Malaysia's Consumer Price Index (CPI) dropped 2.9% in April

By Stella Goh

Next monetary policy committee meeting to be held on 7 July 2020

On Monday (18May), the FBM KLCI gained 6.72 points or 0.48% to 1410.16 from previous Friday's close of 1403.44 as trade volume across Bursa Malaysia rose to another record high at 11.21 billion securities worth RM4.41 billion. The surge in trade volume was attributed to heavy trading of shares in Bursa Malaysia-listed oil and gas (O&G) related companies as a result of the rising price of crude oil.

Bank Negara Malaysia (BNM) has cut interest rates three times this year by a total of 100 basis points (bps), with the most recent cut of 50 bps on May 5. It had earlier cut OPR by 25bps in January and by another 25 bps in March. The current OPR rate stands at 2%. The next monetary policy committee meeting will be held on July 7, 2020.

Malaysia's consumer price index (CPI) for April fell at a sharper rate of -2.9% from a year ago compared with Bloomberg's survey of a -1.6% decline due to the drop in prices of transport, housing, water, electricity and fuel. Not only is this the second consecutive month of decline in CPI after the 0.2% drop in March 2020 but it is also the sharpest contraction in more than five decades. The hugely lower average price of RON95 fuel in April 2020 at RM1.27 per litre compared to RM2.08 in April 2019 contributed to the decrease in the transport component and the overall index. Nevertheless, food and non-alcoholic beverages continued to increase in April 2020 by 1.2% to 133.9 as compared to 132.3 in April 2019. Food and non-alcoholic beverages contributed 29.5% of CPI weight. Similarly, miscellaneous goods and services also rose by 2.3% followed by communication (1.6%), health (1.2%) and education (1.2%).

On Wednesday (20May), short-term interbank rates ended stable on Bank Negara Malaysia's (BNM) operations to absorb surplus liquidity from the financial system. The surplus in the conventional system declined to RM39.71 billion from RM48.72 billion while the Islamic system fell to RM20.90 billion from RM22.78 billion. BNM has also revised the Murabahah overnight tender from RM18.9 billion to RM20.9 billion. The average Islamic overnight interest rate stood at 1.97 percent, while the one-, two- and three-week rates stood at 2.04 percent, 2.09 percent and 2.13 percent, respectively.

According to RAM Rating Services Berhad, foreign holdings of Malaysian bonds contracted RM2 billion in April 2020 compared with the RM12.3 billion drop in the preceding month as global and domestic liquidity-boosting measures were seen stabilising market sentiment.

RAM also stated that the lowering of statutory reserve requirement (SRR) while allowing principal dealers to recognise up to RM1 billion of MGS (Malaysian Government Securities) and MGII (Malaysian Government Investment Issues) as part of their SRR compliance may also have supported domestic demand for fixed-income securities which in turn lowered yields. The yield of the benchmark 10-year MGS fell 51.3bps to 2.9% as at end of April, reversing the 56.9bps surge in March. Looking ahead, RAM said the bond yields still face downside pressure as the recent measures of broadening the usage of MGS and MGII to meet SRR should support demand for government bonds.

This week, on Thursday (21May) the Ringgit was 4.3462 against USD from 4.3550 on Monday (18May). Meanwhile, the Ringgit was 3.0659 to the Sing Dollar on Thursday (21May). As at Friday (22May) 10:00 am, the FBM KLCI was at 1445.76

Kotra Industries Berhad (0002)

By Stella Goh

OVERVIEW

Kotra Industries Berhad (KOTRA) was founded in 1982 and is based in Melaka. KOTRA is ranked as one of South East Asia's leading pharmaceutical manufacturers that's engaged in research and development, manufacturing and trading of pharmaceutical and healthcare products.

KOTRA was listed in Bursa's ACE Market in 2000 and successfully transferred to Main Market of Bursa Malaysia in 2007. As the diverse range of healthcare needs are increasing, the company is dedicated to continuously maintain top-of-the-line research in order to create innovative, high quality products that improves health and enhances holistic well-being.

BUSINESS MODEL

KOTRA has a wide range of healthcare products, nutritional products as well as pharmaceutical products in various dosage forms such as tablets, capsules, cream, ointment, gel, liquid, dry powder preparation and injectables. KOTRA has carved its market niche via three main brands namely Appeton, Axcel and Vaxcel.

The Appeton brand offers high quality of over-the-counter (OTC) products that cater to different stages of life from prenatal needs to geriatric health supplements. For example, dietary supplements for infants and teenagers, multivitamin tablets, syrup for kids, vitamins and mineral supplements for pregnant and lactating women, antioxidant vitamins for adults, products for weight-gain related conditions, wellness products for senior citizens and so on.

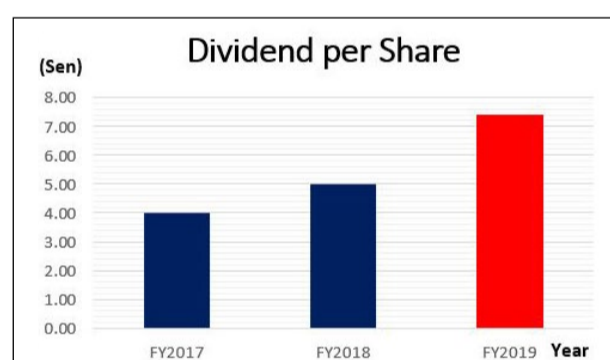

Axcel products specialize in pediatrics care, anti-infective medicine and dermatological care while Vaxcel products focus on sterile injectables that feature a range of antibiotics to treat an extensive range of health conditions.

FINANCIAL REVIEW

KOTRA has achieved the highest dividend growth of 48% from a total dividend of 5sen in FY2018 to 7.4sen in FY2019. KOTRA also has paid the highest dividend yield of 4.27% in FY2019 compared to previous years.

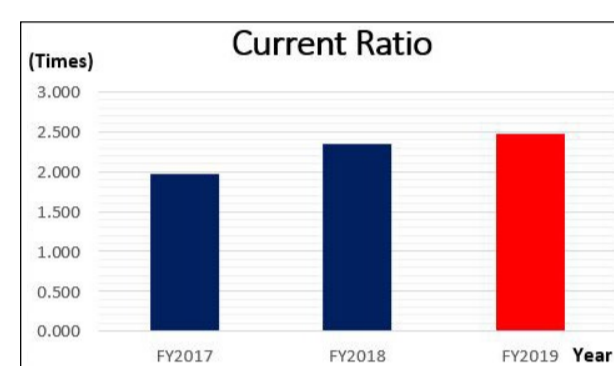

KOTRA had paid an interim dividend of 3sen per share for the financial year ended 30 June 2019. The company has also approved a final dividend of 4.4sen during the financial year bringing the total favorable dividend for the year to 7.4sen. The company's dividend payout ratio for FY2019 stood at 46.5% indicating that the company is paying almost half of its earnings as dividend to its shareholders. The company is confident that it will be able to deliver a healthier dividend when the company reaches a more solid financial position. (refer to Prospects & Challenges and Insight at the end of this article)

KOTRA has achieved the lowest quality of earnings of 1.586 in FY2019 over the past 3 years. In spite of this KOTRA was still able to maintain its quality of earnings at more than 1 over the past 3 years indicating that the company's operating cash flow generated from the business is more than the net income suggesting that the business has strong cash flow and is financially sound.

Based on the computation of liquidity ratio, KOTRA has achieved the highest current ratio of 2.473 times in FY2019 over the past 3 financial years indicating that the company does not face any liquidity issue as it is capable of paying back its current liabilities (RM40.836 million) if any unforeseeable circumstances occur. KOTRA is able to do so by using current assets such as inventories, trade receivables, other receivables,

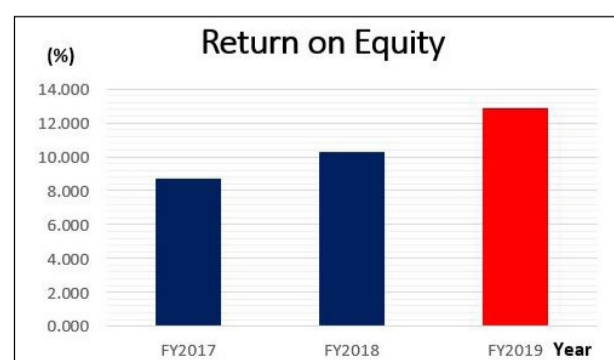

derivative assets, fixed deposits with licensed banks, cash and bank balances amounting to RM100.992 million.

KOTRA has achieved the highest gross profit margin of 39.84% in FY2019. Despite the growing gross profit margin to its highest in 3 years, KOTRA was still able to maintain a favorable gross profit margin of more than 30% over the past 3 years indicating the profitability of its core business activities without taking into consideration of its indirect costs.

KOTRA's profit before tax has improved from RM15.903 million in FY2018 to RM21.364 million in FY2019 or an increase of 34.3% resulting from higher foreign exchange rates for its export sales, lower finance cost and focus on quality on its selling and administration expenses.

KOTRA has achieved the highest Return on

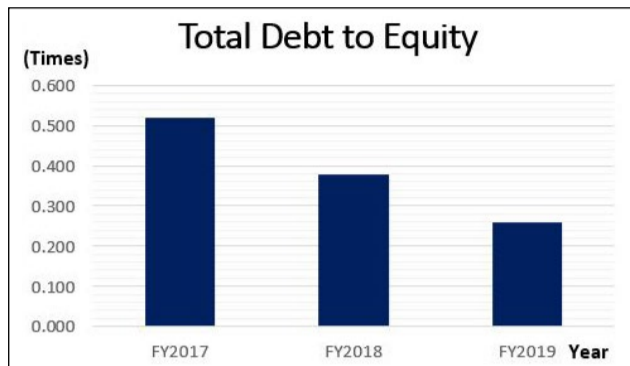

Equity (ROE) of 12.89% in FY2019. Based on 3 years CAGR basis, the company's Return on Equity has grown 29.65%.

The increase in Return on Equity (ROE)

indicates that as the company generated more sales relative to its assets, the more profitable it should be and the higher the ROE since it has an asset turnover ratio of 70.02% in FY2019. The management of the company is seen as effective and capable in deploying its resources in the company as well.

KOTRA has a decreasing Total Debt to Equity

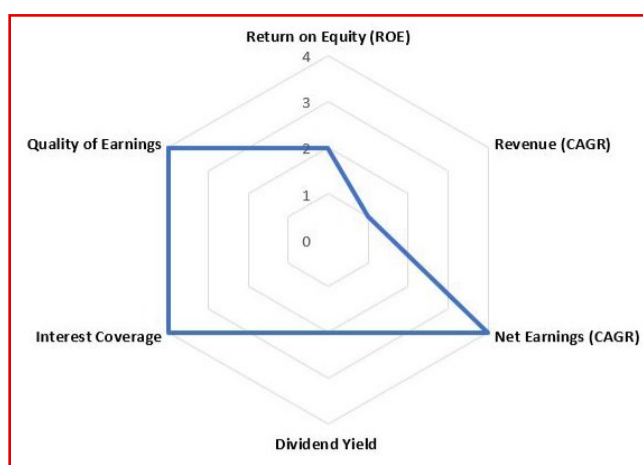

ratio of 0.258 times in FY2019 over the past 3 years indicating that the company is good at paying off its debt obligations. Despite the Total Debt to Equity ratio being the lowest in FY2019 which is less than 0.5 times, it still indicates that the company has a lower risk as its total borrowings only amounted to RM44.447 million as compared to RM172.160 million of total equity.

CASH FLOW STATEMENT

The net cash from operating activities has provided a positive cash flow of RM36.967 million in FY2019 as compared to RM35.576 million in FY2018 indicating that the company is healthy and has enough cash used for business expansion.

The net cash from investing activities (-RM25.757 million) in FY2019 was mainly due to placement of fixed deposits with tenure more than 3 months (RM14 million) and purchase of Property, Plant and Equipment (RM12.513 million). The negative cash flow indicates that the firm is continuing to invest in its business for growth.

The net cash from financing activities in FY2019 (-RM17.394 million) was mainly due to repayment of term loans (RM12.663 million), dividend paid (RM8.628 million), interest paid (RM2.409 million), repayment of hire purchase (RM305,000) and repayment of other short-term borrowings (RM287,000).

PROSPECT AND CHALLENGES

As Covid-19 continues to spread globally creating disruption & uncertainty ripples across industries & markets, many companies' expansion plans have been put on the back burner. However that is not the case for KOTRA Industries Berhad.

According to managing director Jimmy Piong Teck Onn, the pharmaceuticals and consumer products company is carrying on with its expansion plans. He also qualifies by explaining that the company will be increasing its product range overseas but will not be entering into new markets as it is more challenging and it takes much longer for sales to materialise. Expansion plans will be to push for more exports in the over 30 countries it is already in.

KOTRA remains optimistic by working diligently to optimise its available resources to meet market demands. The company is looking into optimising its operations efficiency by rolling out robust cost control measures and innovative approaches in its operations to drive greater output in productivity. The company will also rigorously focus on the fundamentals by engaging more contract manufacturing and tender supply opportunities in its current market base to maximize the production capacity utilisation and improving production efficiency.

MY INSIGHT

Based on the calculation of Discounted Earnings Model, KOTRA has an intrinsic value of RM3.258.

The current share price of KOTRA is RM2.33 which makes it an undervalued stock (as at 21 May 2020). KOTRA has a beta of 0.521 (500 days) indicating that the share price is less volatile than the current market. Based on computation of Compound Annual Growth Rate (CAGR), KOTRA has an expected market return of 1.33%.

In conclusion, KOTRA may look attractive to investors due to consistent Net Earnings growth and a dividend payout ratio of more than 40% for past 3 years. KOTRA's dividend yield of 4.272% looks interesting, although the company has only been paying for three years. Besides, KOTRA's low debt is also comforting to investors who find a company's high debt reason for concern during economic uncertainties and as well as lockdowns. The company has a net cash of RM14.755 million in FY2019 as well as more liquid assets (RM100.992 million) as compared to its current liabilities (RM40.836 million). Moreover in view of the Covid-19 outbreak, consumers are stocking up on vitamins to help boost their immunity which is expected to augur well for sales of its pharmaceutical products.
