Bursa's Trading Volume, Value & new CDS account openings spike during MCO

By Stella Goh

Foreign Selling of Malaysian equity at a total of RM11.08 billion ... MIDF Research

On Sunday (10May), PM Tan Sri Muhyiddin Yassin announced the fourth extension of the movement control order (MCO) with further loosened restrictions under the conditional MCO (CMCO) for another four weeks from May 13 until June 9. Since the period will cover several major Malaysian celebrations, namely Hari Raya Aidilfitri, Kaamatan Festival and Hari Gawai, when it usually involves in heavy movement of people, such movement will not be allowed.

On Tuesday (12May), the FBM KLCI shed 2.38 points or 0.17% to 1379.93 from previous Friday's close of 1382.31. The FBM KLCI has reversed the trend and inched up to 1397.25 on Thursday (14May). Based on feedback from Bursa Malaysia, the MCO has had a positive impact on its trading activity.

Malaysia's Industrial Production Index (IPI) dropped 4.9% in March 2020 from a year earlier due to the decrease in all three components (manufacturing, electricity and mining) of the index. According to the Statistics Department, the IPI's manufacturing component fell 4.2% in March 2020 after recording an increase of 6.2% in February 2020. The major sub-sectors contributing to the decrease in the manufacturing sector in March 2020 were electrical and electronic products (-5%), non-metallic mineral products, basic metal and fabricated metal product (-9.8%), food & beverage and tobacco (-9.9%). While the electricity index and mining index recorded a reduction of 0.4% and 1.8% respectively.

According to MIDF Research, the foreign selling of Malaysian equity swelled almost nine times to RM774.1 million last week from RM87.6 the prior week. Based on the weekly fund flow report on Tuesday (12May), the foreign investors have so far taken out RM11.08 billion net of equities from Malaysia. In comparison to the other six Asian peers, Malaysia remains as the nation with third smallest foreign net outflow on a year-to-date basis after Indonesia and the Philippines.

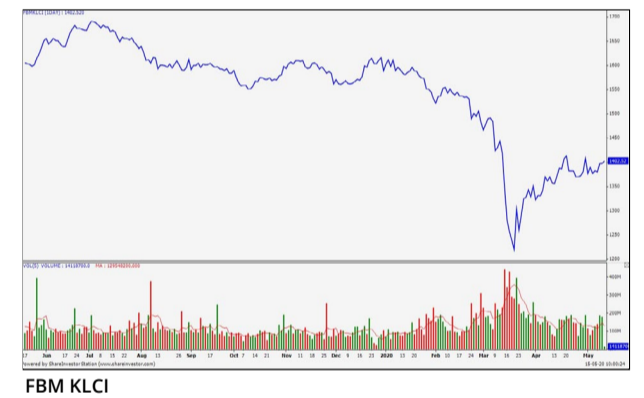

Bank Negara Malaysia (BNM) stated that Malaysia's average headline inflation in 2020 is likely to turn negative due to mainly projections of substantially lower global crude oil prices and other commodity prices including food as well

as evolving demand conditions. Malaysia's economic growth in gross domestic product (GDP) terms has dipped sharply to 0.7% in 1Q20 (4Q19: 3.6%) which is the lowest since third quarter of 2009 due to the impact of measures taken both globally and domestically to contain the spread of Covid-19 pandemic.

According to BNM, during the first quarter (1Q20), headline inflation remained modest at 0.9% mainly reflecting the lapse in the remaining impact from Sales and Services Tax (SST) implementation and lower price-volatile inflation. The core inflation moderated slightly to 1.3%. BNM also stated that the sizeable fiscal, monetary, and financial measures and progress in transport-related public infrastructure projects will provide further support to growth in 2H20. In line with projected improvement in global growth, the Malaysian economy is expected to register a positive recovery in 2021.

According to the Senior Minister of International Trade and Industry Datuk Seri Mohamed Azmin Ali, the government will announce a six months short-term recovery plan by the end of May to revive the economy. Following the recovery plan, government also plans to table a medium-term revitalization plan under the 2021 Budget in November, followed by a long-term reform plan which will be under the 12th Malaysia Plan that is scheduled to be revealed in January 2021.

This week, on Thursday (14May) the Ringgit was 4.3405 against USD from 4.3336 on Monday (11May). Meanwhile the Ringgit to Sing Dollar was 3.0513 on Thursday (14May). As at Friday (15May) 10:00 am, the FBM KLCI was at 1402.52.

Power Root Berhad (7237)

By Stella Goh

OVERVIEW

Power Root Berhad (PWROOT), formerly known as Natural Bio Resources Berhad was founded in 1999 in Johor Bahru. PWROOT is one of Malaysia's leading beverage manufacturers and is a specialist manufacturer and distributor of coffee, tea, chocolate malt drinks and herbal energy drinks.

PWROOT was listed in Bursa's ACE Market in 2007 and successfully transferred to the Main Market in 2010. The company exports its products regionally to countries in the Middle East, South Korea, Indonesia, Singapore, China, HongKong, Taiwan, Japan, Thailand.

BUSINESS MODEL

PWROOT develops and promotes herbal energy drinks fortified with two main rainforest herbs called Eurycoma Longifolia or commonly known as "Tongkat Ali" and Labisia Pumila and Pathoina or "Kacip Fathimah". These herbs, indigenous to Malaysia, have properties which are beneficial in strengthening the body's immunity, combating fatigue and helps in healing of wounds due to its anti-bacterial properties.

PWROOT's leading functional (Tin) and premixed (Instant) products are mainly marketed under the brand names of "Alicafe" and "Perl" while its instant white coffee is sold under the brand of "Ah Huat". Other than instant premixed coffee the company also sells ready-to-drink (RTD) canned energy drinks and tea under the brand names of "Power Root Extra" and "Alitea" respectively. The company also sells chocolate malt drinks which are marketed under the brand names of "Oligo", "Perl Choco" and "Ah Huat Choco".

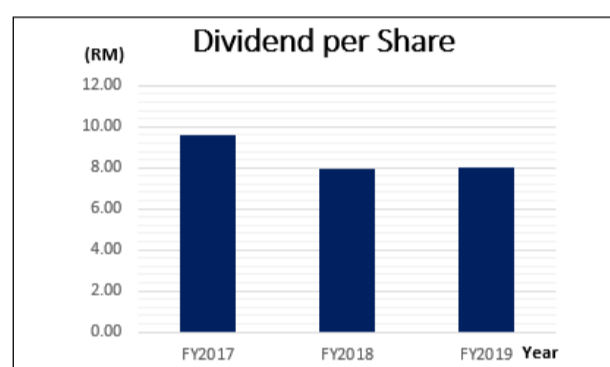

FINANCIAL REVIEW

PWROOT paid a higher annual total dividend per share of 8sen in FY2019 compared to 7.92sen in FY2018 but was lower than the 9.58sen it paid in FY2017.

Despite the total dividend per share paid in FY2019 being not the highest in 3 years, PWROOT has been able to pay out a favourable dividend consistently over a 10-year period. The company's dividend payout ratio for FY2019 stood at 112.4% or RM31.5million and has maintained an average dividend payout ratio of 176.8% over the past 3

Source: powerroot.com

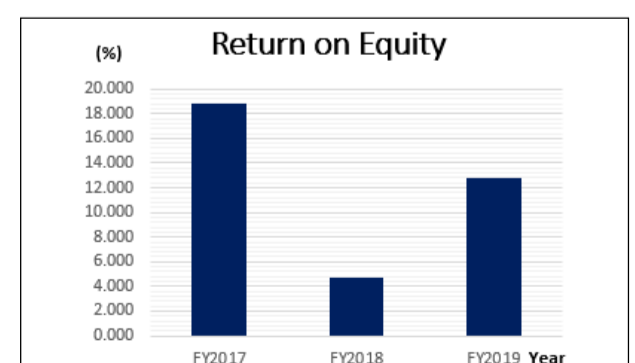

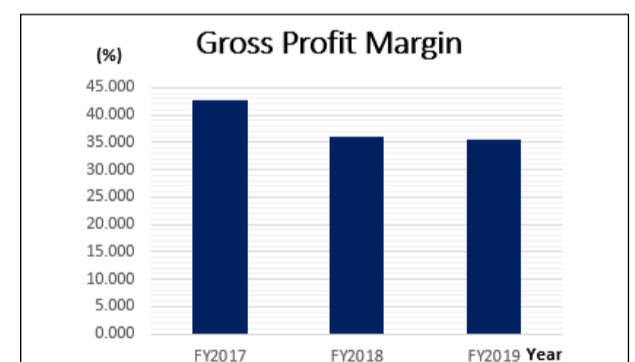

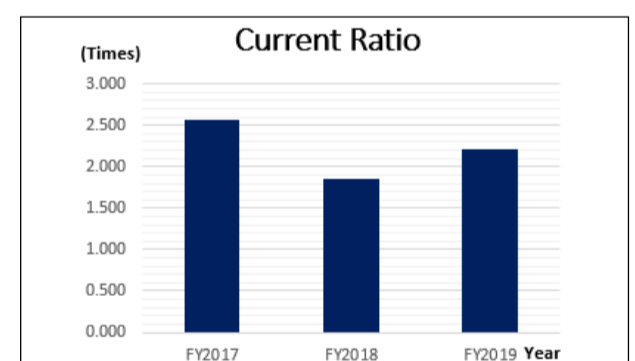

financial years indicating that the company is paying out more dividend to shareholders than its earnings. And by paying out more than 100% of its annual net profit as dividends, it has exceeded its own dividend policy practice of paying out at least 50% of its net profit per year as dividends. (refer to *Prospects & Challenges and Insight at the end of this article*)

PWROOT's quality of earnings had increased from 1.013 times in FY2017 to 1.787 times in FY2018 but decreased in FY2019 to 1.464 times as compared to FY2018. In spite of this PWROOT was still able to maintain its quality of earnings at more than 1 over the past 3 years indicating that the company's operating cash flow generated from the business is more than the net income suggesting that the business has strong cash flow and is financially sound.

Based on the computation of liquidity ratio, PWROOT has achieved a current ratio of 2.218 times in FY2019 as compared to 1.847 times in FY2018. Even though the current ratio in FY2019 is not the highest among 3 financial years, it still indicates that the company does not face any liquidity issue as it is capable of paying back its current liabilities (RM112.946 million) if any unforeseeable circumstances occur. PWROOT is able to do so by using the current assets such as inventories, trade and other receivables, current

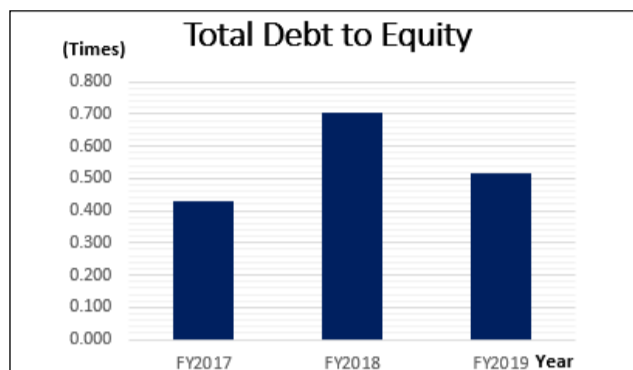

tax assets, cash and cash equivalents amounting to RM250.473 million.

PWROOT has a marginally lower gross profit margin of 35.41% in FY2019 as compared to 35.92% in previous year. The gross profit margin is the lowest in FY2019 mainly due to a decline in export sales to Saudi Arabia from RM204.6 million to RM173.5 million as expatriates there left the country due to a Government scheme of imposing a higher levy on expatriates and their dependents. This had reduced PWROOT's customer base in the region. However, the company has restructured its distributorships and is also leveraging its strong brand image in the Middle East and North Africa to continue to expand its market share.

PWROOT's Return on Equity (ROE) has increased to 12.83% in FY2019 from 4.66% in FY2018 but was still lower than the 18.75% in FY2017.

Even though the gross profit margin has slightly decreased in FY2019, the increase in Return on Equity (ROE) indicates that more sales was produced by the company relative to its assets as the higher the profit gained, the higher the ROE it earns since it has an asset turnover ratio of 101.76%. The management of the company is seen effective and capable in deploying the resources in the company as well.

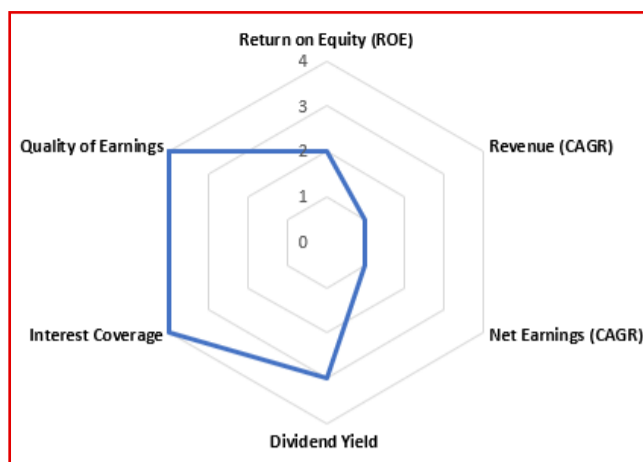

PWROOT has a lower Total Debt to Equity ratio of 0.515 times in FY2019 as compared to 0.704 times in FY2018 indicating that the company is able to pay off its debt obligations as the Total Debt to Equity ratio in FY2019 is almost less than half of its liabilities compared to its equity. This may also indicate PWROOT has a lower risk, since creditors have less claim on the company's assets.

CASH FLOW STATEMENT

The net cash from operating activities has provided a positive cash flow of RM41.626 million in FY2019 as compared to RM16.860 million in FY2018 indicating that the company is healthy and has enough cash used for business expansion.

The net cash from investing activities (-RM2.149 million) in FY2019 was mainly due to the acquisition of Property, Plant and Equipment (PPE) amounting to RM8.620 million indicating that the firm is continuing invest in its business for growth.

The net cash from financing activities in FY2019 (-RM34.062 million) was mainly due to dividends paid to shareholders (RM23.099 million), net repayment of banker's acceptances (RM12.795 million), interest paid (RM625,419), repayment of finance lease liabilities (RM412,443), repurchase of treasury shares (RM315,415) and repayment of term loans (RM237,360).

RATING SYSTEM

Return on Equity (ROE) = **Average**
 Revenue [CAGR] = **Poor**
 Net Earnings [CAGR] = **Poor**
 Dividend Yield = **Good**
 Interest Coverage = **Excellent**
 Quality of Earnings = **Excellent**

PROSPECT AND CHALLENGES

PWROOT's export sales is expected to recover after the lifting of Movement Control Order (MCO) as well as easing of lockdowns that were implemented in the company's export markets such as China, Singapore, the Middle East and North Africa (MENA) region. The company also experienced some minor disruptions to its supply chain with its distributors in the initial stages of MCO but the issues have since been resolved.

In China, PWROOT's sales are driven by the Alicafe and Ah Huat brands, where the products are consumed across the country but with a concentration in urban centres. In order to boost growth, the company has restructured its online business by setting up a dedicated and experienced online sales team which now accounts for about 75% of PWROOT's sales in China being done online. PWROOT has also revamped its inventory management system as well as added new equipment to reduce wastages and optimise productivity.

In the upcoming year, the company will focus on strengthening its distribution network while maintaining its commitment to improve on its operational efficiencies and cost management activities. On the export front, PWROOT will continue to pursue market growth, particularly in the MENA region by developing its distribution network and launching high-quality new products in order to attract new customers and meet their changing tastes.

MY INSIGHT

Based on the calculation of Gordon Growth Model, PWROOT has an intrinsic value of RM2.537. The current share price of PWROOT is RM2.27 which makes it in the range of fair value (as at 14 May 2020). PWROOT has a beta of 0.922 (500 days) indicating that the share price is less volatile than the current market. Based on computation of Compound Annual Growth Rate (CAGR), PWROOT has an expected market return of 0.94%.

In conclusion, PWROOT may look attractive to investors due to its consistently strong dividend payout. Besides, PWROOT also looks impressive to investors who find a company's debt reason for concern as the company has a net cash of RM56.845 million in FY2019 as well as more liquid assets (RM250.473 million) compared to its current liabilities (RM112.946 million). However investors still need to consider a host of other factors apart from dividend when analysing a company in view of the weak global economic outlook and Covid-19 pandemic still in play.

Malaysia Airports Holdings Berhad

Malaysia Airports Holdings Berhad (**AIRPORT**) is pleased to announce the passenger traffic snapshot at airports operated by Malaysia Airports Group for the month of April 2020 as below:

- April traffic performance at both Malaysia and SGIA were affected by the full enforcement of the Movement Control Order (MCO) in Malaysia and temporary suspension of Istanbul SGIA following the Turkish Government's decision to close borders.
- The MCO enforcement in Malaysia has restricted airport and airline operations to repatriation and cargo flights.
- Local airlines have recommenced flights to key domestic routes with minimal frequencies from 29 April 2020 amid the MCO, with airlines collectively working with airports to ensure a safe environment with effective layers of measures to ensure a smooth and safe journey.
- In this unprecedented period, total AIRPORT system passenger movements contracted by 98.8% in April 2020 to only 137,000 passengers.
- International sector registered a 99.3% decline with over 39,000 passenger movements in April 2020, while domestic passenger movements declined by 98.4% to just over 97,000 passengers.
- On a twelve-month basis, total AIRPORT system recorded 121.6million passenger movements over the same corresponding period last year.
