Climate concerns now an inevitable part of business

According to Climate Governance Malaysia founding member Datin Seri Sunita Rajakumar, addressing climate change is set to be part of doing business as concerns from investors, governments and regulators grow. Businesses need to be responsible and accountable because allocators of capital – bankers, investors and insurers – need this level of transparency as they are deciding where the capital is going. The first step for business to address is by establishing climate disclosure and reporting. In a presentation “Auditors role in understanding climate change” during the Governance in Audit virtual forum organised by the Institute of Internal Auditors Malaysia, she said that absence of such information in the annual report will be taken as a proxy to the quality of management and board. Domestically, Bank Negara Malaysia’s stance on the issue is clear as it outlined climate change is far reaching in breadth and magnitude – foreseeable and irreversible – there is a need to act now. In a taxonomy published on April 30, 2020, it stated that there is a clear link between physical risk drivers and systemic risk on the financial system, and the regulator can map out how exactly this is going to be affected. One of the things recognised is carbon pricing, a classic market failure in which the cost of pollution is borne by society at large globally but the profits accrue to the polluters. Pricing this pollutant is going to be important but the government needs to create an enabling environment. In regard to carbon pricing, the European Union announced on Wednesday that it will introduce a border carbon tax to imports into the customs union as part of its ambitions to be carbon neutral by 2050. The region does not want to be accused of outsourcing its climate ambitions to countries that have zero controls. The carbon pricing approach is not limited to governments alone, as global reinsurer Swiss Re has introduced an internal carbon levy of US\$100 per tonne in 2021 which will be increased to US\$200 per tonne by 2030. The levy will fund compensation of residual operational emissions through high-quality carbon removal projects. Its group CEO Christian Mumenthaler was quoted as saying that the move is proof of its climate action component of the company’s sustainability strategy and underscores its belief that leading companies can and must propel climate protection beyond mere compliance with current regulations. This move as an indicator to ascertain whether a business is still profitable with the changing climate. This is why shadow pricing is important, as it establishes how resilient you are to the inevitable price of carbon. In a report assessing climate change impact of 48 countries by Swiss Re, Malaysia was second last in terms of climate resilience, as it is vulnerable to extreme weather events and has a low adaptive capacity. On a baseline scenario of a 2–2.6°C temperature rise, the report found Malaysia, Thailand and the Philippines would lose 33–36% of GDP by 2048, as a result from the growing adverse impacts such as reductions in labour and agricultural productivity. Another way of looking at this is our sovereign ratings is going

to be affected, and the estimation is at least six notches of downgrade, which will affect our cost of funding and weaken the currency. It is important for Malaysia to make headways into addressing climate change as it is a trading nation which exports close to 70% of its GDP to countries such as European Union, China, Japan and South Korea which have declared their ambitions to have net zero carbon emission by 2050 and 2060 in the case of China. Given that these countries are trying to reduce their own carbon footprint, businesses and sectors that are trying to export need to manage their carbon footprint or might not be buyers for their goods. Meanwhile, being at the forefront in climate and sustainability will provide a competitive edge over those lagging behind in the climate issue.

Bursa Anywhere app now features eRights service

According to chief executive officer Datuk Muhamad Umar Swift, Bursa Malaysia has introduced a new service on its Bursa Anywhere mobile application (app), enabling investors to subscribe for rights issue electronically (eRights). The exchange said the new eRights service offers a convenient method for depositors to apply and make payment for rights issue electronically on the Bursa Anywhere app. Physical rights subscription forms and a trip to the bank or post office for payments are no longer necessary with eRights. With the new feature in place, the exchange envisaged a significant reduction in the risk of a rights securities application being misplaced or delayed during the course of postal delivery services. Any refund arising from the excess share applications would be credited directly into the investor’s bank account, instead of having to wait for the refund cheques which was sent via post previously. Bursa Anywhere is a mobile app that aims to provide investors ease of accessibility in managing their central depository system (CDS) accounts remotely. Besides the eRights service, the app also facilitates CDS account openings, e-dividend subscriptions and reactivation of dormant and inactive accounts. The Bursa Anywhere app has garnered over 190,000 downloads since its release in June 2019.

Eye On The Markets

This week, on Thursday (15July), the Ringgit was 4.1980 against the USD from 4.1870 on Monday (12July). Meanwhile, the Ringgit was 3.1008 to the Sing Dollar on Thursday (15July). On Monday (12July), the FBM KLCI opened at 1522.23. As at Friday (16July) 10:00am, the FBM KLCI is down 9.30 points for the week at 1512.93. Over in US, the overnight Dow Jones Industrial Average closed up 53.79 points (+0.15%) to 34,987.02 whilst the NASDAQ shed 101.80 points (-0.70%) to 14,543.10.

Corporate Profile

FU YU CORPORATION LIMITED

Established in 1978 as a partnership fabricating injection moulds and manufacturing plastic injection parts, Fu Yu Corporation Limited ("Fu Yu") has since grown to become a listed corporation with global presence. It is now one of the largest manufacturers and suppliers of high-precision injection moulds and plastic parts in Asia. Currently, Fu Yu have 8 manufacturing plants in Singapore, Malaysia and China.

Taking a vertically integrated approach towards greater profitability, its operations make a complete range from design to fabrication to assembly, and include secondary processes such as silk screening, pad printing, ultrasonic welding, heatsteking and spray painting. The markets we serve include the information technology, telecommunications, automotive, medical, electronic and electrical appliance and water filtration in home appliance sectors.

Technical Analysis

Source: ShareInvestor C² Chart

Based on the weekly chart, its share price managed to find a **relative strong support of around S\$0.23** in October 2020. Since then, it has managed to bounce up from the support. This can also be confirmed from the various weekly bullish candle stick, MACD line above the signal line and its share price were able to stay above the 20-Day Moving Average.

Subsequently, its share price continued its positive upward trend between November 2020 and January 2021, as its share price continued to trade near the upper limit of the Bollinger Band.

Meanwhile, Fu Yu experienced a surge in trading volume for the week on 18th January 2021. The huge run up in volume was mainly due to the change in ownership, where the co-founders have sold a 29.8 per cent stake, amounting to 224.4 million shares in the company, to local fund management firm, Pilgrim Partners Asia. However, **the weekly candlestick shows a strong price rejection at the top as the novelty of the news wear off.**

Following the transaction, Fu Yu's share price continued its uptrend **till early May where it had a minor correction. It subsequently went into a consolidation phase but still trades slightly above the 20 Day Moving Average.**

The next resistance will be around S\$0.32, which is the recent high for its share price. On the other hand, investors will have to take note if its share price breached the 20 Day moving average, which is around S\$0.305. This could indicate a possible downtrend.

Dividend

	Full Year Dec 2020	Full Year Dec 2019	Full Year Dec 2018	Full Year Dec 2017
Gross Dividend Per Share [cent]	1.6000	1.6000	1.6000	1.5000
Special Dividend Per Share [cent]	-	-	-	-
Total Dividend Per Share [cent]	1.6000	1.6000	1.6000	1.5000
Historical Basic Earning Per Share [cent] (Based on weighted average number of shares over the period)	2.2464	1.6853	1.5784	0.5900
Dividend Payout Ratio - Historical (Dividend Per Share/Historical EPS)	0.712	0.949	1.014	2.542
Dividend Payout Ratio incl Special Dividend - Historical (Yearly Total Dividend Per Share/Historical EPS)	0.712	0.949	1.014	2.542

Source: ShareInvestor WebPro

Fu Yu's total dividend per share remained stable across the years. For FY2017, its total dividend came in at 1.5 Singapore cents and has since risen by 6.67% year-on-year to 1.6 Singapore cents in FY2018.

For FY2019 and FY2020, they kept its total dividend per share unchanged at 1.6 Singapore cents, even as its earnings continue to improve across the years.

With the improvement in its bottom line, its dividend payout ratio was on a declining trend for the past few financial years. For FY2017, its dividend payout ratio was **at an unsustainable high** of 254% and has since improved to 71.2% in FY2020. This shows that the management is keen on distributing majority of the earnings to reward shareholders.

Overview

Despite the declining trend in its revenue across the years, Fu Yu has been able to grow its bottom line through the improvement in its efficiency and **reduction of operating** costs. With that, the company was able to pay out a steady amount of dividends to shareholders across the years.

In terms of outlook, Fu Yu is working on initiatives to better manage costs and increase operational efficiency through automation which will help to mitigate the potential effects from a slowdown in the business environment.

Meanwhile, the **current redevelopment project** is presently scheduled for completion by the end of 2021, barring any unforeseen circumstances including but not limited to any changes in government measures due to the COVID-19 situation. The purpose of the above redevelopment project is to expand and strengthen its manufacturing operations in Singapore.

Positive Data, But Momentum Easing

Markets

The Federal Reserve Chair's dovish comments to the House Financial Services Committee saw investors taking a positive view on financial markets. Comments by Jerome Powell that it is still too soon to scale back the central bank's aggressive support for the US economy while acknowledging that inflation has risen faster than expected, was enough for markets to consider that the much talked about tapering still has a relatively long runway. Powell also stressed that while officials expect high inflation to be temporary, they would react if inflation turned out to be persistently and materially above their 2% target. Meanwhile, locally, several trade groups from various chambers of commerce have called on the government to better handle the current Covid-19 protocols as communication on Standard Operating Procedures (SOPs) remained unclear and not targeted. The group also highlighted that they are rethinking their investment decisions in Malaysia. On issues related to forced labour and human trafficking, as highlighted by a report from the US recently, the Human Resources Ministry expressed its desire to work with the US authorities in addressing the issues of concern and enhance and increase the level of enforcement.

Economy

The key economic news of the week was the US June inflation data. Both the headline and core inflation for the month came in well above expectations, rising by 5.4% y-o-y and 4.5% y-o-y respectively. This was the sharpest increase in US inflation data in nearly 30 years. Headline Producer Price Index (PPI) also jumped, as the June data rose by 7.3% y-o-y. Key 2Q 2021 GDP data were released this week with both China and Singapore showing strength in numbers but falling short of expectations. Chinese 2Q GDP, which expanded by 7.9% y-o-y, fell short of the market forecast of an 8.1% gain, while Singapore's corresponding data, which came in at 14.3% y-o-y increase, was below the consensus estimate of a 14.8% gain. Meanwhile, Chinese exports for June showed continued strength in external trade as exports rose by 32.2% y-o-y while imports expanded by 36.7% y-o-y, both beating market expectations. Other June economic data points were also relatively strong as fixed investments grew by 12.6% y-o-y, industrial output expanded by 8.3% y-o-y, while retail sales surged 12.1% y-o-y.

Locally, the Minister of Finance commented that Malaysia is looking to revise the current GDP estimate to around 4%. Malaysia is also looking to raise the debt ceiling to 65% from the current 60% while the fiscal deficit may widen to between 6.5-7% from the earlier estimate of 6%. On the same matter, the Malaysian Rating Corporation (MARC) lowered their GDP forecast for Malaysia to 3.9% from the earlier estimate of 5.1%.

In economic news, a slew of data was released the past week. Industrial Production Index (IPI) surged 26% y-o-y for May on the back of the low base effect last year. The strong gains were mainly driven by the manufacturing index, which jumped 29.8% while mining grew by 20.7% y-o-y. Other data showed that the May 2021 manufacturing sales grew by 37.2% y-o-y to reach RM122.7bil, while the sales value of wholesale and retail trade for May 2021 expanded by 28.3% y-o-y to RM108.3bil. The breakdown shows wholesale trade itself expanded by 31.2% y-o-y to reach RM53.4bil while retail sales jumped 17.3% y-o-y to RM43.3bil. For the plantation sector, palm oil statistics saw inventories rising 2.8% to 1.61mil metric tonnes (MT) against the preceding month's total of 1.57mil MT, as production rose by 2.2% while exports jumped 11.8% to 1.42mil MT. Malaysia also released statistics in relation to wages and salaries for 2020, which showed both mean and median wages declined by 9% and 15.6% to RM2,933 per month and RM2,062 per month respectively.

Corporate

The joint venture company between WCT Holdings and China Communications Construction Company, in which WCT owns a 60% stake, will undertake the expansion of the Sapangar Bay Container Port in Kota Kinabalu for RM899.8mil. In another corporate development related to WCT, the company has entered into a Settlement Agreement for the Dubai Racecourse contract dispute whereby it will receive 65% of the court-awarded amount from the disputing party, amounting to RM828.2mil or approximately 59 sen per share. 38.5% of the settlement amount will be made this month while the balance 61.5% of the settlement amount will be paid out over twelve equal quarterly payments commencing in October 2021.

IWH CREC Sdn. Bhd. (IWHC), which is the joint venture of 60:40 between Iskandar

Waterfront Holdings SB (IWH) and China Railway Engineering Corporation (M) SB, and the Ministry of Finance (MoF) have mutually agreed to terminate the proposed acquisition of a 60% interest in Bandar Malaysia by IWHC for RM7.4bil. IWHC is expected to receive a refund of RM1.54bil from the termination. Likewise, Ekovest, which had earlier entered into a Heads of Agreement with IWH for a proposed investment in Bandar Malaysia via a joint venture, is now deemed null and void. AirAsia (AA) Group has proposed to raise as much as RM1.02bil via a renounceable rights issue of 7-year Redeemable Convertible Unsecured Islamic Debt Securities (RCUIDS) of RM0.75 each on the basis of 2 RCUIDS with 1 free warrant for every 6 AA shares held. The RCUIDS are convertible anytime to ordinary AA shares on the basis of 1 for 1 and carry a profit rate of 8% per annum. The redemption feature of the hybrid security suggests that AA will redeem 25% of the RCUIDs every year from the 4th year onwards. Meanwhile, Pelikan, which announced asset disposal last week, has declared a special dividend of 20 sen per share, amounting to RM120.6mil.

Equity

Global equity markets closed generally firmer with gains of between 0.1% and 3.1%. Two indices were down by 0.1% each, i.e. the NASDAQ Composite and Australia's S&P/ASX200, while the Philippines Stock Exchange PSEi fell by 2.8% week-on-week. Shares on Bursa Malaysia were firmer this week on light bargain hunting. The KLCI gained 12.11 pts week-on-week to close 1,520.82 pts on Thursday.

For the week ended July 14th, local institutions emerged as the largest net buyers with an inflow of RM226mil, followed by the retail net buying inflow of RM122.6mil. That left the foreigners as net sellers, this time with an outflow of RM348.6mil.

Eye On Week Ahead

The focus will be on US June retail sales data with the market expecting a drop of 0.4% m-o-m. Next week, the market's attention will be on US housing starts and existing home sales, which are expected at 1.57mil and 5.8mil annualised rate respectively.

Chief Executive Officer, Minority Shareholders Watch Group

Serba Dinamik – Some progress while awaiting other significant developments

1. The Special Independent Review (SIR)

Serba Dinamik Holdings Berhad has recently appointed Ernst & Young Consulting Sdn Bhd (EY) to conduct the Special Independent Review (SIR) to assess the accuracy and veracity of the matters raised by the resigning external auditor, Messrs KPMG PLT (KPMG). This is a step closer to resolving the issues highlighted by KPMG. The minority shareholders are expecting two announcements - one on the indicative date for the finalization of the SIR Report and the other, of the findings in the Report. Serba Dinamik must liaise with EY to arrive at the indicative date when the Report is expected to be finalized. This date should be announced as soon as possible. It should not take too long for the Company to announce an indicative date as it is presumed that EY has the cooperation of the outgoing auditor, and this cooperation would provide EY with some visibility on the indicative date. The findings in the SIR Report must also be announced promptly to shareholders.

2. The Appointment of New Auditors

With the resignation of KPMG as the statutory auditor for Serba Dinamik, the Company is in the process of identifying a new auditor. As announced on 6 July, Serba Dinamik had already submitted Request of Proposal for Provision of External Audit to international audit firms. The Company has also requested a meeting with Suruhanjaya Syarikat Malaysia (SSM) for a consultation in relation to the appointment of external auditors pursuant to Section 272 of the Companies Act 2016. Section 272 states that if a public company

fails to appoint an auditor, the Registrar may appoint an auditor upon the application in writing by any member of the company. Serba Dinamik has announced that it targets to appoint the new auditor by end July 2021 and will make immediate announcement upon the finalization of appointment of the new auditor.

In May 2021, Serba Dinamik changed its financial year end from 31 December 2020 to 30 June 2021. The appointment of the new auditor, in a timely manner, is essential for Serba Dinamik to meet the looming 31 October 2021 financial reporting deadline for its 18-month financial period ended 30 June 2021. That deadline is less than 4 months away. To-date, 2 weeks have lapsed since the resignation of KPMG. Hopefully, the SIR Report, which should be completed well before the 31 October reporting deadline, will facilitate the timeliness of concluding the statutory audit. The statutory audit is an important shareholder protection process under the Companies Act 2016. It is the independent opinion of an independent party, the auditor, directed to the shareholders, on the truth and fairness of the financial statements. Not meeting the timeline for the audited financial statements will be perceived by minority shareholders as a huge red flag. Time is of essence.

3. The Appointment of New Independent Directors (IDs) on the Board

On 25 June, five IDs resigned. Four IDs resigned citing differences in opinion over

the Company's decision to take legal action against KPMG while another ID resigned citing "personal commitment". Within two weeks, on 7 July, the Company appointed two new IDs. They are former Bursa official, Puan Siti Zaleha Sulaiman and ex-police officer, Datuk Seri Haji Mohamed Farid Abu Hassan. With these new appointments, Serba Dinamik's Board now comprises four IDs, constituting 50% of total board composition. With that, it has applied Practice 4.1 of Malaysian Code on Corporate Governance which states at least half of the board comprises independent directors.

Conclusion

It is good that the SIR has been appointed and the independent directors composition at the Board level has been replenished. What minority shareholders are now looking forward to are:

- the announcement of an indicative date when the SIR Report will be finalized
- the announcement of the findings in the SIR Report as soon as they are available
- the announcement of the audited financial statements before the deadline of 31 October 2021

ShareInvestor is a technology based company with a focus on Internet media and we have operations in Malaysia, Singapore and Thailand. We are the market leader in providing a combination of market data, analysis and news on various platforms to traders and investors.

Our websites include www.shareinvestor.com and www.bursastation.com. More information about our products and services can be found at www.shareinvestorholdings.com

We are looking for Developers to join our team, in a challenging, yet fun and fulfilling environment. The successful applicants will leverage on the latest Internet technologies to help create financial applications and platforms for investors, listed companies and financial institutions. Fresh graduates are welcome to apply.

Interested candidates are encouraged to apply with full resume, present and expected salary and a recent photograph. Please send these to hr.my@shareinvestor.com for processing. ShareInvestor regrets that only shortlisted candidates shall be notified.

Ruby on Rails Developer

Responsibilities:

- Develop quality web-based software modules on schedule with a focus on Ruby and Ruby on Rails applications.
- Explore and utilize the latest web-based technologies.
- Document design specifications, logic concepts and module description.
- Maintain and enhance existing web-based applications.

Requirements:

- Experience in web-based programming/scripting is essential. Candidate must be able to explain clearly technical aspects of his/her past experiences and projects.
- Passion for programming and desire to learn new languages like Go.
- Good Diploma/Degree in Computer Science/Computer Engineering.
- Able to work well in a team and be able to follow documentation and coding standards.
- Knowledge in any of the following would be an added advantage
 - Ruby and Ruby on Rails Framework
 - Javascript and jQuery library
 - Go
 - Perl

Application Developer (C++/STL)

Responsibilities:

- Deliver quality software modules on schedule.
- Document design specifications, conceptions, module description.
- Maintain and enhance existing applications.

Requirements:

- Passion for programming and desire to learn.
- Good Diploma/Degree in Computer Science/Computer Engineering.
- Skills in C++ is essential.
- Experience with Visual Studio, networking stack and Golang would be an advantage.
- Proactive, resourceful and self-motivated with strong analytical skills.
- Good interpersonal, written and communication skills.
- Able to work with little supervision.

PHP Developer

Responsibilities:

- Develop web applications in PHP
- Work with Front-End Developers for integration with visuals.
- Perform R&D work based on new ideas and concepts for future requirements and enhancement.
- Use JSON and REST API's for integration
- Advise and consult on technical queries on web development.
- Present ideas and concepts internally and be creative to propose and deliver solutions
- Provide support and maintenance for all related projects.
- Be actively involved in internal discussions, brainstorm-sessions, and other meetings.

Requirements:

- Bachelor's Degree/Diploma in Computer Science; Information Technology or equivalent.
- Minimum 3-5 years of experience working with at least one of the following PHP based frameworks: Drupal, Symfony, WordPress
- Experience with Drupal, AWS & Containerisation (Docker, GitLab, Podman) strongly preferred.
- Proven experience developing custom modules or framework extensions
- Very comfortable integrating with 3rd party APIs
- Strong skills in PHP, MySQL, Bootstrap, HTML, CSS, Javascript/Jquery.
- Excellent communication skills to support healthy relationships with teammates and clients
- Good problem solving capabilities
- Able to showcase PHP projects which the candidate has implemented before.
- Familiar with secure coding practices

GROWTH STOCKS

Price & Total Shareholder Return (As at Yesterday)

Fundamental Analysis

Definition

A growth company is any company whose business generates significant positive cash flows or earnings which increase at significantly faster rates than the overall economy. A growth company tends to have very profitable reinvestment opportunities for its own retained earnings.

Chart Guide

Total Shareholder Return (TSR) combines share price appreciation and dividends paid to show the total return to the shareholder expressed as a percentage.

AwanBiru Technology Berhad

AwanBiru Technology Berhad (**AWANTEC**) is pleased to announce that its wholly-owned subsidiary company, Prestariang Systems Sdn. Bhd., has successfully procured the contract for the supply of Perisian G Suite Enterprise For Education Bagi Sekolah-Sekolah Di Bawah Kementerian Pendidikan Malaysia with the Ministry of Education. The Contract is for a term of three (3) years, effective from 9 July 2021 with a value of RM22,777,509.38 (inclusive of 6% Sales and Service Tax). Ministry of Education had on 8 July 2021 issued the Surat Setuju Terima to Prestariang Systems Sdn Bhd and the terms of the transaction will be embodied in a formal contract to be executed between both parties.

AirAsia Group Berhad

On behalf of the Board of Directors of AirAsia Group Berhad (**AIRASIA**) RHB Investment Bank Berhad wishes to announce that the Company proposes to undertake a renounceable rights issue of up to RM1,024,058,370 in nominal value of 7-year redeemable convertible unsecured Islamic debt securities with a nominal value of RM0.75 each on the basis of 2 redeemable convertible unsecured Islamic debt securities with 1 free detachable warrant for every 6 ordinary shares held on an entitlement date to be determined by the Board and announced later by the Company.

Boustead Holdings Berhad

Boustead Plantations Berhad

As a corporate entity that will always find ways to provide the best shareholder value, Boustead Plantations Berhad (**BPLANT**) seeks prospects to unlocking the values of our assets including the estates in Sarawak. Nevertheless, the plan is still at the preliminary stage and Boustead Plantations Berhad has yet to engage with any interested parties. With the recent announcement of Zainal Abidin Shariff as the new Chief Executive Officer, he shall take this opportunity to re-evaluate all existing plans, implementations and future initiatives so that they are consistent with the overall Reinventing Boustead Strategy.

Ekovest Berhad

Ekovest Berhad (**EKOVEST**) wishes to announce that it has been notified by Iskandar Waterfront Holdings Sdn Bhd on 15 July 2021 that the Restated and Amended Share Sale Agreement executed between TRXC and Iskandar Waterfront Holdings-CREC had lapsed. Consequence on the above, Ekovest Berhad and Iskandar Waterfront Holdings will no longer proceed with the Heads Of Agreement dated 8 December 2020 as it is now deemed null and void.

KEJURUTERAAB ASASTERA BERHAD

Kejuteraan Asastera Berhad

On behalf of the Board of Directors of Kejuteraan Asastera Berhad (**KAB**), Mercury Securities Sdn Bhd wishes to announce that they propose to undertake a private placement of up to 169,180,000 new ordinary shares in the Company representing 10% of the existing total number of issued Shares (excluding treasury shares), to independent third-party investor(s) to be identified and at an issue price to be determined later.

Tan Chong Motors Holdings Berhad

The Board of Directors of Tan Chong Motors Holdings Berhad (**TCHONG**) wishes to announce that the feasibility study on the Proposed Collaboration will be completed soon. Preliminary findings indicate there are certain additional investments costs to be incurred in order to comply with the Vietnamese market regulations. TC Motor Vietnam Co. Ltd will ascertain whether it is economically viable for the Proposed Collaboration to continue or to be terminated. Further announcement will be made thereafter.
