of the tiered electricity tariff rebate that was introduced last year. One of the key indicators monitored by BNM is the underlying inflation, which is expected to remain subdued with core inflation to average between 0.5% and 1.5%. Headline inflation is expected to rise further in March and will temporarily spike above 5% in the second quarter, contingent on the price of RON95 remaining capped at RM2.05 per litre. In contrast, the headline inflation for the second quarter of last year stood at -1.2%. Given the RON95 price ceiling which has been in place since Feb 10, the rise reflects the domestic base effect, taking into consideration the much lower domestic fuel prices observed last year and not to demand pressure. The spike will be temporary and headline inflation is expected to moderate thereafter noting that rising inflation due to higher energy cost is also playing out in the UK, Euro area as well as the Philippines. Moving forward, the monetary policy will take into account the temporary increase in headline inflation, the implications from the strength of economic recovery and developments related to Covid-19 on the overall outlook for inflation and domestic growth respectively. The last time BNM had resorted to monetary policy measures was on July 7, 2020 which resulted in a 25 basis points cut to the overnight policy rate, citing a weak global economic condition and a projected negative global. The central bank's next monetary policy meeting is scheduled for May 6, 2021. The higher global oil prices will result in a higher revenue collection for the Malaysian government on the back of a conservative oil price assumption adopted in Budget 2021. In the budget, the finance ministry assumed global oil prices will average at US\$42 per barrel compared to the current level of around US\$60 per barrel.

## Brighter second-half property market outlook with economic recovery

According to REHDA president Datuk Soam Heng Choon, local developers are more optimistic about the outlook of the property market in the second half of 2021 than the first six months of the year, on the expectation that an impending economic recovery will spur buying sentiment. In a survey of 134 respondents by the Real Estate and Housing Developers' Association (REHDA), it was revealed that 20% are optimistic about the property market and sales performance in 2H2021, compared with just 8% in 1H 2021. The survey also showed that 26% are optimistic about residential sales growth in 2H, compared with just 8% in 1H. The global vaccine rollout will

improve the country's economic outlook, which will in turn spur the local property sector. With more countries recovering from Covid, trade will improve and this will boost the economy. When the broader economy recovers, the property market will as well. Additionally, the ongoing Home Ownership Campaign (HOC) is a much-needed boost to the property market. REHDA hopes that the HOC, which tentatively ends on May 31, will be extended until the end of the year. Since it was introduced on June 1, 2020, a total of 34,354 residential units valued at RM25.65bil have been sold as at Feb 28, 2021. According to REHDA's property industry survey for 2H 2020 and market outlook for both 1H and 2H 2021, a total of 13,037 units are being planned for launch in 1H of 2021, consisting of 12,874 residential units (6,998 strata units and 5,876 landed units) and 163 commercial units. Amongst respondents with future launches, the majority of them (83%) anticipate their sales performance to be 50% and below for the first six months of this year. The survey revealed that Kedah, Perlis, Negri Sembilan, Pahang and Selangor planned to launch residential units within the RM250,001 to RM500,000 price range, whereas Johor, Penang and Wilayah Persekutuan aimed to offer units priced between RM500,001 and RM700,000. Additionally, respondents were neutral about the economic and business outlook, as they were concerned about consumers' purchasing power in 1H 2021. The same was reported with the property industry outlook, specifically with regards to residential sector growth. However in both cases, there is increased optimism for 2H of 2021.

## A Week of Losses

### Markets

In a rather bizarre move, more than US\$20bil worth of equity positions in several companies via block trades on selected stocks were carried out by several brokers in the US last Friday and into early this week. These suspicious transactions again brought to question the opaqueness of some of the over the counter trades that occur especially in relation to derivative products or swaps. Although the forced selling activities were targeted to certain individual stocks, it was fortunate it did not result in a contagion move to the market as a whole. Talking about markets, President Joe Biden's plan of rolling out an infrastructure plan costing as much as US\$2.25 trillion is seen positive, although it may come at a price in terms of higher taxes.

In other news, Malaysia finally closed the chapter on the High Speed Rail (HSR) to Singapore, well, at least for now, with a final compensation amount of RM320mil. On a positive note, Malaysia has been removed from the FTSE Russell Watch List for potential reclassification of its market accessibility level from "2" to "1" and will retain its membership in the FTSE World Government Bond Index (WGBI). At the same time, FTSE Russell also announced the inclusion of China in the WGBI, giving that market a 5.25% weight on the index, with the inclusion to be phased-in over a 36-month period.

### Economy

US economic data was strong this past week as the Conference Board's Consumer Confidence Index surged to 109.7, the highest in a year. Out of China, both the manufacturing and non-manufacturing PMI indicators expanded for the month of March to 51.9 and 56.3 respectively.

Domestically, Malaysia's trade performance for Feb-2021 was impressive as exports surged

by 17.6% y-o-y while imports rose by 12.7%, leaving a wider trade surplus of RM17.9bil for the month. Cumulatively, year-to-date, exports are higher by 11.7% while imports are up by 6.6%, and thus allowing Malaysia's trade surplus for the first two months of the year higher by almost 40% y-o-y to RM34.5bil. In other news, Malaysia's PMI for the month of March rose to 49.9 from 47.7 in the preceding month.

On the property front, the Home Ownership Campaign saw sales of 34,254 units valued at RM25.65bil for the period between June 1, 2020 and February 28, 2021, according to statistics provided by Real Estate & Housing Developers' Association (Rehda).

As the month came to an end, the widely anticipated Bank Negara's (BNM) annual report was released. The central bank has now guided GDP growth for this year at between 6.0% and 7.5% while inflation is now forecasted to average between 2.5% and 4%, mainly due to an anticipated spike in the 2Q due to the lower base effect from last year. The low base effect also caused Malaysia's household debt/GDP to surge to a new record high of 93.3% for 2020. BNM also announced steps to further liberalise foreign exchange policy in order to allow greater flexibility for not only exporters but also to attract foreign direct investments.

### Corporate

Sime Darby finally off-loaded its 10.89% stake held in Eastern & Oriental resulting in the buyer, Amazing Parade Sdn. Bhd. and parties acting in concert triggering a conditional mandatory take-over offer for the remaining shares not already owned at 60 sen per share. AirAsia released its long awaited 4Q 2020 results and as expected, losses widened to as much as RM2.44bil for the quarter while 2020 net loss hit the RM5.1bil mark. Top Glove was also in the limelight this week as the US Customs and Border Protection

(CBP) directed its port authorities at all entry points to begin seizing disposable gloves produced by the company on forced labour practices. Widad, which is basically involved in integrated facilities management services and construction activities, signed a collaborative agreement with Bin Zayed International to jointly develop on a 50:50 basis Widad@Langkasuka in Langkawi with potential gross development value of RM40bil over a period of 15 years. Dagang NeXchange finally entered into an agreement to acquire SilTerra Malaysia from Khazanah Nasional in a deal valued at RM273mil, where the company itself will own a 60% stake while the balance will be held by CGP Fund.

### Equity

In terms of equity market's performance, most markets closed higher across the Asia and developed markets with gains of between 0.6% for the S&P/ASX200 and 3.7% on the Hang Seng Index. Other than the KLCI's 0.9% fall on the week, two other regional markets were also lower with the Jakarta Composite down by 1.8% and the Philippines Stock Exchange PSEI Index easing by 2.1%.

Local retailers remained largest net buyers in the equity market for the period between 25th March to 31st March with net buying interest of RM435.7mil, while local institutions were net sellers of RM214.1mil. For the month of March and year-to-date, local retail net buying interest amounted to RM1.62bil and RM5.37bil respectively, while local institutions are net sellers totalling RM1.58bil and RM3.63bil respectively. This leaves foreign net selling at RM1.73bil for the year-to-date, although the net selling for the month of March narrowed to just RM33.4mil.

## Of ensuring good corporate governance and conduct

The quest to maintain market integrity and good governance by driving accountability among public listed companies (PLC) is a tedious task especially with the COVID-19 pandemic having severe impact on the equity market – from both the financial and corporate governance (CG) fronts. What this means to the market regulator is the need to enhance vigilance with continued focus to strengthen supervision and surveillance to ensure that the capital market operates in a fair and orderly manner while responding to the ongoing health crisis. Below are the excerpts from the Securities Commission's (SC) Annual Report 2020 with regard to SC's aspirations to maintain market integrity and good governance with the interest of minority shareholders in mind:

### Strengthening the corporate governance ecosystem

The Corporate Governance Council was formed to co-ordinate and align CG initiatives among members of the Council and relevant stakeholders. Chaired by the SC, the Council comprises representatives from Bursa Malaysia, Institute of Corporate Directors Malaysia (ICDM), Institutional Investors Council (IIC), Malaysian Institute of Corporate Governance (MICG) and the Minority Shareholders Watch Group (MSWG). The inaugural meeting of the Council was held in April 2020 with the Council's priorities for 2020/2021 identified. The Council also formed a sub-working group to review and streamline existing CG assessments and awards for listed companies.

### Promoting shareholder activism

An Annual General Meeting (AGM) Corporate Governance Checklist for Shareholders was introduced to promote meaningful dialogue between shareholders and the board of directors at AGMs. The CG Checklist was developed in collaboration with the IIC and the MSWG. It guides shareholders on key issues that they may need to consider or raise at an AGM before exercising their voting rights. These relate primarily to resolutions commonly tabled at AGMs such as the appointment of directors, approval of directors' fees and the appointment of auditors.

### Heightened monitoring of trading activities

The SC continues to work closely with Bursa Malaysia to monitor, detect and respond to suspected market abuses relating to prevailing areas of concern. In 2020, the SC

observed a growing trend of PLCs announcing possible ventures into health-related businesses such as gloves, facemasks, and COVID-19 vaccines. Such developments tend to garner exceptionally high trading interest in the shares of those companies. As a result, there were increased risks of market abuse such as insider trading and price manipulation surrounding their announcements and related news flows.

Trading irregularities were promptly detected and prioritised for further analysis. Where elements of possible market abuse are established, such cases were identified for further investigation. Surveillance observations in relation to trading activities by capital market intermediaries also facilitated the SC's supervision over the intermediaries' controls and governance standards.

### Fair and orderly market

To mitigate potential risk arising from exceptional levels of market volatility and global uncertainties, short selling activities covering intraday short selling (IDSS), regulated short selling (RSS) and intraday short selling by proprietary day traders (PDT) were suspended from March to end-April 2020. The suspension did not apply to permitted short selling (PSS) given that PSS is an important market operation tool vis-à-vis market-making activities for products such as exchange-traded funds (ETF). After the SC's continuous review of market conditions, the suspension of short selling was further extended to end of June 2020 and subsequently to December 2020. The phased approach was undertaken to allow greater agility in responding to the uncertain and challenging environment. The extensions were to ensure that excessive speculative activities and downside risks in the marketplace were appropriately mitigated and managed.

### Listed companies with unsatisfactory financial conditions

Acknowledging the difficult economic environment that businesses are operating in, Bursa Malaysia has provided temporary relief to affected listed issuers from being classified as a Practice Note 17 (PN17)/ Guidance Note 3 (GN3) listed issuer. Listed issuers that trigger the Suspended Criteria from 17 April 2020 to 30 June 2021 will not be classified as a PN17/ GN3 listed issuer. PLCs will be accorded the relief from complying with the obligations under paragraph 8.04 and PN17 of the Main Market Listing Requirements (MMLR) or ACE Market Listing Requirements for a 12-month period from the date of triggering the specified

criteria. The PLCs are only required to make an immediate announcement when the specified criteria are triggered and the relief provided. As of 31 December 2020, 13 PLCs have benefitted from the relief measures.

As for listed issuers that triggered PN17/ GN3 criteria other than the suspended criteria or did not have an adequate level of operations (as set out in paragraph 8.03A of the MMLR, known as 8.03A Listed Issuers) between 2 January 2019 and 31 December 2020, Bursa Malaysia has extended the timeframe for submission of the regularisation plan from the existing 12 months to 24 months, with effect from the date when the PLC first announced that it is a PN17/ GN3 listed issuers or 8.03A Listed Issuers. A total of 17 PN17/ GN3/ 8.03A listed issuers have benefitted from such relief measures.

### The conduct of fully virtual general meetings

As part of the relief and support measures for affected listed issuers, the SC and Bursa Malaysia allowed flexibility on the timing of AGMs and the issuance of quarterly and annual reports. Since the issuance of the Guidance and FAQs on the Conduct of General Meetings for Listed Issuers by the SC on 18 April 2020, there were a total of 888 listed issuers that conducted 1,017 general meetings (until 31 December 2020). Of the total, 824 were AGMs, 192 were extraordinary general meetings (EGMs) and one was meeting of unitholders. There were 541 fully virtual meetings while three were hybrid.

### Relief measures on fundraising

The SC together with Bursa Malaysia had announced various regulatory relief measures to ease compliance by listed issuers and facilitate fundraising in a timely and cost-effective manner. A total of 389 companies have benefitted from the various listing fee waivers while 47 companies have announced fundraising exercises under the increased/ new general mandates.

### Stock market participation

In terms of participation rate, non-residents remained net-sellers of local equities with total outflows of RM24.6 billion, as compared to an outflow of RM11.1 billion in 2019. Correspondingly, net buy by local institutional and retail investors increased, amounting to RM10.3 billion and RM14.3 billion respectively. Cumulatively, net buy from retail investors surpassed institutional investors

in 2020 as retailers sought short-term gains in assets offering higher returns, specifically in glove- and technology-related counters which rode on the pandemic wave. Hence, the participation rate for retail investors rose sharply in 2020 to an average of 32.4% in terms of value traded. It was significantly higher than the prior year of 20.8% and the five-year average of 21.4%.

### Surveillance of corporate activities

An important aspect of the SC's surveillance and supervisory function involves the monitoring of announcements and disclosures by listed companies, and financial reporting developments affecting the capital market.

Based on the identified risks and focus for 2020, the SC conducted surveillance reviews into the activities of 229 listed companies. During these reviews, 174 engagements (including physical and virtual meetings) were undertaken with directors, statutory auditors and other parties related to the affairs of the listed companies such as advisers, company secretaries and forensic investigators. Corporate transgressions detected in 2020 included:

- Using fictitious documents to drawdown on banking facilities;
- Channelling of company's asset to another party;
- Issuing misleading announcement to induce share trading;

- Issuing shares to related parties at a price, which was unfavourable to the listed company;
- Entering into asset acquisition agreements at inflated prices;
- Recording fictitious revenue; and
- Failure to disclose material litigation.

### Compliance with anti-corruption policies and procedures

Considering the corporate liability provision under section 17A of the Malaysian Anti-Corruption Commission Act 2009 which came into effect on 1 June 2020, the SC undertook a thematic review covering 255 intermediaries to assess the level of intermediaries' compliance with the requirements on anti-corruption policies and procedures. While the SC's review found that most intermediaries had anti-corruption policies and frameworks in place, there was still room for improvement. These include the adequacy and comprehensiveness of policies and procedures risk assessment, monitoring, and training. The SC noted that 68% of intermediaries had displayed a good overall level of compliance, having an adequate anti-corruption framework. Meanwhile, 19% of intermediaries had a satisfactory level of compliance and 13% requiring enhancements to their anti-corruption framework. Following the thematic review, the SC will be taking the following steps to communicate its observation to the intermediaries and the industry:

- Issuance of supervisory letters to intermediaries, requiring significant enhancements to the framework to ensure relevant gaps are addressed;
- Issuance of communication to the senior management of intermediaries (by regulated activity) to share the specific observations noted from the thematic review; and
- Publication of specific observations and good practices noted from thematic review in the SC's newsletter, The Reporter.

### Regulatory parameters on investment advice

The MCO period saw a sharp increase in trading activity by retail investors. The situation also gave rise to dissemination of investment advice by members of the public on various social media platforms. As the provision of investment advice is a regulated activity under the Capital Market & Services Act (CMSA) 2007, the SC issued the Guidance Note on Provision of Investment Advice on 30 December 2020 to clarify the types of activities that may be tantamount to investment advice, thus requiring a licence from the SC. Conducting the business of offering investment advice without a license is an offence under the CMSA that is punishable with a fine not exceeding RM10 million or imprisonment not exceeding 10 years, or both.
