Bank Negara Malaysia cuts another 50 basis points and lowers overnight policy rate to 2%

By Stella Goh

Last Friday (1May), PM Tan Sri Muhyiddin Yassin announced that on Monday (4May) Malaysia will move to Conditional MCO and will reopen nearly all businesses but under strict health standard operating procedures (SOP). This is to help steer the economy towards recovery after having lost almost RM63 billion due to the Covid-19 pandemic. However not all sectors are open so as to better manage the movement of people within a short time. During the MCO, Muhyiddin said Malaysia had absorbed losses of RM2.4 billion each day.

On Monday (4May), the FBM KLCI shed 31.19 points or 2.22% to 1376.59 points from previous Thursday's close of 1407.78 as investors weighed the prospect of a renewed US-Sino trade tension and the on-going spat over the origin of the Covid-19 virus. The FBM KLCI continued to shed 12.62 points from 1389.55 on Tuesday (5May) to 1376.93 on Wednesday (6May). Meanwhile the headline HIS Markit Malaysia Manufacturing Purchasing Manager's Index (PMI) has slumped to 31.3 in April from 48.4 in March.

On Tuesday (5May), Bank Negara Malaysia cut its Overnight Policy Rate (OPR) by 50 basis points (the third reduction) with a total of 100 basis points cut to 2% since starting the year to ease the pain of the Covid-19 impact. According to Bloomberg, it is the lowest level since 2.5% in 2010 according to 14 of 20 economists surveyed.

According to Moody's Investors Services, banks will be facing a sharp deterioration in asset quality and reduction in profitability from already low levels, while central banks are providing remarkable amounts of liquidity as the government's strong incentives to support banking systems. The banking institutions may use Malaysian Government Securities (MGS) and Malaysian Government Investment Issues (MGI) to meet statutory reserve requirement (SRR) effective from May 16 until May 31, 2021. BNM will effectively release RM16 billion worth of liquidity into the banking system. The SRR ratio remains unchanged at 2%.

According to Bank Negara Malaysia, the domestic financial markets saw non-resident portfolio outflow totalling RM17.7 billion (US\$4.1 billion) in March as risk sentiments intensified amid heightened uncertainties on

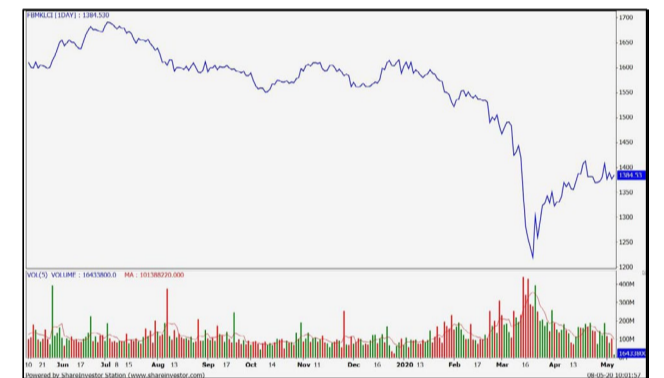

“ Malaysia's economy in 2020 could shrink more than initially forecast ... Finance Minister ”

the severity of COVID-19 pandemic impact on the economy. The global risk aversion remained elevated despite the large-scale monetary and fiscal stimulus measures introduced worldwide as funds sought safety in more liquid assets such as cash and US Treasury securities.

According to Finance Minister Tengku Datuk Seri Zafrul Tengku Abdul Aziz, Malaysia's economy in 2020 could shrink more than initially forecast due to extended curbs on movement imposed to stem an outbreak of Covid-19. Malaysia's central bank had forecast in April for growth in gross domestic product (GDP) of between -2% and 0.5% this year.

According to the Department of Statistics Malaysia, Malaysia's exports fell 4.7% Y-o-Y in March to RM80.1 billion, mainly driven by a decline in exports of electrical and electronics products. Similarly imports also fell 2.7% Y-o-Y to RM67.8 billion in March. Total trade in March was at RM147.9 billion, a 3.8% Y-O-Y decline whereas the trade surplus, compared to a year ago, shrank by 14.2% to RM12.3 billion.

This week, on Thursday (7May) the Ringgit was 4.3241 against USD from 4.3161 on Monday (4May). As at Friday (8May) 10:00 am, the FBM KLCI was at 1384.53

SHARIAH HOT STOCKS

Price & Volume Distribution Charts (As at yesterday)

Definition

Shariah compliant stocks with Technical Analysis showing 20-days Moving Average Price below Yesterday's Close over past 5 days and with Volume Spike.

Chart Guide

Volume Distribution Chart is a statistical interpretation of the current sentiment on each stock in graphical format. The highest bar categorized as >150k is likely to be traded by institutions or super dealers, while the lowest bar categorized as <15k usually represents retail investors. "Buy Up" refers to more buyers snatching up the lots queued at selling price. "Sell Down" refers to sellers selling their shares to the buying queue.

Hup Seng Industries Berhad (5024)

By Stella Goh

OVERVIEW

Hup Seng Industries Berhad (HUPSENG) was founded in 1991 and is based in Kuala Lumpur. The company is one of the leading and established biscuits manufacturers in Malaysia.

HUPSENG was listed in Main Market of Bursa Malaysia on 2 November 2000. With a strong line of established brands, "Hup Seng Cream Crackers" is well known for its excellent taste and quality which serves all consumer groups. The products have been awarded the Gold Medal consecutively for years 1994 to 2003 and Grand Gold Medal for years 2004 to 2019 awarded by Monde Selection, Belgium. It also garnered the "International High-Quality Trophy" award in 2017 and won the "25 Years Trophy" in 2018 by Monde Selection, Belgium.

In West Malaysia HUPSENG has 6 sales networks namely the Klang Valley, Kota Bahru, Kuantan, Ipoh, Butterworth and Alor Setar. There are another 7 distributors in East Malaysia located in Kota Kinabalu, Tawau, Sandakan, Kuching, Bintulu, Miri and Sibul.

BUSINESS MODEL

HUPSENG's three main business segments are biscuit manufacturing, beverage manufacturing and a trading division.

The biscuits range of key iconic brands include a diversified brand portfolio spanning from savory to sweet biscuits and are marketed as "Cap Ping Pong" and "Hup Seng Cream Crackers". The "Kerk" and "Naturell" brand products are catered to upmarket consumers who prefer high-quality premium products and health conscious consumer groups.

The beverage segment consists of wholesale coffee mix and various kinds of food stuff. HUPSENG's beverage range marketed under the "In-Comix" brand has three main categories namely "3 in 1 Instant Coffee Mix", "Instant Teas", Nutritious Instant Cereal" among others.

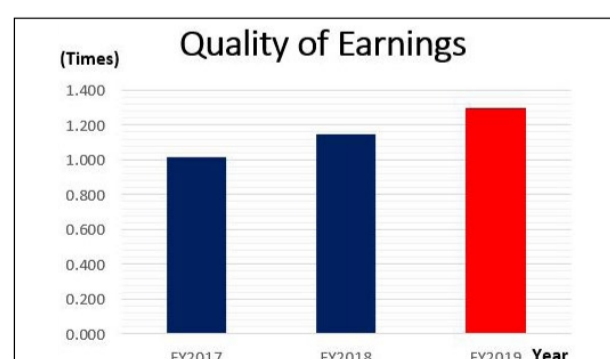

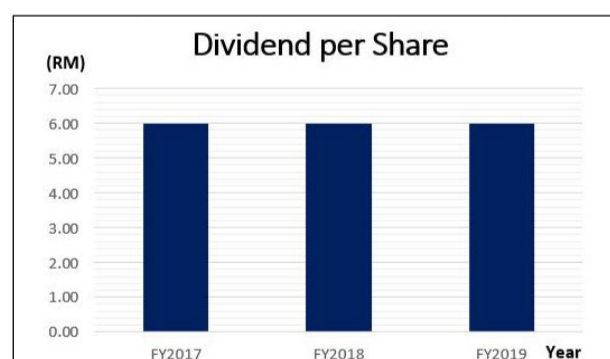

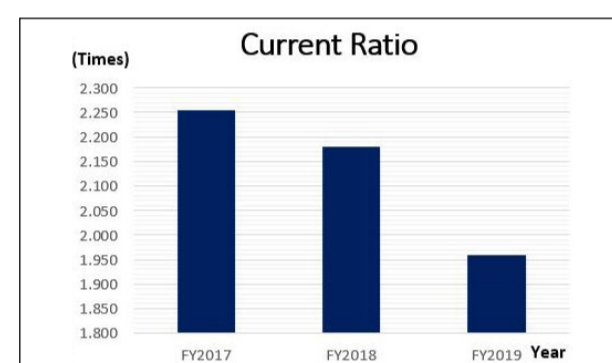

HUPSENG's trading division engages in the business of sales and distribution of biscuits, confectionery and foodstuff. The company offers Special Cream Crackers, Marie Biscuits, Coffee Marie Biscuits, Coconut Cookies, Butter Cookies, Peanut Butter Sandwich, Lingo Assorted Biscuits, Fancy Assorted Biscuits and many more. The company is also the distributor for other agent's products such as "Wang Wang" rice crackers etc.

FINANCIAL REVIEW

HUPSENG has paid out a favourable dividend of 6sen per share each year for the past three years. The company has maintained an average dividend payout ratio of 111.73% over the past 3 financial years indicating that the company is paying out more dividend to shareholders than its earnings. And by paying out 100% of its annual net profit as dividends, it has exceeded its own dividend policy practice of paying out at least 60% of its net profit per year as dividends. (refer to Prospects & Challenges and Insight at the end of this article)

HUPSENG has achieved a consistent growth in its quality of earnings over the past 3 years (1.298 times) in FY2019 compared to 1.143 times in FY2018 indicating that the operating cash flow generated from the business is more than the net income suggesting that the business has strong cash flow and is financially sound.

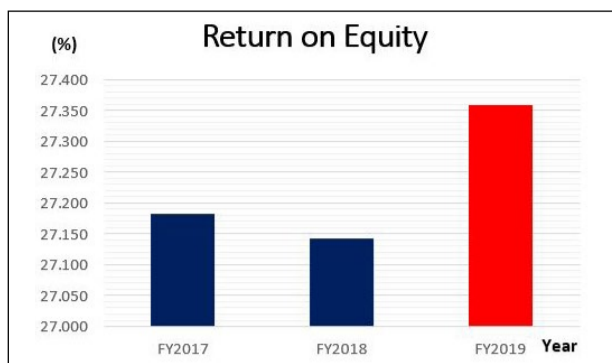

Based on the computation of liquidity ratio, HUPSENG has achieved a current ratio of 1.960 times in FY2019 over the past 3 years indicating that the company does not face any liquidity issue as it is capable of paying back its current liabilities (RM75.175 million) if any unforeseeable circumstances occur. Even though the current ratio has been decreasing to the lowest in FY2019, HUPSENG is still able to do so by using the current

assets such as inventories, trade and other receivables, prepayments, cash and bank balances amounting to RM147.362 million.

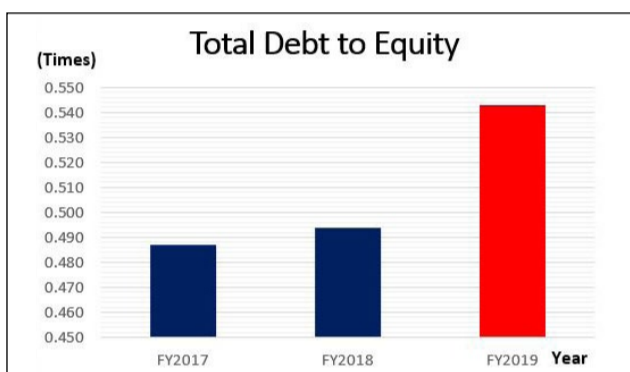

HUPSENG has a lower gross profit margin of 34.02% in FY2019 as compared to 35.71% in previous year. The gross profit margin is the lowest in FY2019 mainly due to the higher cost of production of RM309.539 million arising from higher and fluctuating material costs.

Despite the crude palm oil (CPO) price averaging RM2,133 per tonne in the first half of 2019 (1H19), which was significantly lower than the average in 1H18 (RM2,442 per tonne), HUPSENG guided that it had been unable to recognize lower palm oil cost as the closure of many smaller palm oil refiners meant that large players can keep refined palm oil prices high despite lower CPO prices. It resulted in the increase in the materials cost as it is about 40% of the raw material cost made up from CPO. In Q4 2019, the economy started to slow to 3.6%, contracting to 4.3% for the full year (compared to 4.7% growth in 2018) due to lower output of palm oil, crude oil and natural gas, and a fall in exports amid the Sino US trade war.

HUPSENG has achieved the highest Return on Equity (ROE) of 27.36% in FY2019. Based on 3 years CAGR basis, the company's Return on Equity has grown 0.46%.

Even though the gross profit margin has decreased in FY2019, the increase in Return on Equity (ROE) can be attributed to the decrease of total equity from RM158.270 million in FY2018 to RM151.801 million in FY2019. And it is also an indication that as there is more sales produced by the company relative to its assets, the more profitable it should be and the higher the ROE it earns since it has an asset turnover ratio of 132.17%. The management of the company is seen as effective and capable in deploying the resources in the company as well.

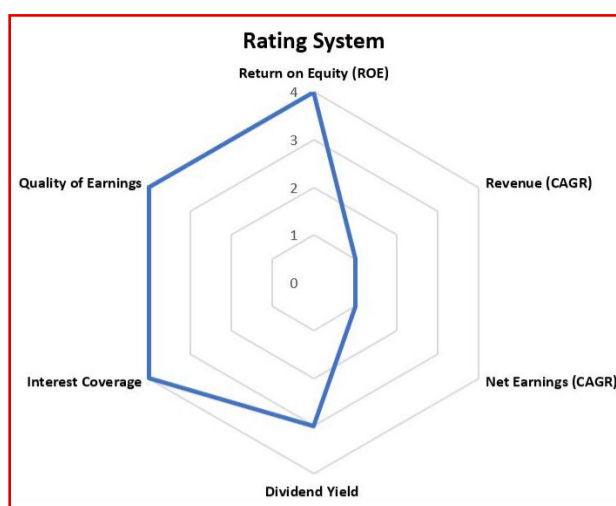

HUPSENG has achieved the highest Total Debt to Equity ratio of 0.543 times in FY2019 among three financial years. Even though the Total Debt to Equity ratio of HUPSENG has increased in FY2019, the company is still able to pay off its debt obligations as the Total Debt to Equity ratio based on 3 years is almost lower than half of its liabilities compared to its equity. This may also indicate HUPSENG has a lower risk, since the debt holders have less claim on the company's assets.

CASH FLOW STATEMENT

The net cash from operating activities has provided a positive cash flow of RM51.192 million in FY2019 as compared to RM45.95 million in FY2018 indicating that the company is healthy and has enough cash to use for business expansion.

The net cash from investing activities in FY2019 (-RM13.696 million) in FY2019 was mainly due to the purchase of Property, Plant and Equipment (RM16.558 million) and purchase of right-of-use-assets (RM127,200). The negative cash flow indicates that the firm is continuing to invest in its business for growth.

The net cash from financing activities in FY2019 (RM48.295 million) was mainly due to dividend paid on ordinary shares (RM48 million) and repayment for lease liabilities (RM294,586).

PROSPECT AND CHALLENGES

FY2020 will remain a challenging year due to global protectionism, uncertainty of the US monetary policy in global economy, the unsettled Sino-US trade standoff, the slowdown of China's economic growth as well as COVID-19 pandemic. HUPSENG plans to further strengthen its product quality, expand its product portfolio, focus on costs management and broaden its distributor network.

HUPSENG had formulated a strong advertising & promotional strategy led by bestselling and high-quality products at strategic consumer touch points in FY2020. Plans were to also be present at hypermarkets and mini markets with stepped up promotions through sampling activities. However the Extended MCO prevented all those plans from being implemented which turned out to be not a bad thing after-all. In their rush to stock up on foodstuff, consumers snapped up everything leaving empty display shelves in every retail outlet nationwide.

If not for the Covid-19 pandemic and MCO, the company's sales teams often go to schools to offer sampling packs to children to allow young generation from the 90's and 00's to understand the company's range of foodstuff. The company is also ready to consider entering the online market to provide greater convenience to consumers. A new cracker line is also slated to be operational by FY2020. The company also is trying out new recipes to expand its product range which should help to improve the utilisation rate of its baking lines.

In 2019, in order to have a more systematic management, HUPSENG had produced a new and upgraded version of its Mobile Sales Systems (MSS) to enhance and simplify the handling and processing of daily orders by the sales teams and enabling the sales team to perform more efficient

Hup Seng Industries Berhad Share Price Over 3 Years

RATING SYSTEM

- Return on Equity (ROE) = **Excellent**
- Revenue [CAGR] = **Poor**
- Net Earnings [CAGR] = **Poor**
- Dividend Yield = **Good**
- Interest Coverage = **Excellent**
- Quality of Earnings = **Excellent**

customer relationship management through better customers' order information, product information at anytime-anywhere to meet the company's processing requirements. The MSS also helps to strengthen customer after-sales service and establish a strong relationship.

MY INSIGHT

Based on the calculation of Gordon Growth Model, HUPSENG has an intrinsic value of RM1.133. The current share price of HUPSENG is RM0.955 which makes it in the range of fair value (as at 6 May 2020). HUPSENG has a beta of 0.515 (500 days) indicating that the share price is less volatile than the current market. Based on computation of Compound Annual Growth Rate (CAGR), HUPSENG has an expected market return of 0.79%.

In conclusion, HUPSENG is a favourite among dividend hungry investors because of its consistently strong dividend payout. However investors still need to consider a host of other factors apart from dividend when analysing a company in view of weak global economic outlook and challenges ahead. Whilst in the midst of the extended MCO, we do not know if the company's production capacity as well as its delivery logistics has been affected but we can observe that biscuits and such pre-packed foodstuff were the first to fly off the shelves as soon as the MCO was announced.

Insider Trades

Definition

Insider Trades shows the trades made by substantial shareholders or directors of the company. Purchases by the directors and company share buyback may indicate the share price is undervalued and brings confidence to the price trend of the share price.

NEW

C² Chart is WebPro's new feature-packed technical analysis tool for the modern stock investor

Over 100 Indicators
Select your preferred indicators to best suit your technical strategies

Drawing Tools
Multiple drawing tools to easily identify chart patterns

Events Indicators
Key events can be pinned onto your charts for a better overview

Compare Tool
Conveniently compare multiple stock prices at the same time

Historical Data
Extract price data from over 30 years

Over 10 Chart Styles
Various charts to suit your preferred style

No App Needed
Access your charts from any computer or mobile

Easy Zoom
Intuitive zooming function on charts

Long Companies

Definition

Top 8 stocks with Technical Analysis plus Pattern Matching by 60 pre-defined indicators by the system showing a higher probability of bullish sentiment on the share price.

SHAREINVESTOR WEBPRO step-by-step GUIDE
 ShareInvestor WebPro > Screener > Predefined TA Screens > select market BURSA > Most Long Signals > click Scan Results or mouse over each company > Charts > click Interactive Charts for Price & Volume Distribution
