IMF maintains Malaysia's GDP growth at 6.5% this year

According to the World Economic Outlook (WEO) report by International Monetary Fund (IMF), its forecast on Malaysia's gross domestic product (GDP) growth this year is maintained at 6.5%. Themed "Managing Divergent Recoveries", the report also stated that the country's economy is expected to grow at 6.0% in 2022. The country's unemployment rate is expected to drop to 3.8% this year before going further down to 3.6% in 2022, as compared to 4.5% in 2020. In its Country Report released last month, IMF had projected Malaysia's growth to rebound to 6.5% in 2021, driven by strong recovery in the manufacturing and construction sectors, and the impact of the vaccination rollout in February. Meanwhile, IMF projects the global economy to grow at 6.0% in 2021 and moderating to 4.4% in 2022, after an estimated contraction of -3.3% in 2020. The contraction for 2020 is 1.1 percentage points smaller than projected in the October 2020 WEO, reflecting the higher-than-expected growth out turns in the second half of 2020 for most regions after lockdowns were eased. The projections for 2021 and 2022 are 0.8 percentage point and 0.2 percentage point stronger than in the previous forecast, reflecting additional fiscal support in a few large economies and the anticipated vaccine-powered recovery in the second half of the year. This pace reflects continued adaptation of all sectors of the economy to the challenging health situation. The strength of the projected recovery varied across countries, depending on the severity of the health crisis, extent of domestic disruptions to activity (related to countries' reliance on contact-intensive sectors), exposure to cross-border spill-overs and importantly, effectiveness of policy support to limit persistent damage. Beyond 2022, global growth is projected to moderate to 3.3% into the medium term. Persistent damage to supply potential across both advanced and emerging market economies and slower labour force growth because of population ageing (largely in advanced economies, but also in a few emerging market economies) and necessary rebalancing to a sustainable growth path in China, are all expected to weigh on the growth outlook for the global economy in the medium term. GDP levels are projected to remain well below the pre-pandemic trend path through 2024 for most countries. For the Emerging and Developing Asia regional group, IMF said projections for 2021 have been revised up by 0.6 percentage point, reflecting a stronger recovery than initially expected, after lockdowns were eased in some large

countries such as India. However, still high Covid-19 caseloads in some large countries in 2020 first quarter (such as Indonesia and Malaysia) put a lid on growth prospects.

O&G to remain a significant portion of energy mix

According to Petroliaam Nasional Bhd (Petronas) executive vice-president and chief executive officer, upstream Adif Zulkifli, oil and gas (O&G) will continue to make up a significant portion of the energy mix, although at a declining trend of 47% by 2040 from about 54% in 2018 due to the growth of renewable energy. As an industry tasked with catering to the growing energy demand, it was critical for the national oil company to continue to deliver energy that was affordable, secure and sustainable. The challenge lies in being to do it safely, at the lowest cost possible to ensure resilience and additionally, at low carbon which means to ensure the need to drive carbon emissions levels down from current levels. A shift in mindset and embracing new technology as well as digitalisation would drive the oil and gas industry to survive, remain relevant and competitive. What was done before will not work in the future. Technology and digitalisation which for so long has been advocated as an agent of change for the future must be embraced and implemented now. Petronas has started to reimagine a future where operations could be done remotely. In 2020, the first remote operations platform was piloted at the Resak field, offshore Terengganu. It is anticipated to reduce up to 30% of operation expenditure.

Records Are Meant to Be Broken

Markets

What a week it was. While both the Dow and S&P500 scaled new record highs, economic indicators too shattered previously established data points as IMF raised the 2021 global GDP growth forecast to 6% from 5.5% previously. The IMF also estimates that the Emerging and Developing Asia will experience the strongest GDP growth with a reading of 8.6% this year against the 1% contraction in 2020. The US Federal Reserve March meeting minutes meanwhile showed its commitment in maintaining its current monetary policy until an economic rebound is in place. As for Malaysia, according to Moody's Investors Service, our growth potential is stronger than our peers, mainly due to our economic diversity and complexity.

Economy

For the past week, another slew of economic indicators is now confirming the recovery theme that is very much in play. The JP Morgan Global Composite Purchasing Managers Index (PMI) surged to 54.8, a 79-month high. Late last week, we saw the US Institute for Supply Management's (ISM) PMI for the manufacturing sector leapfrogging to 64.7, highest in 38 years, while the services index soared to 63.7, highest since 1997. Labour market indicators were a blow-out with non-farm payrolls leapfrogging to 916,000, allowing the US unemployment rate to improve further to 6% from 6.2% previously. It was also a record for US trade deficit for the month of February as it surged to a new record high of RM71.1bil, mainly due to a sharper decline in exports of goods and services, which fell by 2.6% month-on-month. Similarly, the US\$88bil goods deficit too was the highest on record. Just two months into 2021, the US trade deficit of US\$138.9 billion is 68% higher when compared to a year ago.

Domestically, the suspended MRT Line 3, otherwise known as the Circle Line, is now back on track with the Transport Minister giving MRT Corporation three months to update the studies that were previously conducted and to be presented to the Cabinet. Still on rail infrastructure, the East Coast Rail Link (ECRL) is now expected to revert to its original northern alignment with a new price tag of RM50bil. The government now expects the ECRL line to be completed by 2027. On the property front, Malaysia saw some RM119.1bil in total transaction value on the back of 295.968 transactions last year. Both the volume and value figures dropped by 9.9% and 15.8% respectively. On a positive note, unsold completed units fell by 3.6% in total number of units but the value of the unsold stock was still higher by 0.5% y-o-y to RM18.92bil. Malaysia also released its international reserves position as at end of 1Q 2021 with reserves lower by 0.5% at US\$108.6bil compared to US\$109.2bil a fortnight ago. On the labour market front, Malaysia's unemployment rate nudged down a little to 4.8% in February from 4.9% the month before.

Corporate

AMMB Holdings proposed private placement exercise involving issuance of 300mil new shares priced at RM2.75 a piece received overwhelming response from investors. Top Glove said following the recent findings against the group by the US Customs and Border Protection (CBP), no new additional issue on forced labour has been discovered.

On the property front, Scientex proposed to acquire 3 pieces of land located close to its own development in Tasek Gelugor, Penang, measuring 343.2 acres for RM246.7mil or at RM16.50 per square feet. Still on land transactions, Nexgram entered into an

understanding to acquire 24.8 acres of land located in Melaka Tengah as the company intends to develop a medical complex with gross development value of RM1.6bil. Ekovest meanwhile revived plans to acquire 170.4 acres of landbank from Iskandar Waterfront Holdings Sdn. Bhd. for RM944.6mil via the issuance of irredeemable convertible preference shares and cash.

As the week came to an end, the surprise was surely the announcement by DiGi and Axiata to merge their respective telco operations into a new entity to be named Celcom DiGi Bhd. With both Axiata and Telenor having an equal shareholding of 33.1% each in the merged entity plus the RM2bil cash that Axiata will receive from DiGi, the merger plan was seen valued at RM45.4bil based on DiGi's last traded price.

PNB set another record as it announced asset under its management grew by 3.4% in 2020 to reach RM322.6bil as at December 31, 2020.

Equity

In terms of equity markets' performance, most markets closed higher across Asia and developed markets with gains of between 0.1% for the Singapore's STI to as much as 3.3% gain on Nasdaq. Only the Mumbai's Sensex and Bangkok's SET were lower week-on-week as both the indices fell by 0.6% and 2.3% respectively.

For the local bourse, foreign net buying interest was strongest for the period between 1st April and 8th April with net buying interest of RM61.3mil while local retail net buying interest dwindled to just RM26.1mil. The KLCI closed the week 1.25% firmer and just above the 1,600 pts mark.

3 Singapore Companies with Price to Book ratio below 0.5 times for the Past 3 Years

For starters, Price to Book ratio (P/B Ratio) is a commonly used financial ratio that measures the market's valuation of a company as compared to its book value. Traditionally, a P/B ratio of below 1.0 time is considered as acceptable valuation for value investors, indicating a potentially undervalued stock. This is because the company is trading at a market capitalization below what all its assets are worth. There are some companies trading with even lower P/B of less than 0.5 times, here are 3 of them.

All data are accurate as of 29 March 2021.

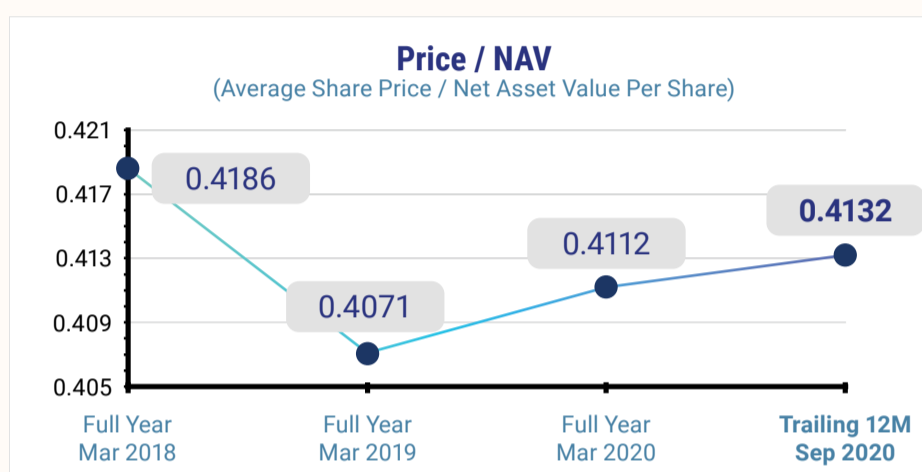

1 美羅 METRO

Metro Holdings Limited (SGX: M01)

For the past 3 financial years, Metro Holdings' P/B ratio stood around 0.40 and 0.41 times. Majority of its net asset value is being contributed from the investment properties in its balance sheet. Some of these investment properties include retail and office buildings in China and Singapore.

Metro Holdings' share price is last traded at S\$0.78, with a market capitalization of S\$645.86 million.

2 聯明集團有限公司 LIAN BENG GROUP LTD

Lian Beng Group Limited (SGX: L03)

For the past 3 financial years, Lian Beng's P/B ratio stood between 0.33 and 0.36 times. Like Metro Holdings, majority of Lian Beng's net asset value is derived from its investment properties. Currently, its portfolio of investment properties includes dormitory, commercial, retail and residential.

Lian Beng's share price is last traded at S\$0.51, with a market capitalization of S\$254.84 million.

3 Ind@Agri

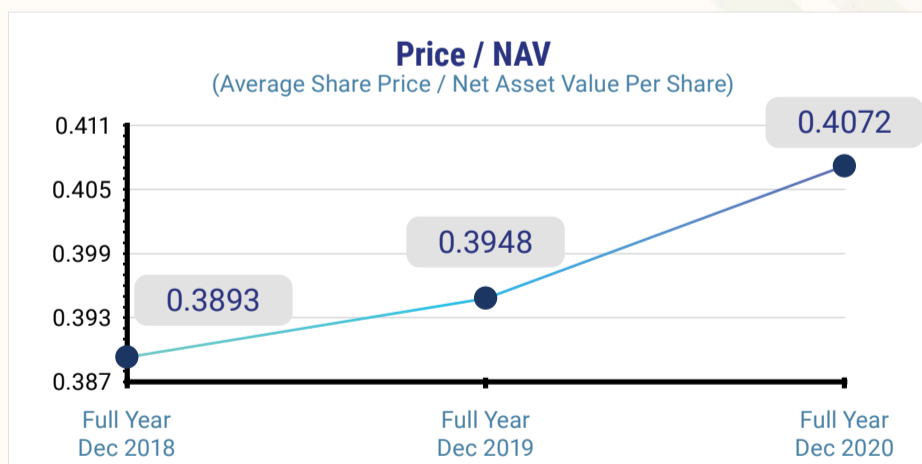

Indofood Agri Resources Limited (SGX: 5JS)

For the past 3 financial years, Indofood Agri's P/B ratio fluctuate between 0.38 and 0.40 times. As the company is in the agriculture business, majority of its net asset value is derived from its inventories, which are being held for sale.

Furthermore, its property, plant and equipment also help contribute to the overall value of the company.

Indofood Agri's share price is last traded at S\$0.30, with a market capitalization of S\$418.77 million.

Improved virtual AGM conduct

When the COVID-19 pandemic hit Malaysian shores in early 2020 with the ensuing Movement Control Orders, many PLCs had no choice but to conduct their annual general meeting virtually for the first time.

As that was the very first time for most of the PLCs, MSWG observed several areas for improvement in their conduct of meeting. One of the greatest concerns was that the questions raised by shareholders at the meeting were not being addressed by the Board, sometimes citing "time constraint". With the AGM peak season approaching (for PLCs with financial year ended 31 December 2020), and the ongoing movement control measures, we foresee most of the PLCs will continue to conduct their general

meetings virtually. This year, we hope to see improvements in the conduct of the virtual meeting, especially on how the questions from shareholders are being addressed. On this note, we would like to commend Bursa Malaysia Bhd for its improvements in conducting its AGM on 31 March 2021. These improvements are: -

1. All questions from shareholders, both received before and during the AGM, were displayed on screen in numerical order
2. All questions raised by shareholders were answered during the meeting. In total, there were over 160 questions which were answered during the two-hour plus meeting.

3. The internal auditor of the company was assigned to check the questions raised and ensure that all of them were answered.

Moving forward, MSWG hopes to see improved virtual AGMs conducted by our PLCs.

Advance Synergy Berhad

The Board of Directors of Advance Synergy Berhad (**ASB**) is pleased to announce that the Company is proposing a single tier dividend of 0.15 sen per ordinary share for the financial year ended 31 December 2020, subject to shareholders' approval at the forthcoming Annual General Meeting. The dividend entitlement and payment dates will be announced later.

AwanBiru Technology Berhad

AwanBiru Technology Berhad (**AWANTEC**) wishes to announce that Prestariang Tech Services Sdn. Bhd., a wholly owned subsidiary of Prestariang Services Sdn. Bhd. is undergoing Creditors' Voluntary Winding Up where Mr. Lim Tian Huat and Mr. Chiang Teng Guan of Messrs. Rodgers Reidy & Co. will be appointed as the Joint and Several Interim Liquidators on 2 April 2021 to commence the aforesaid Creditors' Voluntary Winding Up proceedings pursuant to Section 440(1) of the Companies Act 2016. The meetings of PTSSB and its creditors are scheduled to be held within thirty (30) days from the date of this announcement.

Digi.Com Berhad

The Board of Directors of Digi.Com Berhad (**Digi**) was informed by Telenor ASA, the parent company of Digi's largest shareholder, Telenor Asia Pte Ltd, that Telenor and Axiata Group Berhad are in discussion to merge the telco operations of Celcom and Digi, in which the parties will have an equal ownership of 33.1% each. The parties aim to create a leading telecommunication service provider in Malaysia with the capabilities to drive research and innovation and facilitate a platform for accelerated digital growth in the local ecosystem. A progressive digital economy is important to Malaysia's future economic resilience and competitiveness, and the MergeCo will be well positioned for delivering industry innovation, high-quality connectivity, and a diversified value proposition to the customers. The Board of Digi.Com Berhad has been informed that Telenor and Axiata will work towards finalising agreements in relation to the proposed transaction within the second quarter of 2021 following due diligence. The transaction will be subject to relevant board and shareholder approvals by Digi and Celcom, receipt of regulatory approvals, and other customary terms and conditions. The parties acknowledge that there is no certainty that these discussions will result in any agreement. The transaction may have a material impact on our Group, which will depend on the outcome on the on-going discussion between Telenor and Axiata, and various other factors including a due diligence exercise.

Axiata Group Berhad

Axiata Group Berhad (**Axiata**) wishes to announce that Axiata and Telenor Asia are in advanced discussions on the merger of the telco operations of Celcom Axiata Berhad and Digi.com Berhad, in which the Parties will have equal ownership estimated at 33.1 percent each. Axiata together with Malaysian institutional funds will own over 51 percent of the MergeCo. As part of the merger transaction, Axiata will receive newly issued shares in Digi representing 33.1 percent post-transaction shareholding and cash equalisation amount of around RM2 billion, of which RM1.7 billion to come from Digi as new debt, balance of RM300 million from Telenor. With the intent to create the leading Malaysian Telco, MergeCo will bring together Axiata and Telenor's Malaysian operations' combined scale, competencies, finances and vast experiences to generate significant synergistic value for a commercially stronger and more resilient MergeCo, which will be better positioned to drive the country's transition into a high-income digital society. In face of the global Covid-19 pandemic accelerating the shift towards digitalisation, the Government's announcement of the MyDIGITAL blueprint sets the pathway for economic transformation that strategically positions the nation to be highly competitive in the new norm. Where connectivity is a critical digitalisation enabler, the telco industry will play an integral role in supporting the Government's decision to fast-track 5G services and deliver ubiquitous high-quality broadband speed and services. This will bode well for customers as a move that would reap benefits for the economy and industry. As such, MergeCo will be uniquely positioned to take advantage of opportunities that come with technological advancements and the surge in the adoption of digital services while in parallel, manage the evolving challenges of a highly competitive and complex environment. MergeCo will be considered a leading telecommunications service provider in Malaysia in terms of value, revenue and profit, with proforma revenue of about RM12.4 billion, pre-synergy EBITDA of the combined entity at approximately RM5.7 billion, and an estimated 19 million customers.
